Q1.

Urban biodiversity is often dismissed as a lesser concern than the preservation of untouched wilderness, yet cities harbour ecological relationships every bit as intricate as those found in remote forests. A single old banyan tree in a metropolitan park can support dozens of bird species, insect colonies, and epiphytic plants, forming a compressed but functioning ecosystem within a few hundred square metres. Municipal planners, however, have historically treated green cover as an aesthetic afterthought rather than infrastructure — something to be added once roads, drains, and buildings are finished, rather than designed alongside them. This sequencing has consequences. When trees are planted as ornamental additions to already-hardened landscapes, they rarely form the interconnected canopy networks that allow species to move between patches; each tree becomes an ecological island rather than a node in a wider web. Studies of several Indian metropolitan areas have shown that fragmented green cover, even when substantial in total area, supports markedly less biodiversity than the same acreage arranged as connected corridors. The implication is uncomfortable for city planners: it is not merely the quantity of green space that matters, but its configuration. Some cities have begun reversing this logic by mandating "green corridors" — continuous strips of vegetation along roads, canals, and rail lines — specifically to reconnect fragmented habitats. Critics argue this is a cosmetic response to a structural problem, since corridors cannot compensate for the outright loss of large habitat patches to construction. Proponents counter that corridors are not a substitute for large green spaces but a necessary complement, particularly in already-dense cities where reclaiming large tracts of land is not politically or economically feasible. Which of the following best captures the central argument of the passage?

- (A) Cities should stop all construction to preserve biodiversity
- (B) The configuration of urban green space matters as much as its quantity for supporting biodiversity** ☒
- (C) Banyan trees are the most important species for urban ecosystems
- (D) Green corridors are a complete solution to urban biodiversity loss

Correct Answer: (B)

Explanation:

The passage's turning point ("it is not merely the quantity of green space that matters, but its configuration") is the thesis. (A) overreaches. (C) mistakes an illustrative example for the main claim. (D) contradicts the passage, which presents corridors as a "complement," not a complete solution.

Q2.

Urban biodiversity is often dismissed as a lesser concern than the preservation of untouched wilderness, yet cities harbour ecological relationships every bit as intricate as those found in remote forests. A single old banyan tree in a metropolitan park can support dozens of bird species, insect colonies, and epiphytic plants, forming a compressed but functioning ecosystem within a few hundred square metres. Municipal planners, however, have historically treated green cover as an aesthetic afterthought rather than infrastructure — something to be added once roads, drains, and buildings are finished, rather than designed alongside them. This sequencing has consequences. When trees are planted as ornamental additions to already-hardened landscapes, they rarely form the interconnected canopy networks that allow species to move between patches; each tree becomes an ecological island rather than a node in a wider web. Studies of several Indian metropolitan areas have shown that fragmented green cover, even when substantial in total area, supports markedly less biodiversity than

the same acreage arranged as connected corridors. The implication is uncomfortable for city planners: it is not merely the quantity of green space that matters, but its configuration. Some cities have begun reversing this logic by mandating "green corridors" — continuous strips of vegetation along roads, canals, and rail lines — specifically to reconnect fragmented habitats. Critics argue this is a cosmetic response to a structural problem, since corridors cannot compensate for the outright loss of large habitat patches to construction. Proponents counter that corridors are not a substitute for large green spaces but a necessary complement, particularly in already-dense cities where reclaiming large tracts of land is not politically or economically feasible. Q1. Which of the following best captures the central argument of the passage? (A) Cities should stop all construction to preserve biodiversity (B) The configuration of urban green space matters as much as its quantity for supporting biodiversity (C) Banyan trees are the most important species for urban ecosystems (D) Green corridors are a complete solution to urban biodiversity loss ANSWER: B EXPLANATION: The passage's turning point ("it is not merely the quantity of green space that matters, but its configuration") is the thesis. (A) overreaches. (C) mistakes an illustrative example for the main claim. (D) contradicts the passage, which presents corridors as a "complement," not a complete solution. The phrase "ecological island" as used in the passage most nearly means:

- (A) A tree species found only on islands
- (B) A green patch geographically located near water
- (C) An isolated pocket of habitat disconnected from others** ☒
- (D) A protected wildlife reserve

Correct Answer: (C)

Explanation:

The sentence contrasts "ecological island" with being "a node in a wider web," signalling isolation. (A) and (D) misread "island" literally; (B) confuses it with a geographic meaning.

Q3.

Urban biodiversity is often dismissed as a lesser concern than the preservation of untouched wilderness, yet cities harbour ecological relationships every bit as intricate as those found in remote forests. A single old banyan tree in a metropolitan park can support dozens of bird species, insect colonies, and epiphytic plants, forming a compressed but functioning ecosystem within a few hundred square metres. Municipal planners, however, have historically treated green cover as an aesthetic afterthought rather than infrastructure — something to be added once roads, drains, and buildings are finished, rather than designed alongside them. This sequencing has consequences. When trees are planted as ornamental additions to already-hardened landscapes, they rarely form the interconnected canopy networks that allow species to move between patches; each tree becomes an ecological island rather than a node in a wider web. Studies of several Indian metropolitan areas have shown that fragmented green cover, even when substantial in total area, supports markedly less biodiversity than the same acreage arranged as connected corridors. The implication is uncomfortable for city planners: it is not merely the quantity of green space that matters, but its configuration. Some cities have begun reversing this logic by mandating "green corridors" — continuous strips of vegetation along roads, canals, and rail lines — specifically to reconnect fragmented habitats. Critics argue this is a cosmetic response to a structural problem, since corridors cannot compensate for the outright loss of large habitat patches to construction. Proponents counter that corridors are not a substitute for large green spaces but a necessary complement, particularly in already-dense cities where reclaiming large tracts of land is not politically or economically feasible. Q1. Which of the following best captures the central argument of the passage? (A) Cities should stop all construction to preserve biodiversity (B) The configuration of urban green space matters as much as its quantity for supporting biodiversity (C)

Banyan trees are the most important species for urban ecosystems (D) Green corridors are a complete solution to urban biodiversity loss ANSWER: B EXPLANATION: The passage's turning point ("it is not merely the quantity of green space that matters, but its configuration") is the thesis. (A) overreaches. (C) mistakes an illustrative example for the main claim. (D) contradicts the passage, which presents corridors as a "complement," not a complete solution. Q2. The phrase "ecological island" as used in the passage most nearly means: (A) A tree species found only on islands (B) A green patch geographically located near water (C) An isolated pocket of habitat disconnected from others (D) A protected wildlife reserve ANSWER: C EXPLANATION: The sentence contrasts "ecological island" with being "a node in a wider web," signalling isolation. (A) and (D) misread "island" literally; (B) confuses it with a geographic meaning. Based on the passage, which of the following would the author most likely support?

(A) Prioritising ornamental tree planting over corridor planning

(B) Designing green infrastructure alongside roads and buildings from the outset, rather than after ☐

(C) Abandoning green corridors in favour of isolated large parks only

(D) Treating biodiversity loss as primarily a rural, not urban, issue

Correct Answer: (B)

Explanation:

The passage criticises treating green cover as "an afterthought... added once roads, drains, and buildings are finished." (A) is explicitly criticised; (C) ignores support for corridors as complements; (D) contradicts the passage's premise.

Q4.

Urban biodiversity is often dismissed as a lesser concern than the preservation of untouched wilderness, yet cities harbour ecological relationships every bit as intricate as those found in remote forests. A single old banyan tree in a metropolitan park can support dozens of bird species, insect colonies, and epiphytic plants, forming a compressed but functioning ecosystem within a few hundred square metres. Municipal planners, however, have historically treated green cover as an aesthetic afterthought rather than infrastructure — something to be added once roads, drains, and buildings are finished, rather than designed alongside them. This sequencing has consequences. When trees are planted as ornamental additions to already-hardened landscapes, they rarely form the interconnected canopy networks that allow species to move between patches; each tree becomes an ecological island rather than a node in a wider web. Studies of several Indian metropolitan areas have shown that fragmented green cover, even when substantial in total area, supports markedly less biodiversity than the same acreage arranged as connected corridors. The implication is uncomfortable for city planners: it is not merely the quantity of green space that matters, but its configuration. Some cities have begun reversing this logic by mandating "green corridors" — continuous strips of vegetation along roads, canals, and rail lines — specifically to reconnect fragmented habitats. Critics argue this is a cosmetic response to a structural problem, since corridors cannot compensate for the outright loss of large habitat patches to construction. Proponents counter that corridors are not a substitute for large green spaces but a necessary complement, particularly in already-dense cities where reclaiming large tracts of land is not politically or economically feasible. Q1. Which of the following best captures the central argument of the passage? (A) Cities should stop all construction to preserve biodiversity (B) The configuration of urban green space matters as much as its quantity for supporting biodiversity (C) Banyan trees are the most important species for urban ecosystems (D) Green corridors are a complete solution to urban biodiversity loss ANSWER: B EXPLANATION: The passage's turning point ("it is not merely the quantity of green space that matters, but its configuration") is the thesis. (A) overreaches.

(C) mistakes an illustrative example for the main claim. (D) contradicts the passage, which presents corridors as a "complement," not a complete solution. Q2. The phrase "ecological island" as used in the passage most nearly means: (A) A tree species found only on islands (B) A green patch geographically located near water (C) An isolated pocket of habitat disconnected from others (D) A protected wildlife reserve ANSWER: C EXPLANATION: The sentence contrasts "ecological island" with being "a node in a wider web," signalling isolation. (A) and (D) misread "island" literally; (B) confuses it with a geographic meaning. Q3. Based on the passage, which of the following would the author most likely support? (A) Prioritising ornamental tree planting over corridor planning (B) Designing green infrastructure alongside roads and buildings from the outset, rather than after (C) Abandoning green corridors in favour of isolated large parks only (D) Treating biodiversity loss as primarily a rural, not urban, issue ANSWER: B EXPLANATION: The passage criticises treating green cover as "an afterthought... added once roads, drains, and buildings are finished." (A) is explicitly criticised; (C) ignores support for corridors as complements; (D) contradicts the passage's premise. What is the function of the third paragraph in the overall structure of the passage?

(A) It introduces a solution and presents both support and criticism of it ☒

(B) It refutes the entire argument made in the first two paragraphs

(C) It provides statistical proof for the passage's central claim

(D) It shifts the topic to rural conservation policy

Correct Answer: (A)

Explanation:

The paragraph introduces green corridors, then gives critics' and proponents' views — a balanced treatment.

(B) is false; it builds on prior paragraphs. (C) is inaccurate — no statistics are given. (D) is unsupported.

Q5.

Urban biodiversity is often dismissed as a lesser concern than the preservation of untouched wilderness, yet cities harbour ecological relationships every bit as intricate as those found in remote forests. A single old banyan tree in a metropolitan park can support dozens of bird species, insect colonies, and epiphytic plants, forming a compressed but functioning ecosystem within a few hundred square metres. Municipal planners, however, have historically treated green cover as an aesthetic afterthought rather than infrastructure — something to be added once roads, drains, and buildings are finished, rather than designed alongside them. This sequencing has consequences. When trees are planted as ornamental additions to already-hardened landscapes, they rarely form the interconnected canopy networks that allow species to move between patches; each tree becomes an ecological island rather than a node in a wider web. Studies of several Indian metropolitan areas have shown that fragmented green cover, even when substantial in total area, supports markedly less biodiversity than the same acreage arranged as connected corridors. The implication is uncomfortable for city planners: it is not merely the quantity of green space that matters, but its configuration. Some cities have begun reversing this logic by mandating "green corridors" — continuous strips of vegetation along roads, canals, and rail lines — specifically to reconnect fragmented habitats. Critics argue this is a cosmetic response to a structural problem, since corridors cannot compensate for the outright loss of large habitat patches to construction. Proponents counter that corridors are not a substitute for large green spaces but a necessary complement, particularly in already-dense cities where reclaiming large tracts of land is not politically or economically feasible. Q1. Which of the following best captures the central argument of the passage? (A) Cities should stop all construction to preserve biodiversity (B) The configuration of urban green space matters as much as its quantity for supporting biodiversity (C) Banyan trees are the most important species for urban ecosystems (D) Green corridors are a complete solution to urban biodiversity loss ANSWER: B EXPLANATION: The passage's turning point ("it is not

merely the quantity of green space that matters, but its configuration") is the thesis. (A) overreaches. (C) mistakes an illustrative example for the main claim. (D) contradicts the passage, which presents corridors as a "complement," not a complete solution. Q2. The phrase "ecological island" as used in the passage most nearly means: (A) A tree species found only on islands (B) A green patch geographically located near water (C) An isolated pocket of habitat disconnected from others (D) A protected wildlife reserve ANSWER: C EXPLANATION: The sentence contrasts "ecological island" with being "a node in a wider web," signalling isolation. (A) and (D) misread "island" literally; (B) confuses it with a geographic meaning. Q3. Based on the passage, which of the following would the author most likely support? (A) Prioritising ornamental tree planting over corridor planning (B) Designing green infrastructure alongside roads and buildings from the outset, rather than after (C) Abandoning green corridors in favour of isolated large parks only (D) Treating biodiversity loss as primarily a rural, not urban, issue ANSWER: B EXPLANATION: The passage criticises treating green cover as "an afterthought... added once roads, drains, and buildings are finished." (A) is explicitly criticised; (C) ignores support for corridors as complements; (D) contradicts the passage's premise. Q4. What is the function of the third paragraph in the overall structure of the passage? (A) It introduces a solution and presents both support and criticism of it (B) It refutes the entire argument made in the first two paragraphs (C) It provides statistical proof for the passage's central claim (D) It shifts the topic to rural conservation policy ANSWER: A EXPLANATION: The paragraph introduces green corridors, then gives critics' and proponents' views — a balanced treatment. (B) is false; it builds on prior paragraphs. (C) is inaccurate — no statistics are given. (D) is unsupported. According to the passage, why do critics see green corridors as an inadequate response?

(A) Corridors are too expensive for most city governments to build

(B) Corridors cannot make up for the complete loss of large habitat patches □

(C) Corridors attract more traffic congestion

(D) Corridors are opposed by local residents

Correct Answer: (B)

Explanation:

Critics call corridors "cosmetic" since they "cannot compensate for the outright loss of large habitat patches to construction." (A), (C), (D) are not mentioned.

Q6.

The handwritten letter has become, in the span of a single generation, an object of nostalgia rather than necessity. Where a personal letter once required its writer to commit thought to paper in a single, largely irreversible pass — crossing out errors rather than deleting them, choosing words with the knowledge that revision was costly — digital messages invite a different relationship with language altogether. A text message can be typed, deleted, retyped, and sent in seconds, with none of the friction that once forced deliberation. It would be easy to conclude from this that digital communication has simply made writing faster without changing its character. But something subtler appears to be happening. Because digital messages are cheap to send and expected to arrive instantly, they have shifted toward brevity and immediacy at the expense of the sustained, developed thought that slower correspondence once encouraged. A letter, written with the knowledge that a reply might take weeks, tended to accumulate the writer's reflections over that interval; a text message, written with the expectation of an answer within minutes, rarely affords the same interior monologue. None of this is to say that digital communication is impoverished relative to letters in every respect — it enables forms of connection, such as constant low-stakes contact across long distances, that letter-writing never could sustain. But it is worth noticing that ease of transmission and depth of reflection may trade off against each other, and that the loss of friction in how we write has quietly reshaped what we choose to say.

Which of the following best expresses the main idea of the passage?

- (A) Digital communication is inferior to handwritten letters in every respect
- (B) The ease of digital communication has changed not just the speed of writing but its depth and character** ☐
- (C) People should return to writing only handwritten letters
- (D) Handwritten letters allowed for constant, low-stakes contact across distances

Correct Answer: (B)

Explanation:

(A) overstates — contradicted by the final acknowledgment of digital's advantages. (C) is a recommendation never made. (D) reverses attribution: constant low-stakes contact is credited to digital communication, not letters.

Q7.

The handwritten letter has become, in the span of a single generation, an object of nostalgia rather than necessity. Where a personal letter once required its writer to commit thought to paper in a single, largely irreversible pass — crossing out errors rather than deleting them, choosing words with the knowledge that revision was costly — digital messages invite a different relationship with language altogether. A text message can be typed, deleted, retyped, and sent in seconds, with none of the friction that once forced deliberation. It would be easy to conclude from this that digital communication has simply made writing faster without changing its character. But something subtler appears to be happening. Because digital messages are cheap to send and expected to arrive instantly, they have shifted toward brevity and immediacy at the expense of the sustained, developed thought that slower correspondence once encouraged. A letter, written with the knowledge that a reply might take weeks, tended to accumulate the writer's reflections over that interval; a text message, written with the expectation of an answer within minutes, rarely affords the same interior monologue. None of this is to say that digital communication is impoverished relative to letters in every respect — it enables forms of connection, such as constant low-stakes contact across long distances, that letter-writing never could sustain. But it is worth noticing that ease of transmission and depth of reflection may trade off against each other, and that the loss of friction in how we write has quietly reshaped what we choose to say.

Q6. Which of the following best expresses the main idea of the passage? (A) Digital communication is inferior to handwritten letters in every respect (B) The ease of digital communication has changed not just the speed of writing but its depth and character (C) People should return to writing only handwritten letters (D) Handwritten letters allowed for constant, low-stakes contact across distances
ANSWER: B EXPLANATION: (A) overstates — contradicted by the final acknowledgment of digital's advantages. (C) is a recommendation never made. (D) reverses attribution: constant low-stakes contact is credited to digital communication, not letters. According to the passage, why did handwritten letters tend to contain more sustained reflection?

- (A) Because letter-writers were better educated
- (B) Because the slower expected reply time gave the writer's reflections time to accumulate** ☐
- (C) Because paper was more expensive than digital devices
- (D) Because handwriting itself improves thinking

Correct Answer: (B)

Explanation:

Directly stated: written "with the knowledge that a reply might take weeks, tended to accumulate the writer's reflections." (A), (C), (D) are unsupported.

Q8.

The handwritten letter has become, in the span of a single generation, an object of nostalgia rather than necessity. Where a personal letter once required its writer to commit thought to paper in a single, largely irreversible pass — crossing out errors rather than deleting them, choosing words with the knowledge that revision was costly — digital messages invite a different relationship with language altogether. A text message can be typed, deleted, retyped, and sent in seconds, with none of the friction that once forced deliberation. It would be easy to conclude from this that digital communication has simply made writing faster without changing its character. But something subtler appears to be happening. Because digital messages are cheap to send and expected to arrive instantly, they have shifted toward brevity and immediacy at the expense of the sustained, developed thought that slower correspondence once encouraged. A letter, written with the knowledge that a reply might take weeks, tended to accumulate the writer's reflections over that interval; a text message, written with the expectation of an answer within minutes, rarely affords the same interior monologue. None of this is to say that digital communication is impoverished relative to letters in every respect — it enables forms of connection, such as constant low-stakes contact across long distances, that letter-writing never could sustain. But it is worth noticing that ease of transmission and depth of reflection may trade off against each other, and that the loss of friction in how we write has quietly reshaped what we choose to say.

Q6. Which of the following best expresses the main idea of the passage? (A) Digital communication is inferior to handwritten letters in every respect (B) The ease of digital communication has changed not just the speed of writing but its depth and character (C) People should return to writing only handwritten letters (D) Handwritten letters allowed for constant, low-stakes contact across distances

ANSWER: B EXPLANATION: (A) overstates — contradicted by the final acknowledgment of digital's advantages. (C) is a recommendation never made. (D) reverses attribution: constant low-stakes contact is credited to digital communication, not letters. Q7. According to the passage, why did handwritten letters tend to contain more sustained reflection? (A) Because letter-writers were better educated (B) Because the slower expected reply time gave the writer's reflections time to accumulate (C) Because paper was more expensive than digital devices (D) Because handwriting itself improves thinking ANSWER: B EXPLANATION: Directly stated: written "with the knowledge that a reply might take weeks, tended to accumulate the writer's reflections." (A), (C), (D) are unsupported. The author's attitude toward digital communication in the passage can best be described as:

(A) Uniformly dismissive

(B) Nostalgic longing for the past with no acknowledgment of present benefits

(C) Balanced, acknowledging both a loss (in reflective depth) and a genuine benefit (in sustained low-stakes contact) ☒

(D) Enthusiastically supportive with no reservations

Correct Answer: (C)

Explanation:

The passage names both a critique (loss of "sustained, developed thought") and a benefit ("enables forms of connection... that letter-writing never could sustain"). (A), (B), (D) each ignore one side.

Q9.

The handwritten letter has become, in the span of a single generation, an object of nostalgia rather than necessity. Where a personal letter once required its writer to commit thought to paper in a single, largely irreversible pass — crossing out errors rather than deleting them, choosing words with the knowledge that revision was costly — digital messages invite a different relationship with language altogether. A text message can be typed, deleted, retyped, and sent in seconds, with none of the friction that once forced deliberation. It would be easy to conclude from this that digital communication

has simply made writing faster without changing its character. But something subtler appears to be happening. Because digital messages are cheap to send and expected to arrive instantly, they have shifted toward brevity and immediacy at the expense of the sustained, developed thought that slower correspondence once encouraged. A letter, written with the knowledge that a reply might take weeks, tended to accumulate the writer's reflections over that interval; a text message, written with the expectation of an answer within minutes, rarely affords the same interior monologue. None of this is to say that digital communication is impoverished relative to letters in every respect — it enables forms of connection, such as constant low-stakes contact across long distances, that letter-writing never could sustain. But it is worth noticing that ease of transmission and depth of reflection may trade off against each other, and that the loss of friction in how we write has quietly reshaped what we choose to say.

Q6. Which of the following best expresses the main idea of the passage? (A) Digital communication is inferior to handwritten letters in every respect (B) The ease of digital communication has changed not just the speed of writing but its depth and character (C) People should return to writing only handwritten letters (D) Handwritten letters allowed for constant, low-stakes contact across distances

ANSWER: B EXPLANATION: (A) overstates — contradicted by the final acknowledgment of digital's advantages. (C) is a recommendation never made. (D) reverses attribution: constant low-stakes contact is credited to digital communication, not letters.

Q7. According to the passage, why did handwritten letters tend to contain more sustained reflection? (A) Because letter-writers were better educated (B) Because the slower expected reply time gave the writer's reflections time to accumulate (C) Because paper was more expensive than digital devices (D) Because handwriting itself improves thinking

ANSWER: B EXPLANATION: Directly stated: written "with the knowledge that a reply might take weeks, tended to accumulate the writer's reflections." (A), (C), (D) are unsupported. Q8. The author's attitude toward digital communication in the passage can best be described as: (A) Uniformly dismissive (B) Nostalgic longing for the past with no acknowledgment of present benefits (C) Balanced, acknowledging both a loss (in reflective depth) and a genuine benefit (in sustained low-stakes contact) (D) Enthusiastically supportive with no reservations

ANSWER: C EXPLANATION: The passage names both a critique (loss of "sustained, developed thought") and a benefit ("enables forms of connection... that letter-writing never could sustain"). (A), (B), (D) each ignore one side. What does the phrase "friction" refer to, as used in the passage?

(A) Physical wear on paper over time

(B) The natural obstacles and cost of revision that slowed down and shaped older forms of writing □

(C) Disagreements between letter-writers and recipients

(D) The literal texture of handwriting on paper

Correct Answer: (B)

Explanation:

Used metaphorically for the effort/cost of revision ("crossing out errors rather than deleting them... none of the friction that once forced deliberation"). (A) and (D) take it too literally; (C) misreads it as conflict.

Q10.

The handwritten letter has become, in the span of a single generation, an object of nostalgia rather than necessity. Where a personal letter once required its writer to commit thought to paper in a single, largely irreversible pass — crossing out errors rather than deleting them, choosing words with the knowledge that revision was costly — digital messages invite a different relationship with language altogether. A text message can be typed, deleted, retyped, and sent in seconds, with none of the friction that once forced deliberation. It would be easy to conclude from this that digital communication has simply made writing faster without changing its character. But something subtler appears to be

happening. Because digital messages are cheap to send and expected to arrive instantly, they have shifted toward brevity and immediacy at the expense of the sustained, developed thought that slower correspondence once encouraged. A letter, written with the knowledge that a reply might take weeks, tended to accumulate the writer's reflections over that interval; a text message, written with the expectation of an answer within minutes, rarely affords the same interior monologue. None of this is to say that digital communication is impoverished relative to letters in every respect — it enables forms of connection, such as constant low-stakes contact across long distances, that letter-writing never could sustain. But it is worth noticing that ease of transmission and depth of reflection may trade off against each other, and that the loss of friction in how we write has quietly reshaped what we choose to say.

Q6. Which of the following best expresses the main idea of the passage? (A) Digital communication is inferior to handwritten letters in every respect (B) The ease of digital communication has changed not just the speed of writing but its depth and character (C) People should return to writing only handwritten letters (D) Handwritten letters allowed for constant, low-stakes contact across distances

ANSWER: B EXPLANATION: (A) overstates — contradicted by the final acknowledgment of digital's advantages. (C) is a recommendation never made. (D) reverses attribution: constant low-stakes contact is credited to digital communication, not letters.

Q7. According to the passage, why did handwritten letters tend to contain more sustained reflection? (A) Because letter-writers were better educated (B) Because the slower expected reply time gave the writer's reflections time to accumulate (C) Because paper was more expensive than digital devices (D) Because handwriting itself improves thinking

ANSWER: B EXPLANATION: Directly stated: written "with the knowledge that a reply might take weeks, tended to accumulate the writer's reflections." (A), (C), (D) are unsupported. Q8. The author's attitude toward digital communication in the passage can best be described as: (A) Uniformly dismissive (B) Nostalgic longing for the past with no acknowledgment of present benefits (C) Balanced, acknowledging both a loss (in reflective depth) and a genuine benefit (in sustained low-stakes contact) (D) Enthusiastically supportive with no reservations

ANSWER: C EXPLANATION: The passage names both a critique (loss of "sustained, developed thought") and a benefit ("enables forms of connection... that letter-writing never could sustain"). (A), (B), (D) each ignore one side. Q9. What does the phrase "friction" refer to, as used in the passage? (A) Physical wear on paper over time (B) The natural obstacles and cost of revision that slowed down and shaped older forms of writing (C) Disagreements between letter-writers and recipients (D) The literal texture of handwriting on paper

ANSWER: B EXPLANATION: Used metaphorically for the effort/cost of revision ("crossing out errors rather than deleting them... none of the friction that once forced deliberation"). (A) and (D) take it too literally; (C) misreads it as conflict. Which of the following, if true, would most directly support the author's central claim?

(A) A study finds that messages sent via slower postal mail, on average, contain significantly more revised and developed argumentation than messages sent via instant messaging apps ☐

(B) A study finds that more people send letters today than a decade ago

(C) A study finds that digital messages are, on average, shorter in character count than a decade ago

(D) A study finds handwriting speed has increased over the past decade

Correct Answer: (A)

Explanation:

Directly tests and supports the causal claim linking slower transmission to more developed thought. (B) and (D) are irrelevant. (C) is weaker and doesn't test "reflection" specifically.

Q11.

For much of the past two decades, renewable energy sources such as solar and wind were criticised as impractical primarily on cost grounds: the electricity they generated, per unit, was simply more

expensive than that produced by coal or natural gas plants. This calculus has shifted dramatically. In many regions, the cost of generating electricity from new solar and wind installations has fallen below that of new coal plants, driven largely by manufacturing scale and technological improvement rather than by subsidy alone. This shift complicates a simple narrative in which renewable energy adoption is understood purely as an environmental or moral choice made at some economic cost. Increasingly, the economic case for renewables stands on its own, independent of climate considerations — a fact that has altered the politics of energy investment in unexpected ways, as utility companies and even fossil-fuel-producing regions have begun adopting renewables for reasons of cost rather than conviction. Yet cost-per-unit is not the whole story. Solar and wind are intermittent — dependent on weather and time of day — in a way that coal and gas plants are not, and integrating large shares of intermittent power into a stable electricity grid requires additional investment in storage and transmission infrastructure that is not always reflected in headline generation-cost figures. Critics of overly optimistic renewable-cost narratives argue that ignoring these integration costs paints an incomplete picture of the true price of a renewables-heavy grid. Which of the following best captures the central tension explored in the passage?

- (A) Whether renewable energy is environmentally beneficial
- (B) Whether headline generation costs alone give a complete picture of the true economic cost of a renewables-heavy electricity system** ☐
- (C) Whether coal plants will be banned in the near future
- (D) Whether utility companies care about the environment

Correct Answer: (B)

Explanation:

The final paragraph frames this directly: "cost-per-unit is not the whole story... ignoring these integration costs paints an incomplete picture." (A), (C), (D) are not the passage's central concern.

Q12.

For much of the past two decades, renewable energy sources such as solar and wind were criticised as impractical primarily on cost grounds: the electricity they generated, per unit, was simply more expensive than that produced by coal or natural gas plants. This calculus has shifted dramatically. In many regions, the cost of generating electricity from new solar and wind installations has fallen below that of new coal plants, driven largely by manufacturing scale and technological improvement rather than by subsidy alone. This shift complicates a simple narrative in which renewable energy adoption is understood purely as an environmental or moral choice made at some economic cost. Increasingly, the economic case for renewables stands on its own, independent of climate considerations — a fact that has altered the politics of energy investment in unexpected ways, as utility companies and even fossil-fuel-producing regions have begun adopting renewables for reasons of cost rather than conviction. Yet cost-per-unit is not the whole story. Solar and wind are intermittent — dependent on weather and time of day — in a way that coal and gas plants are not, and integrating large shares of intermittent power into a stable electricity grid requires additional investment in storage and transmission infrastructure that is not always reflected in headline generation-cost figures. Critics of overly optimistic renewable-cost narratives argue that ignoring these integration costs paints an incomplete picture of the true price of a renewables-heavy grid. Q11. Which of the following best captures the central tension explored in the passage? (A) Whether renewable energy is environmentally beneficial (B) Whether headline generation costs alone give a complete picture of the true economic cost of a renewables-heavy electricity system (C) Whether coal plants will be banned in the near future (D) Whether utility companies care about the environment ANSWER: B EXPLANATION: The final paragraph frames this directly: "cost-per-unit is not the whole story..."

ignoring these integration costs paints an incomplete picture." (A), (C), (D) are not the passage's central concern. According to the passage, what has primarily driven the recent fall in renewable generation costs?

(A) Government subsidies alone

(B) Manufacturing scale and technological improvement ☐

(C) A decline in demand for electricity generally

(D) International trade agreements

Correct Answer: (B)

Explanation:

Directly stated ("driven largely by manufacturing scale and technological improvement rather than by subsidy alone"). (A) is explicitly contradicted. (C), (D) are not mentioned.

Q13.

For much of the past two decades, renewable energy sources such as solar and wind were criticised as impractical primarily on cost grounds: the electricity they generated, per unit, was simply more expensive than that produced by coal or natural gas plants. This calculus has shifted dramatically. In many regions, the cost of generating electricity from new solar and wind installations has fallen below that of new coal plants, driven largely by manufacturing scale and technological improvement rather than by subsidy alone. This shift complicates a simple narrative in which renewable energy adoption is understood purely as an environmental or moral choice made at some economic cost. Increasingly, the economic case for renewables stands on its own, independent of climate considerations — a fact that has altered the politics of energy investment in unexpected ways, as utility companies and even fossil-fuel-producing regions have begun adopting renewables for reasons of cost rather than conviction. Yet cost-per-unit is not the whole story. Solar and wind are intermittent — dependent on weather and time of day — in a way that coal and gas plants are not, and integrating large shares of intermittent power into a stable electricity grid requires additional investment in storage and transmission infrastructure that is not always reflected in headline generation-cost figures. Critics of overly optimistic renewable-cost narratives argue that ignoring these integration costs paints an incomplete picture of the true price of a renewables-heavy grid. Q11. Which of the following best captures the central tension explored in the passage? (A) Whether renewable energy is environmentally beneficial (B) Whether headline generation costs alone give a complete picture of the true economic cost of a renewables-heavy electricity system (C) Whether coal plants will be banned in the near future (D) Whether utility companies care about the environment ANSWER: B

EXPLANATION: The final paragraph frames this directly: "cost-per-unit is not the whole story... ignoring these integration costs paints an incomplete picture." (A), (C), (D) are not the passage's central concern. Q12. According to the passage, what has primarily driven the recent fall in renewable generation costs? (A) Government subsidies alone (B) Manufacturing scale and technological improvement (C) A decline in demand for electricity generally (D) International trade agreements ANSWER: B EXPLANATION: Directly stated ("driven largely by manufacturing scale and technological improvement rather than by subsidy alone"). (A) is explicitly contradicted. (C), (D) are not mentioned. The passage suggests that some regions have adopted renewable energy primarily due to:

(A) International pressure

(B) Cost considerations rather than environmental conviction ☐

(C) A shortage of coal reserves

(D) Legal mandates from courts

Correct Answer: (B)

Explanation:

Directly stated ("adopting renewables for reasons of cost rather than conviction"). (A), (C), (D) are unsupported.

Q14.

For much of the past two decades, renewable energy sources such as solar and wind were criticised as impractical primarily on cost grounds: the electricity they generated, per unit, was simply more expensive than that produced by coal or natural gas plants. This calculus has shifted dramatically. In many regions, the cost of generating electricity from new solar and wind installations has fallen below that of new coal plants, driven largely by manufacturing scale and technological improvement rather than by subsidy alone. This shift complicates a simple narrative in which renewable energy adoption is understood purely as an environmental or moral choice made at some economic cost. Increasingly, the economic case for renewables stands on its own, independent of climate considerations — a fact that has altered the politics of energy investment in unexpected ways, as utility companies and even fossil-fuel-producing regions have begun adopting renewables for reasons of cost rather than conviction. Yet cost-per-unit is not the whole story. Solar and wind are intermittent — dependent on weather and time of day — in a way that coal and gas plants are not, and integrating large shares of intermittent power into a stable electricity grid requires additional investment in storage and transmission infrastructure that is not always reflected in headline generation-cost figures. Critics of overly optimistic renewable-cost narratives argue that ignoring these integration costs paints an incomplete picture of the true price of a renewables-heavy grid. Q11. Which of the following best captures the central tension explored in the passage? (A) Whether renewable energy is environmentally beneficial (B) Whether headline generation costs alone give a complete picture of the true economic cost of a renewables-heavy electricity system (C) Whether coal plants will be banned in the near future (D) Whether utility companies care about the environment ANSWER: B

EXPLANATION: The final paragraph frames this directly: "cost-per-unit is not the whole story... ignoring these integration costs paints an incomplete picture." (A), (C), (D) are not the passage's central concern. Q12. According to the passage, what has primarily driven the recent fall in renewable generation costs? (A) Government subsidies alone (B) Manufacturing scale and technological improvement (C) A decline in demand for electricity generally (D) International trade agreements ANSWER: B EXPLANATION: Directly stated ("driven largely by manufacturing scale and technological improvement rather than by subsidy alone"). (A) is explicitly contradicted. (C), (D) are not mentioned. Q13. The passage suggests that some regions have adopted renewable energy primarily due to: (A) International pressure (B) Cost considerations rather than environmental conviction (C) A shortage of coal reserves (D) Legal mandates from courts ANSWER: B EXPLANATION: Directly stated ("adopting renewables for reasons of cost rather than conviction"). (A), (C), (D) are unsupported. What is the function of the final paragraph in the passage's overall structure?

(A) It fully refutes the claims made in the first two paragraphs

(B) It introduces a complicating factor that qualifies the optimistic account given earlier □

(C) It shifts the topic entirely to climate policy

(D) It provides new statistical data proving renewables are more expensive

Correct Answer: (B)**Explanation:**

The paragraph adds a qualification without reversing earlier claims. (A) overstates this. (C) and (D) misdescribe its content.

Q15.

For much of the past two decades, renewable energy sources such as solar and wind were criticised as impractical primarily on cost grounds: the electricity they generated, per unit, was simply more expensive than that produced by coal or natural gas plants. This calculus has shifted dramatically. In many regions, the cost of generating electricity from new solar and wind installations has fallen below that of new coal plants, driven largely by manufacturing scale and technological improvement rather than by subsidy alone. This shift complicates a simple narrative in which renewable energy adoption is understood purely as an environmental or moral choice made at some economic cost. Increasingly, the economic case for renewables stands on its own, independent of climate considerations — a fact that has altered the politics of energy investment in unexpected ways, as utility companies and even fossil-fuel-producing regions have begun adopting renewables for reasons of cost rather than conviction. Yet cost-per-unit is not the whole story. Solar and wind are intermittent — dependent on weather and time of day — in a way that coal and gas plants are not, and integrating large shares of intermittent power into a stable electricity grid requires additional investment in storage and transmission infrastructure that is not always reflected in headline generation-cost figures. Critics of overly optimistic renewable-cost narratives argue that ignoring these integration costs paints an incomplete picture of the true price of a renewables-heavy grid.

Q11. Which of the following best captures the central tension explored in the passage? (A) Whether renewable energy is environmentally beneficial (B) Whether headline generation costs alone give a complete picture of the true economic cost of a renewables-heavy electricity system (C) Whether coal plants will be banned in the near future (D) Whether utility companies care about the environment ANSWER: B

EXPLANATION: The final paragraph frames this directly: "cost-per-unit is not the whole story... ignoring these integration costs paints an incomplete picture." (A), (C), (D) are not the passage's central concern. Q12. According to the passage, what has primarily driven the recent fall in renewable generation costs? (A) Government subsidies alone (B) Manufacturing scale and technological improvement (C) A decline in demand for electricity generally (D) International trade agreements ANSWER: B

EXPLANATION: Directly stated ("driven largely by manufacturing scale and technological improvement rather than by subsidy alone"). (A) is explicitly contradicted. (C), (D) are not mentioned.

Q13. The passage suggests that some regions have adopted renewable energy primarily due to: (A) International pressure (B) Cost considerations rather than environmental conviction (C) A shortage of coal reserves (D) Legal mandates from courts ANSWER: B

EXPLANATION: Directly stated ("adopting renewables for reasons of cost rather than conviction"). (A), (C), (D) are unsupported. Q14. What is the function of the final paragraph in the passage's overall structure? (A) It fully refutes the claims made in the first two paragraphs (B) It introduces a complicating factor that qualifies the optimistic account given earlier (C) It shifts the topic entirely to climate policy (D) It provides new statistical data proving renewables are more expensive ANSWER: B

EXPLANATION: The paragraph adds a qualification without reversing earlier claims. (A) overstates this. (C) and (D) misdescribe its content. Which of the following, if true, would most strengthen the critics' position mentioned in the final paragraph?

(A) A detailed grid-integration study finds that once storage and transmission costs are included, total system costs for a renewables-heavy grid are comparable to or higher than a conventional grid in several regions □

(B) Solar panel manufacturing costs have continued to fall

(C) Public opinion increasingly favours renewable energy

(D) More countries have signed international climate agreements

Correct Answer: (A)

Explanation:

Directly substantiates the specific claim about underrepresented integration costs. (B), (C), (D) do not address that critique.

Q16.

Satire occupies an uneasy position among literary forms: it depends for its effect on being taken seriously enough to sting, while simultaneously being recognised as not literally meant. A satirical proposal — however outrageous on its surface — only succeeds if the audience understands both that it is not a genuine policy suggestion and that it nonetheless points at something true about the folly or cruelty it exaggerates. When either half of this understanding fails, satire collapses: taken too literally, it is mistaken for a sincere and often repugnant proposal; recognised as mere joke without the underlying critique landing, it becomes empty absurdity, amusing perhaps, but toothless. This dual requirement explains why satire ages unevenly. A satirical work aimed at a specific, well-known target — a particular politician's rhetoric, a specific policy debate — can lose its force once its audience no longer recognises the target, even if the underlying human folly it critiques (vanity, hypocrisy, cruelty dressed as virtue) remains timeless. Readers centuries removed from the original controversy may need extensive footnotes to recover the joke's referent, by which point much of its original sting has necessarily dulled. This is not a flaw unique to satire; all topical humor depends on shared context between writer and audience. But satire's dependence on a precise, dual recognition — the surface absurdity and the buried truth — makes the form especially fragile across time, even as its best examples continue to be read for other reasons: their prose style, their construction, or the historical window they offer onto the concerns of their age. According to the passage, what are the two conditions necessary for satire to succeed?

- (A) The audience must find it funny and the author must be well-known
- (B) The audience must recognise it is not a literal proposal, and must also grasp the underlying truth it points to** ☐
- (C) The work must be published in a respected journal and reviewed positively
- (D) The satire must target only political figures

Correct Answer: (B)

Explanation:

Directly stated as the "dual requirement." (A), (C), (D) are not stated conditions.

Q17.

Satire occupies an uneasy position among literary forms: it depends for its effect on being taken seriously enough to sting, while simultaneously being recognised as not literally meant. A satirical proposal — however outrageous on its surface — only succeeds if the audience understands both that it is not a genuine policy suggestion and that it nonetheless points at something true about the folly or cruelty it exaggerates. When either half of this understanding fails, satire collapses: taken too literally, it is mistaken for a sincere and often repugnant proposal; recognised as mere joke without the underlying critique landing, it becomes empty absurdity, amusing perhaps, but toothless. This dual requirement explains why satire ages unevenly. A satirical work aimed at a specific, well-known target — a particular politician's rhetoric, a specific policy debate — can lose its force once its audience no longer recognises the target, even if the underlying human folly it critiques (vanity, hypocrisy, cruelty dressed as virtue) remains timeless. Readers centuries removed from the original controversy may need extensive footnotes to recover the joke's referent, by which point much of its original sting has necessarily dulled. This is not a flaw unique to satire; all topical humor depends on shared context between writer and audience. But satire's dependence on a precise, dual recognition — the surface absurdity and the buried truth — makes the form especially fragile across time, even as its best examples continue to be read for other reasons: their prose style, their construction, or the historical window they offer onto the concerns of their age. Q16. According to the passage, what are the two conditions necessary for satire to succeed? (A) The audience must find it funny and the author must be

well-known (B) The audience must recognise it is not a literal proposal, and must also grasp the underlying truth it points to (C) The work must be published in a respected journal and reviewed positively (D) The satire must target only political figures ANSWER: B EXPLANATION: Directly stated as the "dual requirement." (A), (C), (D) are not stated conditions. Why, according to the passage, does topical satire tend to lose force over time?

(A) Because language itself becomes harder to understand with age

(B) Because audiences centuries later may no longer recognise the specific target being satirised, even if the underlying human folly remains relevant ☐

(C) Because printing technology has changed

(D) Because satire is inherently a lesser literary form

Correct Answer: (B)

Explanation:

Supported by the discussion of needing "extensive footnotes to recover the joke's referent." (A), (C), (D) are unsupported.

Q18.

Satire occupies an uneasy position among literary forms: it depends for its effect on being taken seriously enough to sting, while simultaneously being recognised as not literally meant. A satirical proposal — however outrageous on its surface — only succeeds if the audience understands both that it is not a genuine policy suggestion and that it nonetheless points at something true about the folly or cruelty it exaggerates. When either half of this understanding fails, satire collapses: taken too literally, it is mistaken for a sincere and often repugnant proposal; recognised as mere joke without the underlying critique landing, it becomes empty absurdity, amusing perhaps, but toothless. This dual requirement explains why satire ages unevenly. A satirical work aimed at a specific, well-known target — a particular politician's rhetoric, a specific policy debate — can lose its force once its audience no longer recognises the target, even if the underlying human folly it critiques (vanity, hypocrisy, cruelty dressed as virtue) remains timeless. Readers centuries removed from the original controversy may need extensive footnotes to recover the joke's referent, by which point much of its original sting has necessarily dulled. This is not a flaw unique to satire; all topical humor depends on shared context between writer and audience. But satire's dependence on a precise, dual recognition — the surface absurdity and the buried truth — makes the form especially fragile across time, even as its best examples continue to be read for other reasons: their prose style, their construction, or the historical window they offer onto the concerns of their age. Q16. According to the passage, what are the two conditions necessary for satire to succeed? (A) The audience must find it funny and the author must be well-known (B) The audience must recognise it is not a literal proposal, and must also grasp the underlying truth it points to (C) The work must be published in a respected journal and reviewed positively (D) The satire must target only political figures ANSWER: B EXPLANATION: Directly stated as the "dual requirement." (A), (C), (D) are not stated conditions. Q17. Why, according to the passage, does topical satire tend to lose force over time? (A) Because language itself becomes harder to understand with age (B) Because audiences centuries later may no longer recognise the specific target being satirised, even if the underlying human folly remains relevant (C) Because printing technology has changed (D) Because satire is inherently a lesser literary form ANSWER: B EXPLANATION: Supported by the discussion of needing "extensive footnotes to recover the joke's referent." (A), (C), (D) are unsupported. The passage suggests that satire which is "recognised as mere joke without the underlying critique landing" becomes:

(A) More effective than intended

(B) Empty absurdity that is amusing but lacks force □

(C) Indistinguishable from a sincere proposal

(D) Immediately forgotten by all readers

Correct Answer: (B)

Explanation:

Directly quoted ("empty absurdity, amusing perhaps, but toothless"). (A) is the opposite. (C) describes the other failure mode. (D) is unsupported.

Q19.

Satire occupies an uneasy position among literary forms: it depends for its effect on being taken seriously enough to sting, while simultaneously being recognised as not literally meant. A satirical proposal — however outrageous on its surface — only succeeds if the audience understands both that it is not a genuine policy suggestion and that it nonetheless points at something true about the folly or cruelty it exaggerates. When either half of this understanding fails, satire collapses: taken too literally, it is mistaken for a sincere and often repugnant proposal; recognised as mere joke without the underlying critique landing, it becomes empty absurdity, amusing perhaps, but toothless. This dual requirement explains why satire ages unevenly. A satirical work aimed at a specific, well-known target — a particular politician's rhetoric, a specific policy debate — can lose its force once its audience no longer recognises the target, even if the underlying human folly it critiques (vanity, hypocrisy, cruelty dressed as virtue) remains timeless. Readers centuries removed from the original controversy may need extensive footnotes to recover the joke's referent, by which point much of its original sting has necessarily dulled. This is not a flaw unique to satire; all topical humor depends on shared context between writer and audience. But satire's dependence on a precise, dual recognition — the surface absurdity and the buried truth — makes the form especially fragile across time, even as its best examples continue to be read for other reasons: their prose style, their construction, or the historical window they offer onto the concerns of their age. Q16. According to the passage, what are the two conditions necessary for satire to succeed? (A) The audience must find it funny and the author must be well-known (B) The audience must recognise it is not a literal proposal, and must also grasp the underlying truth it points to (C) The work must be published in a respected journal and reviewed positively (D) The satire must target only political figures ANSWER: B EXPLANATION: Directly stated as the "dual requirement." (A), (C), (D) are not stated conditions. Q17. Why, according to the passage, does topical satire tend to lose force over time? (A) Because language itself becomes harder to understand with age (B) Because audiences centuries later may no longer recognise the specific target being satirised, even if the underlying human folly remains relevant (C) Because printing technology has changed (D) Because satire is inherently a lesser literary form ANSWER: B EXPLANATION: Supported by the discussion of needing "extensive footnotes to recover the joke's referent." (A), (C), (D) are unsupported. Q18. The passage suggests that satire which is "recognised as mere joke without the underlying critique landing" becomes: (A) More effective than intended (B) Empty absurdity that is amusing but lacks force (C) Indistinguishable from a sincere proposal (D) Immediately forgotten by all readers ANSWER: B EXPLANATION: Directly quoted ("empty absurdity, amusing perhaps, but toothless"). (A) is the opposite. (C) describes the other failure mode. (D) is unsupported. What is the relationship between satire and general topical humor, according to the final paragraph?

(A) Satire is entirely unrelated to topical humor

(B) Satire shares the general fragility of topical humor across time, but is especially fragile due to its additional dual-recognition requirement □

(C) Satire is more durable than any other form of humor

(D) Topical humor is a subset of satire

Correct Answer: (B)

Explanation:

Directly supported ("not a flaw unique to satire... makes the form especially fragile"). (A), (C), (D) misstate this relationship.

Q20.

Satire occupies an uneasy position among literary forms: it depends for its effect on being taken seriously enough to sting, while simultaneously being recognised as not literally meant. A satirical proposal — however outrageous on its surface — only succeeds if the audience understands both that it is not a genuine policy suggestion and that it nonetheless points at something true about the folly or cruelty it exaggerates. When either half of this understanding fails, satire collapses: taken too literally, it is mistaken for a sincere and often repugnant proposal; recognised as mere joke without the underlying critique landing, it becomes empty absurdity, amusing perhaps, but toothless. This dual requirement explains why satire ages unevenly. A satirical work aimed at a specific, well-known target — a particular politician's rhetoric, a specific policy debate — can lose its force once its audience no longer recognises the target, even if the underlying human folly it critiques (vanity, hypocrisy, cruelty dressed as virtue) remains timeless. Readers centuries removed from the original controversy may need extensive footnotes to recover the joke's referent, by which point much of its original sting has necessarily dulled. This is not a flaw unique to satire; all topical humor depends on shared context between writer and audience. But satire's dependence on a precise, dual recognition — the surface absurdity and the buried truth — makes the form especially fragile across time, even as its best examples continue to be read for other reasons: their prose style, their construction, or the historical window they offer onto the concerns of their age.

Q16. According to the passage, what are the two conditions necessary for satire to succeed? (A) The audience must find it funny and the author must be well-known (B) The audience must recognise it is not a literal proposal, and must also grasp the underlying truth it points to (C) The work must be published in a respected journal and reviewed positively (D) The satire must target only political figures ANSWER: B EXPLANATION: Directly stated as the "dual requirement." (A), (C), (D) are not stated conditions.

Q17. Why, according to the passage, does topical satire tend to lose force over time? (A) Because language itself becomes harder to understand with age (B) Because audiences centuries later may no longer recognise the specific target being satirised, even if the underlying human folly remains relevant (C) Because printing technology has changed (D) Because satire is inherently a lesser literary form ANSWER: B EXPLANATION: Supported by the discussion of needing "extensive footnotes to recover the joke's referent." (A), (C), (D) are unsupported.

Q18. The passage suggests that satire which is "recognised as mere joke without the underlying critique landing" becomes: (A) More effective than intended (B) Empty absurdity that is amusing but lacks force (C) Indistinguishable from a sincere proposal (D) Immediately forgotten by all readers ANSWER: B EXPLANATION: Directly quoted ("empty absurdity, amusing perhaps, but toothless"). (A) is the opposite. (C) describes the other failure mode. (D) is unsupported.

Q19. What is the relationship between satire and general topical humor, according to the final paragraph? (A) Satire is entirely unrelated to topical humor (B) Satire shares the general fragility of topical humor across time, but is especially fragile due to its additional dual-recognition requirement (C) Satire is more durable than any other form of humor (D) Topical humor is a subset of satire ANSWER: B EXPLANATION: Directly supported ("not a flaw unique to satire... makes the form especially fragile"). (A), (C), (D) misstate this relationship.

Which of the following examples would the passage's argument best predict to be true?

(A) A satirical essay mocking a now-obscure 18th-century tax policy is, today, primarily studied for its prose style rather than for its original comic sting □

- (B) A satirical essay about a timeless human folly will always be immediately understood by all future readers without any context
- (C) All satire eventually becomes completely unreadable
- (D) Satire targeting well-known figures is always funnier than satire targeting policies

Correct Answer: (A)

Explanation:

Matches the passage's prediction for topical satire whose target has faded ("continue to be read for other reasons: their prose style"). (B) contradicts the need for shared context. (C) and (D) overstate claims the passage never makes.

Q21.

The shift toward remote work, accelerated by necessity rather than by design, has produced a body of evidence that resists a simple verdict. Early surveys suggested employees were, by self-report, more productive working from home — free of commute time and office interruptions. Yet more granular studies, tracking actual output rather than self-reported perception, have painted a more mixed picture: individual, focused tasks often benefit from the quiet of home, while collaborative, creative work that depends on spontaneous exchange between colleagues appears to suffer measurably when conducted entirely through scheduled video calls. The distinction matters for how organisations should think about remote work, because it suggests the debate has often been framed at the wrong level of granularity. Asking whether remote work is "more productive" than office work treats productivity as a single, uniform quantity, when the evidence suggests its effects vary by task type. A software engineer debugging code alone may lose nothing, and gain considerable focus, by working from home; a product team attempting to generate a genuinely novel idea through collaborative brainstorming may lose something that scheduled video calls, however well-run, do not fully replace. This suggests that the most useful organisational question is not "remote or office?" but rather which specific activities benefit from which specific arrangement — a more demanding question to answer, but one considerably closer to what the evidence actually supports. What is the main argument of the passage?

- (A) Remote work is unambiguously more productive than office work
- (B) The productivity effects of remote work vary by task type, making a single verdict on remote work as a whole misleading** □
- (C) Office work should be abolished entirely
- (D) Self-reported productivity surveys are always reliable

Correct Answer: (B)

Explanation:

Directly stated as the passage's core claim. (A) and (C) overstate. (D) is contradicted by the passage's preference for granular studies over self-report.

Q22.

The shift toward remote work, accelerated by necessity rather than by design, has produced a body of evidence that resists a simple verdict. Early surveys suggested employees were, by self-report, more productive working from home — free of commute time and office interruptions. Yet more granular studies, tracking actual output rather than self-reported perception, have painted a more mixed picture: individual, focused tasks often benefit from the quiet of home, while collaborative, creative work that

depends on spontaneous exchange between colleagues appears to suffer measurably when conducted entirely through scheduled video calls. The distinction matters for how organisations should think about remote work, because it suggests the debate has often been framed at the wrong level of granularity. Asking whether remote work is "more productive" than office work treats productivity as a single, uniform quantity, when the evidence suggests its effects vary by task type. A software engineer debugging code alone may lose nothing, and gain considerable focus, by working from home; a product team attempting to generate a genuinely novel idea through collaborative brainstorming may lose something that scheduled video calls, however well-run, do not fully replace. This suggests that the most useful organisational question is not "remote or office?" but rather which specific activities benefit from which specific arrangement — a more demanding question to answer, but one considerably closer to what the evidence actually supports. Q21. What is the main argument of the passage? (A) Remote work is unambiguously more productive than office work (B) The productivity effects of remote work vary by task type, making a single verdict on remote work as a whole misleading (C) Office work should be abolished entirely (D) Self-reported productivity surveys are always reliable ANSWER: B EXPLANATION: Directly stated as the passage's core claim. (A) and (C) overstate. (D) is contradicted by the passage's preference for granular studies over self-report. According to the passage, what type of work tends to suffer when conducted entirely remotely?

(A) Individual, focused tasks

(B) Collaborative, creative work depending on spontaneous exchange ☒

(C) Any task done using a computer

(D) Tasks performed by senior employees only

Correct Answer: (B)

Explanation:

Directly stated. (A) is the opposite (individual tasks tend to benefit). (C), (D) are unsupported.

Q23.

The shift toward remote work, accelerated by necessity rather than by design, has produced a body of evidence that resists a simple verdict. Early surveys suggested employees were, by self-report, more productive working from home — free of commute time and office interruptions. Yet more granular studies, tracking actual output rather than self-reported perception, have painted a more mixed picture: individual, focused tasks often benefit from the quiet of home, while collaborative, creative work that depends on spontaneous exchange between colleagues appears to suffer measurably when conducted entirely through scheduled video calls. The distinction matters for how organisations should think about remote work, because it suggests the debate has often been framed at the wrong level of granularity. Asking whether remote work is "more productive" than office work treats productivity as a single, uniform quantity, when the evidence suggests its effects vary by task type. A software engineer debugging code alone may lose nothing, and gain considerable focus, by working from home; a product team attempting to generate a genuinely novel idea through collaborative brainstorming may lose something that scheduled video calls, however well-run, do not fully replace. This suggests that the most useful organisational question is not "remote or office?" but rather which specific activities benefit from which specific arrangement — a more demanding question to answer, but one considerably closer to what the evidence actually supports. Q21. What is the main argument of the passage? (A) Remote work is unambiguously more productive than office work (B) The productivity effects of remote work vary by task type, making a single verdict on remote work as a whole misleading (C) Office work should be abolished entirely (D) Self-reported productivity surveys are always reliable ANSWER: B EXPLANATION: Directly stated as the passage's core claim. (A) and (C) overstate. (D) is contradicted by the passage's preference for granular studies over self-report. Q22.

According to the passage, what type of work tends to suffer when conducted entirely remotely? (A) Individual, focused tasks (B) Collaborative, creative work depending on spontaneous exchange (C) Any task done using a computer (D) Tasks performed by senior employees only ANSWER: B EXPLANATION: Directly stated. (A) is the opposite (individual tasks tend to benefit). (C), (D) are unsupported. The passage suggests that early surveys showing higher self-reported productivity were:

(A) Completely fabricated

(B) Potentially incomplete, since more granular studies revealed a more mixed, task-dependent picture □

(C) The final and most reliable word on the subject

(D) Focused exclusively on collaborative work

Correct Answer: (B)

Explanation:

The passage frames early surveys as an initial finding later complicated by granular research. (A) overstates. (C) contradicts the passage's preference for later findings. (D) is inaccurate.

Q24.

The shift toward remote work, accelerated by necessity rather than by design, has produced a body of evidence that resists a simple verdict. Early surveys suggested employees were, by self-report, more productive working from home — free of commute time and office interruptions. Yet more granular studies, tracking actual output rather than self-reported perception, have painted a more mixed picture: individual, focused tasks often benefit from the quiet of home, while collaborative, creative work that depends on spontaneous exchange between colleagues appears to suffer measurably when conducted entirely through scheduled video calls. The distinction matters for how organisations should think about remote work, because it suggests the debate has often been framed at the wrong level of granularity. Asking whether remote work is "more productive" than office work treats productivity as a single, uniform quantity, when the evidence suggests its effects vary by task type. A software engineer debugging code alone may lose nothing, and gain considerable focus, by working from home; a product team attempting to generate a genuinely novel idea through collaborative brainstorming may lose something that scheduled video calls, however well-run, do not fully replace. This suggests that the most useful organisational question is not "remote or office?" but rather which specific activities benefit from which specific arrangement — a more demanding question to answer, but one considerably closer to what the evidence actually supports. Q21. What is the main argument of the passage? (A) Remote work is unambiguously more productive than office work (B) The productivity effects of remote work vary by task type, making a single verdict on remote work as a whole misleading (C) Office work should be abolished entirely (D) Self-reported productivity surveys are always reliable ANSWER: B EXPLANATION: Directly stated as the passage's core claim. (A) and (C) overstate. (D) is contradicted by the passage's preference for granular studies over self-report. Q22. According to the passage, what type of work tends to suffer when conducted entirely remotely? (A) Individual, focused tasks (B) Collaborative, creative work depending on spontaneous exchange (C) Any task done using a computer (D) Tasks performed by senior employees only ANSWER: B EXPLANATION: Directly stated. (A) is the opposite (individual tasks tend to benefit). (C), (D) are unsupported. Q23. The passage suggests that early surveys showing higher self-reported productivity were: (A) Completely fabricated (B) Potentially incomplete, since more granular studies revealed a more mixed, task-dependent picture (C) The final and most reliable word on the subject (D) Focused exclusively on collaborative work ANSWER: B EXPLANATION: The passage frames early surveys as an initial finding later complicated by granular research. (A) overstates. (C) contradicts the passage's preference for later findings. (D) is inaccurate. What does the author ultimately recommend

organisations focus on?

(A) Whether to be remote or office-based as a single blanket policy

(B) Determining which specific activities benefit from which specific work arrangement ☐

(C) Eliminating collaborative work entirely

(D) Relying solely on employee self-reports of productivity

Correct Answer: (B)

Explanation:

Directly stated in the final sentence. (A) is what the author argues against. (C), (D) are unsupported.

Current Affairs & General Knowledge

Q1.

In July 2024, India's three major colonial-era criminal law statutes — the Indian Penal Code (1860), the Code of Criminal Procedure (1973), and the Indian Evidence Act (1872) — were replaced by three new laws: the Bharatiya Nyaya Sanhita (BNS), the Bharatiya Nagarik Suraksha Sanhita (BNSS), and the Bharatiya Sakshya Adhinyam (BSA), respectively. The stated objective was to shift the underlying philosophy of criminal law from "punishment" to "justice," and to modernise procedure by formally recognising electronic and digital evidence, and by introducing statutory timelines for police and court action at various stages of a criminal case. Which of the following Acts was replaced by the Bharatiya Nyaya Sanhita?

- (A) The Code of Criminal Procedure, 1973
- (B) The Indian Evidence Act, 1872
- (C) The Indian Penal Code, 1860** ☒
- (D) The Indian Contract Act, 1872

Correct Answer: (C)

Explanation:

The passage explicitly pairs the IPC with the BNS. (A) was replaced by the BNSS, (B) by the BSA. (D) is unrelated.

Q2.

In July 2024, India's three major colonial-era criminal law statutes — the Indian Penal Code (1860), the Code of Criminal Procedure (1973), and the Indian Evidence Act (1872) — were replaced by three new laws: the Bharatiya Nyaya Sanhita (BNS), the Bharatiya Nagarik Suraksha Sanhita (BNSS), and the Bharatiya Sakshya Adhinyam (BSA), respectively. The stated objective was to shift the underlying philosophy of criminal law from "punishment" to "justice," and to modernise procedure by formally recognising electronic and digital evidence, and by introducing statutory timelines for police and court action at various stages of a criminal case. Q25. Which of the following Acts was replaced by the Bharatiya Nyaya Sanhita? (A) The Code of Criminal Procedure, 1973 (B) The Indian Evidence Act, 1872 (C) The Indian Penal Code, 1860 (D) The Indian Contract Act, 1872 ANSWER: C EXPLANATION: The passage explicitly pairs the IPC with the BNS. (A) was replaced by the BNSS, (B) by the BSA. (D) is unrelated. The Bharatiya Sakshya Adhinyam replaced which earlier law?

- (A) Indian Penal Code, 1860
- (B) Code of Criminal Procedure, 1973
- (C) Indian Evidence Act, 1872** ☒
- (D) Indian Succession Act, 1925

Correct Answer: (C)

Explanation:

Directly stated. (A) and (B) correspond to different replacements. (D) is not mentioned.

Q3.

In July 2024, India's three major colonial-era criminal law statutes — the Indian Penal Code (1860), the Code of Criminal Procedure (1973), and the Indian Evidence Act (1872) — were replaced by three new laws: the Bharatiya Nyaya Sanhita (BNS), the Bharatiya Nagarik Suraksha Sanhita (BNSS), and

the Bharatiya Sakshya Adhiniyam (BSA), respectively. The stated objective was to shift the underlying philosophy of criminal law from "punishment" to "justice," and to modernise procedure by formally recognising electronic and digital evidence, and by introducing statutory timelines for police and court action at various stages of a criminal case. Q25. Which of the following Acts was replaced by the Bharatiya Nyaya Sanhita? (A) The Code of Criminal Procedure, 1973 (B) The Indian Evidence Act, 1872 (C) The Indian Penal Code, 1860 (D) The Indian Contract Act, 1872 ANSWER: C EXPLANATION: The passage explicitly pairs the IPC with the BNS. (A) was replaced by the BNSS, (B) by the BSA. (D) is unrelated. Q26. The Bharatiya Sakshya Adhiniyam replaced which earlier law? (A) Indian Penal Code, 1860 (B) Code of Criminal Procedure, 1973 (C) Indian Evidence Act, 1872 (D) Indian Succession Act, 1925 ANSWER: C EXPLANATION: Directly stated. (A) and (B) correspond to different replacements. (D) is not mentioned. As per the passage, what was one stated procedural change introduced by the new framework?

(A) Abolition of all criminal appeals

(B) Formal recognition of electronic and digital evidence ☒

(C) Removal of the right to bail

(D) Elimination of jury trials

Correct Answer: (B)

Explanation:

Directly stated. None of (A), (C), (D) are mentioned; (D) is also factually inconsistent with India's post-1960s legal system.

Q4.

In July 2024, India's three major colonial-era criminal law statutes — the Indian Penal Code (1860), the Code of Criminal Procedure (1973), and the Indian Evidence Act (1872) — were replaced by three new laws: the Bharatiya Nyaya Sanhita (BNS), the Bharatiya Nagarik Suraksha Sanhita (BNSS), and the Bharatiya Sakshya Adhiniyam (BSA), respectively. The stated objective was to shift the underlying philosophy of criminal law from "punishment" to "justice," and to modernise procedure by formally recognising electronic and digital evidence, and by introducing statutory timelines for police and court action at various stages of a criminal case. Q25. Which of the following Acts was replaced by the Bharatiya Nyaya Sanhita? (A) The Code of Criminal Procedure, 1973 (B) The Indian Evidence Act, 1872 (C) The Indian Penal Code, 1860 (D) The Indian Contract Act, 1872 ANSWER: C EXPLANATION: The passage explicitly pairs the IPC with the BNS. (A) was replaced by the BNSS, (B) by the BSA. (D) is unrelated. Q26. The Bharatiya Sakshya Adhiniyam replaced which earlier law? (A) Indian Penal Code, 1860 (B) Code of Criminal Procedure, 1973 (C) Indian Evidence Act, 1872 (D) Indian Succession Act, 1925 ANSWER: C EXPLANATION: Directly stated. (A) and (B) correspond to different replacements. (D) is not mentioned. Q27. As per the passage, what was one stated procedural change introduced by the new framework? (A) Abolition of all criminal appeals (B) Formal recognition of electronic and digital evidence (C) Removal of the right to bail (D) Elimination of jury trials ANSWER: B EXPLANATION: Directly stated. None of (A), (C), (D) are mentioned; (D) is also factually inconsistent with India's post-1960s legal system. In what month and year did the new criminal law statutes come into effect, per the passage?

(A) January 2023

(B) July 2024 ☒

(C) August 2025

(D) March 2024

Correct Answer: (B)

Explanation:

Directly stated. Other options are unsupported.

Q5.

In July 2024, India's three major colonial-era criminal law statutes — the Indian Penal Code (1860), the Code of Criminal Procedure (1973), and the Indian Evidence Act (1872) — were replaced by three new laws: the Bharatiya Nyaya Sanhita (BNS), the Bharatiya Nagarik Suraksha Sanhita (BNSS), and the Bharatiya Sakshya Adhiniyam (BSA), respectively. The stated objective was to shift the underlying philosophy of criminal law from "punishment" to "justice," and to modernise procedure by formally recognising electronic and digital evidence, and by introducing statutory timelines for police and court action at various stages of a criminal case. Q25. Which of the following Acts was replaced by the Bharatiya Nyaya Sanhita? (A) The Code of Criminal Procedure, 1973 (B) The Indian Evidence Act, 1872 (C) The Indian Penal Code, 1860 (D) The Indian Contract Act, 1872 ANSWER: C

EXPLANATION: The passage explicitly pairs the IPC with the BNS. (A) was replaced by the BNSS, (B) by the BSA. (D) is unrelated. Q26. The Bharatiya Sakshya Adhiniyam replaced which earlier law? (A) Indian Penal Code, 1860 (B) Code of Criminal Procedure, 1973 (C) Indian Evidence Act, 1872 (D) Indian Succession Act, 1925 ANSWER: C EXPLANATION: Directly stated. (A) and (B) correspond to different replacements. (D) is not mentioned. Q27. As per the passage, what was one stated procedural change introduced by the new framework? (A) Abolition of all criminal appeals (B) Formal recognition of electronic and digital evidence (C) Removal of the right to bail (D) Elimination of jury trials ANSWER: B EXPLANATION: Directly stated. None of (A), (C), (D) are mentioned; (D) is also factually inconsistent with India's post-1960s legal system. Q28. In what month and year did the new criminal law statutes come into effect, per the passage? (A) January 2023 (B) July 2024 (C) August 2025 (D) March 2024 ANSWER: B EXPLANATION: Directly stated. Other options are unsupported. Based on the passage, the stated philosophical shift behind the new laws was from:

- (A) Justice to punishment
- (B) Colonial law to common law
- (C) Punishment to justice** ☒
- (D) Civil law to criminal law

Correct Answer: (C)**Explanation:**

Directly stated ("from 'punishment' to 'justice'"). (A) reverses it. (B), (D) describe shifts not mentioned.

Q6.

India held the G20 presidency from December 1, 2022, to November 30, 2023, culminating in the New Delhi Summit held in September 2023. The presidency's theme was "Vasudhaiva Kutumbakam — One Earth One Family One Future." Among the notable outcomes was the admission of the African Union as a permanent member of the G20, expanding the grouping's membership. The New Delhi Leaders' Declaration was adopted by consensus among member nations at the summit. During which period did India hold the G20 presidency?

- (A) December 2022 to November 2023** ☒
- (B) January 2023 to December 2023
- (C) December 2021 to November 2022
- (D) June 2023 to June 2024

Correct Answer: (A)

Explanation:

Directly stated in the passage.

Q7.

India held the G20 presidency from December 1, 2022, to November 30, 2023, culminating in the New Delhi Summit held in September 2023. The presidency's theme was "Vasudhaiva Kutumbakam — One Earth One Family One Future." Among the notable outcomes was the admission of the African Union as a permanent member of the G20, expanding the grouping's membership. The New Delhi Leaders' Declaration was adopted by consensus among member nations at the summit. Q30. During which period did India hold the G20 presidency? (A) December 2022 to November 2023 (B) January 2023 to December 2023 (C) December 2021 to November 2022 (D) June 2023 to June 2024

ANSWER: A EXPLANATION: Directly stated in the passage. What was the theme of India's G20 presidency?

(A) "Atmanirbhar Bharat"

(B) "Vasudhaiva Kutumbakam — One Earth One Family One Future" ☒

(C) "Sabka Saath Sabka Vikas"

(D) "Digital India for All"

Correct Answer: (B)**Explanation:**

Directly stated; the other phrases are real but unrelated slogans not mentioned as the G20 theme in the passage.

Q8.

India held the G20 presidency from December 1, 2022, to November 30, 2023, culminating in the New Delhi Summit held in September 2023. The presidency's theme was "Vasudhaiva Kutumbakam — One Earth One Family One Future." Among the notable outcomes was the admission of the African Union as a permanent member of the G20, expanding the grouping's membership. The New Delhi Leaders' Declaration was adopted by consensus among member nations at the summit. Q30. During which period did India hold the G20 presidency? (A) December 2022 to November 2023 (B) January 2023 to December 2023 (C) December 2021 to November 2022 (D) June 2023 to June 2024

ANSWER: A EXPLANATION: Directly stated in the passage. Q31. What was the theme of India's G20 presidency? (A) "Atmanirbhar Bharat" (B) "Vasudhaiva Kutumbakam — One Earth One Family One Future" (C) "Sabka Saath Sabka Vikas" (D) "Digital India for All" ANSWER: B EXPLANATION: Directly stated; the other phrases are real but unrelated slogans not mentioned as the G20 theme in the passage. Which organisation was admitted as a permanent member of the G20 during India's presidency?

(A) The European Union

(B) The United Nations

(C) The African Union ☒

(D) ASEAN

Correct Answer: (C)**Explanation:**

Directly stated. (A) is a plausible distractor (the EU is a separate long-standing G20 member) but the passage specifically names the African Union as the new admission.

Q9.

India held the G20 presidency from December 1, 2022, to November 30, 2023, culminating in the New Delhi Summit held in September 2023. The presidency's theme was "Vasudhaiva Kutumbakam — One Earth One Family One Future." Among the notable outcomes was the admission of the African Union as a permanent member of the G20, expanding the grouping's membership. The New Delhi Leaders' Declaration was adopted by consensus among member nations at the summit. Q30. During which period did India hold the G20 presidency? (A) December 2022 to November 2023 (B) January 2023 to December 2023 (C) December 2021 to November 2022 (D) June 2023 to June 2024

ANSWER: A EXPLANATION: Directly stated in the passage. Q31. What was the theme of India's G20 presidency? (A) "Atmanirbhar Bharat" (B) "Vasudhaiva Kutumbakam — One Earth One Family One Future" (C) "Sabka Saath Sabka Vikas" (D) "Digital India for All" ANSWER: B EXPLANATION: Directly stated; the other phrases are real but unrelated slogans not mentioned as the G20 theme in the passage. Q32. Which organisation was admitted as a permanent member of the G20 during India's presidency? (A) The European Union (B) The United Nations (C) The African Union (D) ASEAN ANSWER: C EXPLANATION: Directly stated. (A) is a plausible distractor (the EU is a separate long-standing G20 member) but the passage specifically names the African Union as the new admission. Where was the G20 Summit held during India's presidency?

(A) Mumbai

(B) New Delhi ☒

(C) Bengaluru

(D) Jaipur

Correct Answer: (B)

Explanation:

Directly stated.

Q10.

India held the G20 presidency from December 1, 2022, to November 30, 2023, culminating in the New Delhi Summit held in September 2023. The presidency's theme was "Vasudhaiva Kutumbakam — One Earth One Family One Future." Among the notable outcomes was the admission of the African Union as a permanent member of the G20, expanding the grouping's membership. The New Delhi Leaders' Declaration was adopted by consensus among member nations at the summit. Q30. During which period did India hold the G20 presidency? (A) December 2022 to November 2023 (B) January 2023 to December 2023 (C) December 2021 to November 2022 (D) June 2023 to June 2024

ANSWER: A EXPLANATION: Directly stated in the passage. Q31. What was the theme of India's G20 presidency? (A) "Atmanirbhar Bharat" (B) "Vasudhaiva Kutumbakam — One Earth One Family One Future" (C) "Sabka Saath Sabka Vikas" (D) "Digital India for All" ANSWER: B EXPLANATION: Directly stated; the other phrases are real but unrelated slogans not mentioned as the G20 theme in the passage. Q32. Which organisation was admitted as a permanent member of the G20 during India's presidency? (A) The European Union (B) The United Nations (C) The African Union (D) ASEAN ANSWER: C EXPLANATION: Directly stated. (A) is a plausible distractor (the EU is a separate long-standing G20 member) but the passage specifically names the African Union as the new admission. Q33. Where was the G20 Summit held during India's presidency? (A) Mumbai (B) New Delhi (C) Bengaluru (D) Jaipur ANSWER: B EXPLANATION: Directly stated. What document was adopted by consensus at the summit, per the passage?

(A) The Mumbai Accord

(B) The New Delhi Leaders' Declaration ☒

- (C) The Delhi Climate Pact
- (D) The G20 Unity Charter

Correct Answer: (B)

Explanation:

Directly stated; the other options are not mentioned/fictitious.

Q11.

Chandrayaan-3, India's third lunar exploration mission, was launched on July 14, 2023. Its lander module, named Vikram, achieved a soft landing near the Moon's south polar region on August 23, 2023, making India the fourth country to successfully soft-land a spacecraft on the Moon, and the first to do so near the lunar south pole. The mission also carried a rover named Pragyan, deployed to study the lunar surface. The successful landing led ISRO to mark August 23 as "National Space Day." When was Chandrayaan-3 launched?

(A) July 14, 2023 ☒

- (B) August 23, 2023
- (C) September 7, 2023
- (D) June 14, 2023

Correct Answer: (A)

Explanation:

Directly stated.

Q12.

Chandrayaan-3, India's third lunar exploration mission, was launched on July 14, 2023. Its lander module, named Vikram, achieved a soft landing near the Moon's south polar region on August 23, 2023, making India the fourth country to successfully soft-land a spacecraft on the Moon, and the first to do so near the lunar south pole. The mission also carried a rover named Pragyan, deployed to study the lunar surface. The successful landing led ISRO to mark August 23 as "National Space Day." Q35. When was Chandrayaan-3 launched? (A) July 14, 2023 (B) August 23, 2023 (C) September 7, 2023 (D) June 14, 2023 ANSWER: A EXPLANATION: Directly stated. What distinction did India achieve through Chandrayaan-3's landing?

(A) First country ever to land on the Moon

(B) Fourth country to soft-land on the Moon, and first to do so near the lunar south pole ☒

- (C) First country to send a rover to the Moon
- (D) Second country to reach the Moon's orbit

Correct Answer: (B)

Explanation:

Directly stated. (A) is factually wrong. (C) and (D) misstate the achievement.

Q13.

Chandrayaan-3, India's third lunar exploration mission, was launched on July 14, 2023. Its lander module, named Vikram, achieved a soft landing near the Moon's south polar region on August 23, 2023, making India the fourth country to successfully soft-land a spacecraft on the Moon, and the first to do so near the lunar south pole. The mission also carried a rover named Pragyan, deployed to study the lunar surface. The successful landing led ISRO to mark August 23 as "National Space Day." Q35.

When was Chandrayaan-3 launched? (A) July 14, 2023 (B) August 23, 2023 (C) September 7, 2023 (D) June 14, 2023 ANSWER: A EXPLANATION: Directly stated. Q36. What distinction did India achieve through Chandrayaan-3's landing? (A) First country ever to land on the Moon (B) Fourth country to soft-land on the Moon, and first to do so near the lunar south pole (C) First country to send a rover to the Moon (D) Second country to reach the Moon's orbit ANSWER: B EXPLANATION: Directly stated. (A) is factually wrong. (C) and (D) misstate the achievement. What is the name of Chandrayaan-3's rover?

(A) Vikram

(B) Pragyan ☒

(C) Aryabhata

(D) Mangal

Correct Answer: (B)

Explanation:

Directly stated; (A) "Vikram" is the lander, a distractor testing precise reading.

Q14.

Chandrayaan-3, India's third lunar exploration mission, was launched on July 14, 2023. Its lander module, named Vikram, achieved a soft landing near the Moon's south polar region on August 23, 2023, making India the fourth country to successfully soft-land a spacecraft on the Moon, and the first to do so near the lunar south pole. The mission also carried a rover named Pragyan, deployed to study the lunar surface. The successful landing led ISRO to mark August 23 as "National Space Day." Q35. When was Chandrayaan-3 launched? (A) July 14, 2023 (B) August 23, 2023 (C) September 7, 2023 (D) June 14, 2023 ANSWER: A EXPLANATION: Directly stated. Q36. What distinction did India achieve through Chandrayaan-3's landing? (A) First country ever to land on the Moon (B) Fourth country to soft-land on the Moon, and first to do so near the lunar south pole (C) First country to send a rover to the Moon (D) Second country to reach the Moon's orbit ANSWER: B EXPLANATION: Directly stated. (A) is factually wrong. (C) and (D) misstate the achievement. Q37. What is the name of Chandrayaan-3's rover? (A) Vikram (B) Pragyan (C) Aryabhata (D) Mangal ANSWER: B EXPLANATION: Directly stated; (A) "Vikram" is the lander, a distractor testing precise reading. On what date did Vikram achieve its soft landing?

(A) July 14, 2023

(B) August 23, 2023 ☒

(C) September 15, 2023

(D) October 2, 2023

Correct Answer: (B)

Explanation:

Directly stated.

Q15.

Chandrayaan-3, India's third lunar exploration mission, was launched on July 14, 2023. Its lander module, named Vikram, achieved a soft landing near the Moon's south polar region on August 23, 2023, making India the fourth country to successfully soft-land a spacecraft on the Moon, and the first to do so near the lunar south pole. The mission also carried a rover named Pragyan, deployed to study the lunar surface. The successful landing led ISRO to mark August 23 as "National Space Day." Q35. When was Chandrayaan-3 launched? (A) July 14, 2023 (B) August 23, 2023 (C) September 7, 2023

(D) June 14, 2023 ANSWER: A EXPLANATION: Directly stated. Q36. What distinction did India achieve through Chandrayaan-3's landing? (A) First country ever to land on the Moon (B) Fourth country to soft-land on the Moon, and first to do so near the lunar south pole (C) First country to send a rover to the Moon (D) Second country to reach the Moon's orbit ANSWER: B EXPLANATION: Directly stated. (A) is factually wrong. (C) and (D) misstate the achievement. Q37. What is the name of Chandrayaan-3's rover? (A) Vikram (B) Pragyan (C) Aryabhata (D) Mangal ANSWER: B EXPLANATION: Directly stated; (A) "Vikram" is the lander, a distractor testing precise reading. Q38. On what date did Vikram achieve its soft landing? (A) July 14, 2023 (B) August 23, 2023 (C) September 15, 2023 (D) October 2, 2023 ANSWER: B EXPLANATION: Directly stated. What annual observance did ISRO establish to commemorate the landing?

(A) National Science Day

(B) National Space Day ☒

(C) ISRO Foundation Day

(D) Lunar Achievement Day

Correct Answer: (B)

Explanation:

Directly stated; National Science Day is a real but different, pre-existing observance (Feb 28), making it a plausible but incorrect distractor.

Q16.

The Reserve Bank of India (RBI) uses several tools to manage inflation and liquidity. The repo rate is the interest rate at which the RBI lends short-term funds to commercial banks; raising it generally makes borrowing more expensive, reducing money supply and cooling inflation, while lowering it stimulates borrowing and spending. The reverse repo rate is the rate at which the RBI borrows funds from commercial banks, absorbing excess liquidity from the banking system. The Cash Reserve Ratio (CRR) is the minimum percentage of a bank's deposits it must hold as reserves with the RBI rather than lend out; increasing the CRR reduces funds available for banks to lend. What is the repo rate, as defined in the passage?

(A) The rate at which the RBI borrows from commercial banks

(B) The rate at which the RBI lends short-term funds to commercial banks ☒

(C) The interest rate banks charge individual customers

(D) The minimum reserve requirement for banks

Correct Answer: (B)

Explanation:

Directly stated. (A) describes reverse repo. (C), (D) are not the given definition.

Q17.

The Reserve Bank of India (RBI) uses several tools to manage inflation and liquidity. The repo rate is the interest rate at which the RBI lends short-term funds to commercial banks; raising it generally makes borrowing more expensive, reducing money supply and cooling inflation, while lowering it stimulates borrowing and spending. The reverse repo rate is the rate at which the RBI borrows funds from commercial banks, absorbing excess liquidity from the banking system. The Cash Reserve Ratio (CRR) is the minimum percentage of a bank's deposits it must hold as reserves with the RBI rather than lend out; increasing the CRR reduces funds available for banks to lend. Q40. What is the repo rate, as defined in the passage? (A) The rate at which the RBI borrows from commercial banks (B) The

rate at which the RBI lends short-term funds to commercial banks (C) The interest rate banks charge individual customers (D) The minimum reserve requirement for banks ANSWER: B EXPLANATION: Directly stated. (A) describes reverse repo. (C), (D) are not the given definition. According to the passage, what is the likely effect of the RBI raising the repo rate?

(A) Borrowing becomes cheaper, increasing money supply

(B) Borrowing becomes more expensive, tending to reduce money supply and cool inflation ☐

(C) Bank reserve requirements automatically increase

(D) Commercial banks are required to lend more

Correct Answer: (B)

Explanation:

Directly stated. (A) is the opposite effect. (C), (D) are not stated consequences.

Q18.

The Reserve Bank of India (RBI) uses several tools to manage inflation and liquidity. The repo rate is the interest rate at which the RBI lends short-term funds to commercial banks; raising it generally makes borrowing more expensive, reducing money supply and cooling inflation, while lowering it stimulates borrowing and spending. The reverse repo rate is the rate at which the RBI borrows funds from commercial banks, absorbing excess liquidity from the banking system. The Cash Reserve Ratio (CRR) is the minimum percentage of a bank's deposits it must hold as reserves with the RBI rather than lend out; increasing the CRR reduces funds available for banks to lend. Q40. What is the repo rate, as defined in the passage? (A) The rate at which the RBI borrows from commercial banks (B) The rate at which the RBI lends short-term funds to commercial banks (C) The interest rate banks charge individual customers (D) The minimum reserve requirement for banks ANSWER: B EXPLANATION: Directly stated. (A) describes reverse repo. (C), (D) are not the given definition. Q41. According to the passage, what is the likely effect of the RBI raising the repo rate? (A) Borrowing becomes cheaper, increasing money supply (B) Borrowing becomes more expensive, tending to reduce money supply and cool inflation (C) Bank reserve requirements automatically increase (D) Commercial banks are required to lend more ANSWER: B EXPLANATION: Directly stated. (A) is the opposite effect. (C), (D) are not stated consequences. What does the reverse repo rate allow the RBI to do, per the passage?

(A) Lend long-term funds to the government

(B) Absorb excess liquidity from the banking system by borrowing from commercial banks ☐

(C) Set the exchange rate of the rupee

(D) Determine income tax rates

Correct Answer: (B)

Explanation:

Directly stated. (A), (C), (D) are unrelated.

Q19.

The Reserve Bank of India (RBI) uses several tools to manage inflation and liquidity. The repo rate is the interest rate at which the RBI lends short-term funds to commercial banks; raising it generally makes borrowing more expensive, reducing money supply and cooling inflation, while lowering it stimulates borrowing and spending. The reverse repo rate is the rate at which the RBI borrows funds from commercial banks, absorbing excess liquidity from the banking system. The Cash Reserve Ratio (CRR) is the minimum percentage of a bank's deposits it must hold as reserves with the RBI rather than lend out; increasing the CRR reduces funds available for banks to lend. Q40. What is the repo

rate, as defined in the passage? (A) The rate at which the RBI borrows from commercial banks (B) The rate at which the RBI lends short-term funds to commercial banks (C) The interest rate banks charge individual customers (D) The minimum reserve requirement for banks ANSWER: B EXPLANATION: Directly stated. (A) describes reverse repo. (C), (D) are not the given definition. Q41. According to the passage, what is the likely effect of the RBI raising the repo rate? (A) Borrowing becomes cheaper, increasing money supply (B) Borrowing becomes more expensive, tending to reduce money supply and cool inflation (C) Bank reserve requirements automatically increase (D) Commercial banks are required to lend more ANSWER: B EXPLANATION: Directly stated. (A) is the opposite effect. (C), (D) are not stated consequences. Q42. What does the reverse repo rate allow the RBI to do, per the passage? (A) Lend long-term funds to the government (B) Absorb excess liquidity from the banking system by borrowing from commercial banks (C) Set the exchange rate of the rupee (D) Determine income tax rates ANSWER: B EXPLANATION: Directly stated. (A), (C), (D) are unrelated. What does an increase in the Cash Reserve Ratio (CRR) do, according to the passage?

(A) Increases the funds available for banks to lend

(B) Reduces the funds available for banks to lend, since more must be held in reserve □

(C) Has no effect on lending capacity

(D) Applies only to foreign banks

Correct Answer: (B)

Explanation:

Directly stated. (A) is the opposite. (C), (D) are unsupported.

Q20.

The Reserve Bank of India (RBI) uses several tools to manage inflation and liquidity. The repo rate is the interest rate at which the RBI lends short-term funds to commercial banks; raising it generally makes borrowing more expensive, reducing money supply and cooling inflation, while lowering it stimulates borrowing and spending. The reverse repo rate is the rate at which the RBI borrows funds from commercial banks, absorbing excess liquidity from the banking system. The Cash Reserve Ratio (CRR) is the minimum percentage of a bank's deposits it must hold as reserves with the RBI rather than lend out; increasing the CRR reduces funds available for banks to lend. Q40. What is the repo rate, as defined in the passage? (A) The rate at which the RBI borrows from commercial banks (B) The rate at which the RBI lends short-term funds to commercial banks (C) The interest rate banks charge individual customers (D) The minimum reserve requirement for banks ANSWER: B EXPLANATION: Directly stated. (A) describes reverse repo. (C), (D) are not the given definition. Q41. According to the passage, what is the likely effect of the RBI raising the repo rate? (A) Borrowing becomes cheaper, increasing money supply (B) Borrowing becomes more expensive, tending to reduce money supply and cool inflation (C) Bank reserve requirements automatically increase (D) Commercial banks are required to lend more ANSWER: B EXPLANATION: Directly stated. (A) is the opposite effect. (C), (D) are not stated consequences. Q42. What does the reverse repo rate allow the RBI to do, per the passage? (A) Lend long-term funds to the government (B) Absorb excess liquidity from the banking system by borrowing from commercial banks (C) Set the exchange rate of the rupee (D) Determine income tax rates ANSWER: B EXPLANATION: Directly stated. (A), (C), (D) are unrelated. Q43. What does an increase in the Cash Reserve Ratio (CRR) do, according to the passage? (A) Increases the funds available for banks to lend (B) Reduces the funds available for banks to lend, since more must be held in reserve (C) Has no effect on lending capacity (D) Applies only to foreign banks ANSWER: B EXPLANATION: Directly stated. (A) is the opposite. (C), (D) are unsupported. Based on the passage, which tool involves the RBI acting as a borrower rather than a lender?

- (A) Repo rate
- (B) Cash Reserve Ratio
- (C) Reverse repo rate** ☒
- (D) None of the tools involve RBI borrowing

Correct Answer: (C)

Explanation:

Directly stated ("the rate at which the RBI borrows funds from commercial banks"). (A) involves RBI lending. (B) is a reserve requirement, not a transaction. (D) is contradicted by (C).

Q21.

How many Schedules does the Indian Constitution currently have?

- (A) 10
- (B) 12** ☒
- (C) 9
- (D) 11

Correct Answer: (B)

Explanation:

The Constitution currently has 12 Schedules, following the 97th Constitutional Amendment (2011), which added the Twelfth Schedule dealing with cooperative societies.

Q22.

Q45. How many Schedules does the Indian Constitution currently have? (A) 10 (B) 12 (C) 9 (D) 11
ANSWER: B EXPLANATION: The Constitution currently has 12 Schedules, following the 97th Constitutional Amendment (2011), which added the Twelfth Schedule dealing with cooperative societies. Who was the Chairman of the Drafting Committee of the Indian Constitution?

- (A) Jawaharlal Nehru
- (B) Sardar Vallabhbhai Patel
- (C) Dr. B.R. Ambedkar** ☒
- (D) Rajendra Prasad

Correct Answer: (C)

Explanation:

Dr. B.R. Ambedkar chaired the Drafting Committee. Rajendra Prasad (D) was the President of the Constituent Assembly, a distinct role — a common source of confusion this question tests.

Q23.

Q45. How many Schedules does the Indian Constitution currently have? (A) 10 (B) 12 (C) 9 (D) 11
ANSWER: B EXPLANATION: The Constitution currently has 12 Schedules, following the 97th Constitutional Amendment (2011), which added the Twelfth Schedule dealing with cooperative societies. Q46. Who was the Chairman of the Drafting Committee of the Indian Constitution? (A) Jawaharlal Nehru (B) Sardar Vallabhbhai Patel (C) Dr. B.R. Ambedkar (D) Rajendra Prasad ANSWER: C EXPLANATION: Dr. B.R. Ambedkar chaired the Drafting Committee. Rajendra Prasad (D) was the President of the Constituent Assembly, a distinct role — a common source of confusion this question tests. On what date did the Indian Constitution come into effect?

(A) August 15, 1947

(B) January 26, 1950 ☒

(C) November 26, 1949

(D) January 26, 1949

Correct Answer: (B)

Explanation:

The Constitution was adopted on November 26, 1949 (option C — now celebrated as Constitution Day) but came into force on January 26, 1950 (Republic Day). Option (A) is Independence Day, a different event entirely.

Q24.

Q45. How many Schedules does the Indian Constitution currently have? (A) 10 (B) 12 (C) 9 (D) 11

ANSWER: B EXPLANATION: The Constitution currently has 12 Schedules, following the 97th Constitutional Amendment (2011), which added the Twelfth Schedule dealing with cooperative societies.

Q46. Who was the Chairman of the Drafting Committee of the Indian Constitution? (A)

Jawaharlal Nehru (B) Sardar Vallabhbhai Patel (C) Dr. B.R. Ambedkar (D) Rajendra Prasad ANSWER: C

EXPLANATION: Dr. B.R. Ambedkar chaired the Drafting Committee. Rajendra Prasad (D) was the President of the Constituent Assembly, a distinct role — a common source of confusion this question tests.

Q47. On what date did the Indian Constitution come into effect? (A) August 15, 1947 (B) January 26, 1950 (C) November 26, 1949 (D) January 26, 1949 ANSWER: B

EXPLANATION: The Constitution was adopted on November 26, 1949 (option C — now celebrated as Constitution Day) but came into force on January 26, 1950 (Republic Day). Option (A) is Independence Day, a different event entirely.

Fundamental Rights are enumerated in which Part of the Constitution?

(A) Part II

(B) Part III ☒

(C) Part IV

(D) Part V

Correct Answer: (B)

Explanation:

Part III contains the Fundamental Rights. Part IV (C) contains the Directive Principles of State Policy, a frequently confused distractor.

Q25.

Q45. How many Schedules does the Indian Constitution currently have? (A) 10 (B) 12 (C) 9 (D) 11

ANSWER: B EXPLANATION: The Constitution currently has 12 Schedules, following the 97th Constitutional Amendment (2011), which added the Twelfth Schedule dealing with cooperative societies.

Q46. Who was the Chairman of the Drafting Committee of the Indian Constitution? (A)

Jawaharlal Nehru (B) Sardar Vallabhbhai Patel (C) Dr. B.R. Ambedkar (D) Rajendra Prasad ANSWER: C

EXPLANATION: Dr. B.R. Ambedkar chaired the Drafting Committee. Rajendra Prasad (D) was the President of the Constituent Assembly, a distinct role — a common source of confusion this question tests.

Q47. On what date did the Indian Constitution come into effect? (A) August 15, 1947 (B) January 26, 1950 (C) November 26, 1949 (D) January 26, 1949 ANSWER: B

EXPLANATION: The Constitution was adopted on November 26, 1949 (option C — now celebrated as Constitution Day) but came into force on January 26, 1950 (Republic Day). Option (A) is Independence Day, a different event entirely.

Q48. Fundamental Rights are enumerated in which Part of the Constitution? (A) Part II (B) Part III (C) Part IV (D) Part V ANSWER: B

EXPLANATION: Part III contains the Fundamental Rights. Part IV (C) contains the Directive Principles of State Policy, a frequently confused distractor. The Directive

Principles of State Policy are contained in which Part of the Constitution?

- (A) Part III
- (B) Part IV** ☒
- (C) Part IVA
- (D) Part V

Correct Answer: (B)

Explanation:

Part IV contains the DPSPs. Part IVA (C) contains the Fundamental Duties, a related but distinct part.

Q26.

Q45. How many Schedules does the Indian Constitution currently have? (A) 10 (B) 12 (C) 9 (D) 11
ANSWER: B EXPLANATION: The Constitution currently has 12 Schedules, following the 97th Constitutional Amendment (2011), which added the Twelfth Schedule dealing with cooperative societies. Q46. Who was the Chairman of the Drafting Committee of the Indian Constitution? (A) Jawaharlal Nehru (B) Sardar Vallabhbhai Patel (C) Dr. B.R. Ambedkar (D) Rajendra Prasad ANSWER: C EXPLANATION: Dr. B.R. Ambedkar chaired the Drafting Committee. Rajendra Prasad (D) was the President of the Constituent Assembly, a distinct role — a common source of confusion this question tests. Q47. On what date did the Indian Constitution come into effect? (A) August 15, 1947 (B) January 26, 1950 (C) November 26, 1949 (D) January 26, 1949 ANSWER: B EXPLANATION: The Constitution was adopted on November 26, 1949 (option C — now celebrated as Constitution Day) but came into force on January 26, 1950 (Republic Day). Option (A) is Independence Day, a different event entirely. Q48. Fundamental Rights are enumerated in which Part of the Constitution? (A) Part II (B) Part III (C) Part IV (D) Part V ANSWER: B EXPLANATION: Part III contains the Fundamental Rights. Part IV (C) contains the Directive Principles of State Policy, a frequently confused distractor. Q49. The Directive Principles of State Policy are contained in which Part of the Constitution? (A) Part III (B) Part IV (C) Part IVA (D) Part V ANSWER: B EXPLANATION: Part IV contains the DPSPs. Part IVA (C) contains the Fundamental Duties, a related but distinct part. Fundamental Duties were added to the Constitution by which amendment?

- (A) 42nd Amendment** ☒
- (B) 44th Amendment
- (C) 61st Amendment
- (D) 73rd Amendment

Correct Answer: (A)

Explanation:

The 42nd Amendment (1976) inserted Part IVA (Fundamental Duties). The 44th Amendment (B) largely reversed several changes made by the 42nd; the 73rd (D) concerns Panchayati Raj institutions.

Q27.

Q45. How many Schedules does the Indian Constitution currently have? (A) 10 (B) 12 (C) 9 (D) 11
ANSWER: B EXPLANATION: The Constitution currently has 12 Schedules, following the 97th Constitutional Amendment (2011), which added the Twelfth Schedule dealing with cooperative societies. Q46. Who was the Chairman of the Drafting Committee of the Indian Constitution? (A) Jawaharlal Nehru (B) Sardar Vallabhbhai Patel (C) Dr. B.R. Ambedkar (D) Rajendra Prasad ANSWER: C EXPLANATION: Dr. B.R. Ambedkar chaired the Drafting Committee. Rajendra Prasad (D) was the President of the Constituent Assembly, a distinct role — a common source of confusion this question

tests. Q47. On what date did the Indian Constitution come into effect? (A) August 15, 1947 (B) January 26, 1950 (C) November 26, 1949 (D) January 26, 1949 ANSWER: B EXPLANATION: The Constitution was adopted on November 26, 1949 (option C — now celebrated as Constitution Day) but came into force on January 26, 1950 (Republic Day). Option (A) is Independence Day, a different event entirely. Q48. Fundamental Rights are enumerated in which Part of the Constitution? (A) Part II (B) Part III (C) Part IV (D) Part V ANSWER: B EXPLANATION: Part III contains the Fundamental Rights. Part IV (C) contains the Directive Principles of State Policy, a frequently confused distractor. Q49. The Directive Principles of State Policy are contained in which Part of the Constitution? (A) Part III (B) Part IV (C) Part IVA (D) Part V ANSWER: B EXPLANATION: Part IV contains the DPSPs. Part IVA (C) contains the Fundamental Duties, a related but distinct part. Q50. Fundamental Duties were added to the Constitution by which amendment? (A) 42nd Amendment (B) 44th Amendment (C) 61st Amendment (D) 73rd Amendment ANSWER: A EXPLANATION: The 42nd Amendment (1976) inserted Part IVA (Fundamental Duties). The 44th Amendment (B) largely reversed several changes made by the 42nd; the 73rd (D) concerns Panchayati Raj institutions. The words "Socialist" and "Secular" were added to the Preamble by which amendment?

(A) 44th Amendment

(B) 42nd Amendment ☒

(C) 61st Amendment

(D) 86th Amendment

Correct Answer: (B)

Explanation:

The 42nd Amendment Act, 1976, added "Socialist," "Secular," and "Integrity" to the Preamble. The 86th Amendment (D) instead added the Right to Education (Article 21A).

Q28.

Q45. How many Schedules does the Indian Constitution currently have? (A) 10 (B) 12 (C) 9 (D) 11 ANSWER: B EXPLANATION: The Constitution currently has 12 Schedules, following the 97th Constitutional Amendment (2011), which added the Twelfth Schedule dealing with cooperative societies. Q46. Who was the Chairman of the Drafting Committee of the Indian Constitution? (A) Jawaharlal Nehru (B) Sardar Vallabhbhai Patel (C) Dr. B.R. Ambedkar (D) Rajendra Prasad ANSWER: C EXPLANATION: Dr. B.R. Ambedkar chaired the Drafting Committee. Rajendra Prasad (D) was the President of the Constituent Assembly, a distinct role — a common source of confusion this question tests. Q47. On what date did the Indian Constitution come into effect? (A) August 15, 1947 (B) January 26, 1950 (C) November 26, 1949 (D) January 26, 1949 ANSWER: B EXPLANATION: The Constitution was adopted on November 26, 1949 (option C — now celebrated as Constitution Day) but came into force on January 26, 1950 (Republic Day). Option (A) is Independence Day, a different event entirely. Q48. Fundamental Rights are enumerated in which Part of the Constitution? (A) Part II (B) Part III (C) Part IV (D) Part V ANSWER: B EXPLANATION: Part III contains the Fundamental Rights. Part IV (C) contains the Directive Principles of State Policy, a frequently confused distractor. Q49. The Directive Principles of State Policy are contained in which Part of the Constitution? (A) Part III (B) Part IV (C) Part IVA (D) Part V ANSWER: B EXPLANATION: Part IV contains the DPSPs. Part IVA (C) contains the Fundamental Duties, a related but distinct part. Q50. Fundamental Duties were added to the Constitution by which amendment? (A) 42nd Amendment (B) 44th Amendment (C) 61st Amendment (D) 73rd Amendment ANSWER: A EXPLANATION: The 42nd Amendment (1976) inserted Part IVA (Fundamental Duties). The 44th Amendment (B) largely reversed several changes made by the 42nd; the 73rd (D) concerns Panchayati Raj institutions. Q51. The words "Socialist" and "Secular" were added to the Preamble by which amendment? (A) 44th Amendment (B) 42nd Amendment (C) 61st

Amendment (D) 86th Amendment ANSWER: B EXPLANATION: The 42nd Amendment Act, 1976, added "Socialist," "Secular," and "Integrity" to the Preamble. The 86th Amendment (D) instead added the Right to Education (Article 21A). Which Article of the Constitution deals with the Right to Constitutional Remedies?

(A) Article 19

(B) Article 21

(C) Article 32 ☒

(D) Article 14

Correct Answer: (C)

Explanation:

Article 32 provides the Right to Constitutional Remedies, famously called the "heart and soul" of the Constitution by Dr. Ambedkar. Article 21 (B) concerns the Right to Life and Personal Liberty — a related but distinct right.

Legal Reasoning

Q1.

Principle: A person who voluntarily consents to the risk of harm inherent in an activity cannot later claim damages for injury arising from that inherent risk (*volenti non fit injuria*). However, this defense does not apply where the harm arises from the defendant's negligence beyond the ordinary risks of the activity, or where consent was not free (e.g., obtained through misrepresentation or under duress).

Facts: Ravi joined a professionally run rock-climbing course after signing a waiver acknowledging "inherent risks of falls and injury during climbing." During a climb, the instructor failed to inspect a visibly frayed rope before Ravi's ascent, and the rope snapped, causing Ravi to fall and fracture his leg. Ravi sues the climbing company for damages. Will Ravi's claim succeed?

- (A) No, because he signed a waiver accepting the risk of falls
- (B) No, because rock climbing is inherently dangerous

(C) Yes, because the injury arose from the instructor's negligence in failing to inspect the rope, not from an inherent risk Ravi consented to ☐

- (D) Yes, because waivers are never legally valid

Correct Answer: (C)

Explanation:

Volenti non fit injuria does not shield a defendant from harm caused by negligence beyond the activity's ordinary risks. (A), (B) misapply the defense to negligence-caused harm. (D) is an overstatement unsupported by the principle, which only limits waivers in specific circumstances.

Q2.

Principle: A person who voluntarily consents to the risk of harm inherent in an activity cannot later claim damages for injury arising from that inherent risk (*volenti non fit injuria*). However, this defense does not apply where the harm arises from the defendant's negligence beyond the ordinary risks of the activity, or where consent was not free (e.g., obtained through misrepresentation or under duress).

Facts: Ravi joined a professionally run rock-climbing course after signing a waiver acknowledging "inherent risks of falls and injury during climbing." During a climb, the instructor failed to inspect a visibly frayed rope before Ravi's ascent, and the rope snapped, causing Ravi to fall and fracture his leg. Ravi sues the climbing company for damages. Q53. Will Ravi's claim succeed? (A) No, because he signed a waiver accepting the risk of falls (B) No, because rock climbing is inherently dangerous (C) Yes, because the injury arose from the instructor's negligence in failing to inspect the rope, not from an inherent risk Ravi consented to (D) Yes, because waivers are never legally valid ANSWER: C

EXPLANATION: *Volenti non fit injuria* does not shield a defendant from harm caused by negligence beyond the activity's ordinary risks. (A), (B) misapply the defense to negligence-caused harm. (D) is an overstatement unsupported by the principle, which only limits waivers in specific circumstances.

Suppose the rope had been properly inspected and was free of any visible defect, but snapped due to a manufacturing flaw undetectable through reasonable inspection. Would the outcome change?

- (A) No, the company remains liable regardless of inspection

(B) Yes, this would likely fall under inherent risk since no negligence by the company is shown ☐

- (C) No, because manufacturing flaws are always the company's responsibility
- (D) Yes, because Ravi never signed a valid waiver

Correct Answer: (B)

Explanation:

If the flaw was undetectable despite reasonable inspection, there is no negligence "beyond the ordinary risk." (A), (C) ignore the negligence carve-out. (D) is factually inconsistent with the facts.

Q3.

Principle: A person who voluntarily consents to the risk of harm inherent in an activity cannot later claim damages for injury arising from that inherent risk (*volenti non fit injuria*). However, this defense does not apply where the harm arises from the defendant's negligence beyond the ordinary risks of the activity, or where consent was not free (e.g., obtained through misrepresentation or under duress).

Facts: Ravi joined a professionally run rock-climbing course after signing a waiver acknowledging "inherent risks of falls and injury during climbing." During a climb, the instructor failed to inspect a visibly frayed rope before Ravi's ascent, and the rope snapped, causing Ravi to fall and fracture his leg. Ravi sues the climbing company for damages. Q53. Will Ravi's claim succeed? (A) No, because he signed a waiver accepting the risk of falls (B) No, because rock climbing is inherently dangerous (C) Yes, because the injury arose from the instructor's negligence in failing to inspect the rope, not from an inherent risk Ravi consented to (D) Yes, because waivers are never legally valid ANSWER: C

EXPLANATION: *Volenti non fit injuria* does not shield a defendant from harm caused by negligence beyond the activity's ordinary risks. (A), (B) misapply the defense to negligence-caused harm. (D) is an overstatement unsupported by the principle, which only limits waivers in specific circumstances. Q54.

Suppose the rope had been properly inspected and was free of any visible defect, but snapped due to a manufacturing flaw undetectable through reasonable inspection. Would the outcome change? (A) No, the company remains liable regardless of inspection (B) Yes, this would likely fall under inherent risk since no negligence by the company is shown (C) No, because manufacturing flaws are always the company's responsibility (D) Yes, because Ravi never signed a valid waiver ANSWER: B

EXPLANATION: If the flaw was undetectable despite reasonable inspection, there is no negligence "beyond the ordinary risk." (A), (C) ignore the negligence carve-out. (D) is factually inconsistent with the facts. Assume Ravi was made to sign the waiver after he was already midway up the rock face, under threat that the instructor would stop belaying him if he refused. Does the waiver protect the company?

(A) Yes, because a signed waiver is always binding

(B) No, because consent obtained under duress is not free consent, per the stated principle ☐

(C) Yes, because Ravi had already assumed the risk by climbing

(D) No, because waivers must be signed before starting any activity

Correct Answer: (B)

Explanation:

The principle explicitly excludes consent obtained "under duress." (A), (C) ignore this carve-out. (D) states a timing rule not found in the passage.

Q4.

Principle: A person who voluntarily consents to the risk of harm inherent in an activity cannot later claim damages for injury arising from that inherent risk (*volenti non fit injuria*). However, this defense does not apply where the harm arises from the defendant's negligence beyond the ordinary risks of the activity, or where consent was not free (e.g., obtained through misrepresentation or under duress).

Facts: Ravi joined a professionally run rock-climbing course after signing a waiver acknowledging "inherent risks of falls and injury during climbing." During a climb, the instructor failed to inspect a

visibly frayed rope before Ravi's ascent, and the rope snapped, causing Ravi to fall and fracture his leg. Ravi sues the climbing company for damages. Q53. Will Ravi's claim succeed? (A) No, because he signed a waiver accepting the risk of falls (B) No, because rock climbing is inherently dangerous (C) Yes, because the injury arose from the instructor's negligence in failing to inspect the rope, not from an inherent risk Ravi consented to (D) Yes, because waivers are never legally valid ANSWER: C

EXPLANATION: Volenti non fit injuria does not shield a defendant from harm caused by negligence beyond the activity's ordinary risks. (A), (B) misapply the defense to negligence-caused harm. (D) is an overstatement unsupported by the principle, which only limits waivers in specific circumstances. Q54. Suppose the rope had been properly inspected and was free of any visible defect, but snapped due to a manufacturing flaw undetectable through reasonable inspection. Would the outcome change? (A) No, the company remains liable regardless of inspection (B) Yes, this would likely fall under inherent risk since no negligence by the company is shown (C) No, because manufacturing flaws are always the company's responsibility (D) Yes, because Ravi never signed a valid waiver ANSWER: B

EXPLANATION: If the flaw was undetectable despite reasonable inspection, there is no negligence "beyond the ordinary risk." (A), (C) ignore the negligence carve-out. (D) is factually inconsistent with the facts. Q55. Assume Ravi was made to sign the waiver after he was already midway up the rock face, under threat that the instructor would stop belaying him if he refused. Does the waiver protect the company? (A) Yes, because a signed waiver is always binding (B) No, because consent obtained under duress is not free consent, per the stated principle (C) Yes, because Ravi had already assumed the risk by climbing (D) No, because waivers must be signed before starting any activity ANSWER: B EXPLANATION: The principle explicitly excludes consent obtained "under duress." (A), (C) ignore this carve-out. (D) states a timing rule not found in the passage. What is the most accurate characterization of the legal principle applied above?

(A) A blanket immunity for all risk-based activities

(B) A conditional defense that fails where negligence or lack of free consent is shown □

(C) A rule that only applies to written waivers

(D) A rule applicable only to sporting activities

Correct Answer: (B)

Explanation:

The principle is explicitly conditional. (A) overstates it as absolute. (C), (D) are unsupported narrowings.

Q5.

Principle: A person who voluntarily consents to the risk of harm inherent in an activity cannot later claim damages for injury arising from that inherent risk (volenti non fit injuria). However, this defense does not apply where the harm arises from the defendant's negligence beyond the ordinary risks of the activity, or where consent was not free (e.g., obtained through misrepresentation or under duress).

Facts: Ravi joined a professionally run rock-climbing course after signing a waiver acknowledging "inherent risks of falls and injury during climbing." During a climb, the instructor failed to inspect a visibly frayed rope before Ravi's ascent, and the rope snapped, causing Ravi to fall and fracture his leg. Ravi sues the climbing company for damages. Q53. Will Ravi's claim succeed? (A) No, because he signed a waiver accepting the risk of falls (B) No, because rock climbing is inherently dangerous (C) Yes, because the injury arose from the instructor's negligence in failing to inspect the rope, not from an inherent risk Ravi consented to (D) Yes, because waivers are never legally valid ANSWER: C

EXPLANATION: Volenti non fit injuria does not shield a defendant from harm caused by negligence beyond the activity's ordinary risks. (A), (B) misapply the defense to negligence-caused harm. (D) is an overstatement unsupported by the principle, which only limits waivers in specific circumstances. Q54. Suppose the rope had been properly inspected and was free of any visible defect, but snapped due to

a manufacturing flaw undetectable through reasonable inspection. Would the outcome change? (A) No, the company remains liable regardless of inspection (B) Yes, this would likely fall under inherent risk since no negligence by the company is shown (C) No, because manufacturing flaws are always the company's responsibility (D) Yes, because Ravi never signed a valid waiver ANSWER: B EXPLANATION: If the flaw was undetectable despite reasonable inspection, there is no negligence "beyond the ordinary risk." (A), (C) ignore the negligence carve-out. (D) is factually inconsistent with the facts. Q55. Assume Ravi was made to sign the waiver after he was already midway up the rock face, under threat that the instructor would stop belaying him if he refused. Does the waiver protect the company? (A) Yes, because a signed waiver is always binding (B) No, because consent obtained under duress is not free consent, per the stated principle (C) Yes, because Ravi had already assumed the risk by climbing (D) No, because waivers must be signed before starting any activity ANSWER: B EXPLANATION: The principle explicitly excludes consent obtained "under duress." (A), (C) ignore this carve-out. (D) states a timing rule not found in the passage. Q56. What is the most accurate characterization of the legal principle applied above? (A) A blanket immunity for all risk-based activities (B) A conditional defense that fails where negligence or lack of free consent is shown (C) A rule that only applies to written waivers (D) A rule applicable only to sporting activities ANSWER: B EXPLANATION: The principle is explicitly conditional. (A) overstates it as absolute. (C), (D) are unsupported narrowings. If Ravi had been an experienced climbing instructor himself, fully aware that ropes require pre-climb inspection, would this fact alone change the outcome in Q53?

(A) Yes, his expertise means he assumed the inspection risk himself

(B) No, the duty to inspect equipment rested on the company/instructor regardless of Ravi's own expertise ☐

(C) Yes, experts cannot claim negligence

(D) No, because expertise is irrelevant to any negligence claim in general

Correct Answer: (B)

Explanation:

The principle ties the negligence carve-out to the defendant's conduct, not the claimant's expertise. (A), (C) invent an exception not in the passage. (D) overstates a general rule beyond what the passage supports.

Q6.

Principle: A contract is discharged by frustration when, after formation, an event occurs — without fault of either party — that makes performance impossible, illegal, or radically different from what was originally contemplated. Frustration does not apply where the event was of a type the parties specifically turned their minds to and contractually allocated, where a party is at fault for the event, or where performance is merely more expensive or difficult (not impossible or radically different). Facts: Meera booked a wedding hall for her sister's wedding, six months in advance. Two weeks before the wedding, the hall was completely destroyed by an accidental fire of unknown origin. Meera seeks to be excused from further payment under the contract. Is the contract frustrated?

(A) No, because Meera must still pay since the hall owner is not at fault

(B) Yes, because the fire, which was unforeseen and not the fault of either party, made performance of the hall's function impossible ☐

(C) No, because Meera should have foreseen the risk of fire

(D) Yes, because Meera no longer wishes to hold the event

Correct Answer: (B)

Explanation:

Matches the principle: an unforeseen, blameless event making performance impossible. (A) ignores this. (C) is unsupported — nothing suggests the parties turned their minds to this specific risk or allocated it contractually. (D) is irrelevant — mere changed desire is not frustration.

Q7.

Principle: A contract is discharged by frustration when, after formation, an event occurs — without fault of either party — that makes performance impossible, illegal, or radically different from what was originally contemplated. Frustration does not apply where the event was of a type the parties specifically turned their minds to and contractually allocated, where a party is at fault for the event, or where performance is merely more expensive or difficult (not impossible or radically different). Facts: Meera booked a wedding hall for her sister's wedding, six months in advance. Two weeks before the wedding, the hall was completely destroyed by an accidental fire of unknown origin. Meera seeks to be excused from further payment under the contract. Q58. Is the contract frustrated? (A) No, because Meera must still pay since the hall owner is not at fault (B) Yes, because the fire, which was unforeseen and not the fault of either party, made performance of the hall's function impossible (C) No, because Meera should have foreseen the risk of fire (D) Yes, because Meera no longer wishes to hold the event ANSWER: B EXPLANATION: Matches the principle: an unforeseen, blameless event making performance impossible. (A) ignores this. (C) is unsupported — nothing suggests the parties turned their minds to this specific risk or allocated it contractually. (D) is irrelevant — mere changed desire is not frustration. Suppose the fire was started by Meera's own event decorator team due to negligent use of candles during setup. Would frustration apply?

(A) Yes, because the hall is still destroyed

(B) No, because the event causing impossibility was caused by fault attributable to Meera's side, not an outside event ☐

(C) Yes, because the hall owner bears all risk of destruction regardless of cause

(D) No, because frustration never applies to venue contracts

Correct Answer: (B)

Explanation:

Matches the "without fault of either party" requirement. (A) ignores fault. (C) invents an absolute rule not in the principle. (D) is an unsupported blanket rule.

Q8.

Principle: A contract is discharged by frustration when, after formation, an event occurs — without fault of either party — that makes performance impossible, illegal, or radically different from what was originally contemplated. Frustration does not apply where the event was of a type the parties specifically turned their minds to and contractually allocated, where a party is at fault for the event, or where performance is merely more expensive or difficult (not impossible or radically different). Facts: Meera booked a wedding hall for her sister's wedding, six months in advance. Two weeks before the wedding, the hall was completely destroyed by an accidental fire of unknown origin. Meera seeks to be excused from further payment under the contract. Q58. Is the contract frustrated? (A) No, because Meera must still pay since the hall owner is not at fault (B) Yes, because the fire, which was unforeseen and not the fault of either party, made performance of the hall's function impossible (C) No, because Meera should have foreseen the risk of fire (D) Yes, because Meera no longer wishes to hold the event ANSWER: B EXPLANATION: Matches the principle: an unforeseen, blameless event making performance impossible. (A) ignores this. (C) is unsupported — nothing suggests the parties turned their minds to this specific risk or allocated it contractually. (D) is irrelevant — mere changed

desire is not frustration. Q59. Suppose the fire was started by Meera's own event decorator team due to negligent use of candles during setup. Would frustration apply? (A) Yes, because the hall is still destroyed (B) No, because the event causing impossibility was caused by fault attributable to Meera's side, not an outside event (C) Yes, because the hall owner bears all risk of destruction regardless of cause (D) No, because frustration never applies to venue contracts ANSWER: B EXPLANATION: Matches the "without fault of either party" requirement. (A) ignores fault. (C) invents an absolute rule not in the principle. (D) is an unsupported blanket rule. Suppose the contract had an explicit clause stating "In the event of fire or other destruction of the venue for any reason, the client remains liable for full payment." Does frustration apply?

(A) Yes, frustration always overrides contractual clauses

(B) No, because the parties had specifically foreseen and allocated this risk in the contract ☐

(C) Yes, because fire is an act of God

(D) No, because oral clauses are not binding

Correct Answer: (B)

Explanation:

Matches the carve-out for specifically foreseen and allocated risk. (A) contradicts this. (C) is a category not used in this principle. (D) mischaracterises the clause as oral when it is contractual.

Q9.

Principle: A contract is discharged by frustration when, after formation, an event occurs — without fault of either party — that makes performance impossible, illegal, or radically different from what was originally contemplated. Frustration does not apply where the event was of a type the parties specifically turned their minds to and contractually allocated, where a party is at fault for the event, or where performance is merely more expensive or difficult (not impossible or radically different). Facts: Meera booked a wedding hall for her sister's wedding, six months in advance. Two weeks before the wedding, the hall was completely destroyed by an accidental fire of unknown origin. Meera seeks to be excused from further payment under the contract. Q58. Is the contract frustrated? (A) No, because Meera must still pay since the hall owner is not at fault (B) Yes, because the fire, which was unforeseen and not the fault of either party, made performance of the hall's function impossible (C) No, because Meera should have foreseen the risk of fire (D) Yes, because Meera no longer wishes to hold the event ANSWER: B EXPLANATION: Matches the principle: an unforeseen, blameless event making performance impossible. (A) ignores this. (C) is unsupported — nothing suggests the parties turned their minds to this specific risk or allocated it contractually. (D) is irrelevant — mere changed desire is not frustration. Q59. Suppose the fire was started by Meera's own event decorator team due to negligent use of candles during setup. Would frustration apply? (A) Yes, because the hall is still destroyed (B) No, because the event causing impossibility was caused by fault attributable to Meera's side, not an outside event (C) Yes, because the hall owner bears all risk of destruction regardless of cause (D) No, because frustration never applies to venue contracts ANSWER: B EXPLANATION: Matches the "without fault of either party" requirement. (A) ignores fault. (C) invents an absolute rule not in the principle. (D) is an unsupported blanket rule. Q60. Suppose the contract had an explicit clause stating "In the event of fire or other destruction of the venue for any reason, the client remains liable for full payment." Does frustration apply? (A) Yes, frustration always overrides contractual clauses (B) No, because the parties had specifically foreseen and allocated this risk in the contract (C) Yes, because fire is an act of God (D) No, because oral clauses are not binding ANSWER: B EXPLANATION: Matches the carve-out for specifically foreseen and allocated risk. (A) contradicts this. (C) is a category not used in this principle. (D) mischaracterises the clause as oral when it is contractual. If, instead of being destroyed, the hall was still standing but merely became significantly

more expensive to rent due to a citywide price surge following a local festival, would frustration apply?

(A) Yes, because increased cost makes performance radically different

(B) No, because mere increase in cost or difficulty does not amount to impossibility or radical difference under the principle ☐

(C) Yes, because Meera cannot afford the new price

(D) No, because festivals are always foreseeable

Correct Answer: (B)

Explanation:

Directly matches the stated exclusion. (A) contradicts it. (C) is a personal-affordability argument irrelevant to legal frustration. (D) is an unsupported generalisation not needed to answer the question.

Q10.

Principle: A contract is discharged by frustration when, after formation, an event occurs — without fault of either party — that makes performance impossible, illegal, or radically different from what was originally contemplated. Frustration does not apply where the event was of a type the parties specifically turned their minds to and contractually allocated, where a party is at fault for the event, or where performance is merely more expensive or difficult (not impossible or radically different). Facts: Meera booked a wedding hall for her sister's wedding, six months in advance. Two weeks before the wedding, the hall was completely destroyed by an accidental fire of unknown origin. Meera seeks to be excused from further payment under the contract. Q58. Is the contract frustrated? (A) No, because Meera must still pay since the hall owner is not at fault (B) Yes, because the fire, which was unforeseen and not the fault of either party, made performance of the hall's function impossible (C) No, because Meera should have foreseen the risk of fire (D) Yes, because Meera no longer wishes to hold the event ANSWER: B EXPLANATION: Matches the principle: an unforeseen, blameless event making performance impossible. (A) ignores this. (C) is unsupported — nothing suggests the parties turned their minds to this specific risk or allocated it contractually. (D) is irrelevant — mere changed desire is not frustration. Q59. Suppose the fire was started by Meera's own event decorator team due to negligent use of candles during setup. Would frustration apply? (A) Yes, because the hall is still destroyed (B) No, because the event causing impossibility was caused by fault attributable to Meera's side, not an outside event (C) Yes, because the hall owner bears all risk of destruction regardless of cause (D) No, because frustration never applies to venue contracts ANSWER: B EXPLANATION: Matches the "without fault of either party" requirement. (A) ignores fault. (C) invents an absolute rule not in the principle. (D) is an unsupported blanket rule. Q60. Suppose the contract had an explicit clause stating "In the event of fire or other destruction of the venue for any reason, the client remains liable for full payment." Does frustration apply? (A) Yes, frustration always overrides contractual clauses (B) No, because the parties had specifically foreseen and allocated this risk in the contract (C) Yes, because fire is an act of God (D) No, because oral clauses are not binding ANSWER: B EXPLANATION: Matches the carve-out for specifically foreseen and allocated risk. (A) contradicts this. (C) is a category not used in this principle. (D) mischaracterises the clause as oral when it is contractual. Q61. If, instead of being destroyed, the hall was still standing but merely became significantly more expensive to rent due to a citywide price surge following a local festival, would frustration apply? (A) Yes, because increased cost makes performance radically different (B) No, because mere increase in cost or difficulty does not amount to impossibility or radical difference under the principle (C) Yes, because Meera cannot afford the new price (D) No, because festivals are always foreseeable ANSWER: B EXPLANATION: Directly matches the stated exclusion. (A) contradicts it. (C) is a personal-affordability argument irrelevant to legal frustration. (D) is an unsupported generalisation not needed to answer the question. What is the best characterization of the frustration doctrine as

described?

(A) Absolute risk allocation regardless of fault or foreseeability

(B) A doctrine excusing performance only where an unforeseen, blameless, and fundamentally transformative event occurs ☐

(C) A doctrine applicable only to written contracts

(D) A doctrine that applies whenever a party regrets entering the contract

Correct Answer: (B)

Explanation:

Direct restatement of the principle. (A), (C), (D) invent unsupported qualifiers.

Q11.

Principle: Where a person brings onto their land, and keeps there, something inherently dangerous which is likely to cause harm if it escapes, they are strictly liable for damage caused by its escape, irrespective of negligence. This liability does not apply where the escape was caused by: (i) an act of God, (ii) the deliberate act of a stranger over whom the defendant had no control, or (iii) the claimant's own default. Facts: A factory owner stores industrial chemicals in a storage tank on his property. Due to a previously undetectable structural flaw (not attributable to any negligence in construction, inspection, or maintenance), the tank ruptures and chemicals leak onto the neighboring farmer's land, destroying his crop. Is the factory owner liable to the farmer?

(A) No, because the rupture was not due to any negligence on the factory owner's part

(B) Yes, strict liability applies to the escape of the dangerous substance regardless of the absence of negligence, and none of the recognized exceptions apply here ☐

(C) No, because industrial chemicals are a normal part of factory operations

(D) Yes, but only if the farmer can prove the factory owner personally caused the flaw

Correct Answer: (B)

Explanation:

Matches the principle: no-fault liability, and none of the three exceptions apply on these facts. (A) misapplies the very essence of strict liability. (C) is irrelevant. (D) contradicts "irrespective of negligence."

Q12.

Principle: Where a person brings onto their land, and keeps there, something inherently dangerous which is likely to cause harm if it escapes, they are strictly liable for damage caused by its escape, irrespective of negligence. This liability does not apply where the escape was caused by: (i) an act of God, (ii) the deliberate act of a stranger over whom the defendant had no control, or (iii) the claimant's own default. Facts: A factory owner stores industrial chemicals in a storage tank on his property. Due to a previously undetectable structural flaw (not attributable to any negligence in construction, inspection, or maintenance), the tank ruptures and chemicals leak onto the neighboring farmer's land, destroying his crop. Q63. Is the factory owner liable to the farmer? (A) No, because the rupture was not due to any negligence on the factory owner's part (B) Yes, strict liability applies to the escape of the dangerous substance regardless of the absence of negligence, and none of the recognized exceptions apply here (C) No, because industrial chemicals are a normal part of factory operations (D) Yes, but only if the farmer can prove the factory owner personally caused the flaw ANSWER: B

EXPLANATION: Matches the principle: no-fault liability, and none of the three exceptions apply on these facts. (A) misapplies the very essence of strict liability. (C) is irrelevant. (D) contradicts "irrespective of negligence." Suppose instead the tank was ruptured because trespassing vandals

broke in and deliberately punctured it. Would strict liability still apply?

(A) Yes, the factory owner is always liable for any escape from his land

(B) No, because the escape was caused by the deliberate act of a stranger over whom the factory owner had no control — an established exception ☐

(C) Yes, because trespassers do not affect liability analysis

(D) No, because chemicals are inherently the farmer's responsibility to guard against

Correct Answer: (B)

Explanation:

Direct application of exception (ii). (A), (C) contradict the stated exceptions. (D) is unsupported.

Q13.

Principle: Where a person brings onto their land, and keeps there, something inherently dangerous which is likely to cause harm if it escapes, they are strictly liable for damage caused by its escape, irrespective of negligence. This liability does not apply where the escape was caused by: (i) an act of God, (ii) the deliberate act of a stranger over whom the defendant had no control, or (iii) the claimant's own default. Facts: A factory owner stores industrial chemicals in a storage tank on his property. Due to a previously undetectable structural flaw (not attributable to any negligence in construction, inspection, or maintenance), the tank ruptures and chemicals leak onto the neighboring farmer's land, destroying his crop. Q63. Is the factory owner liable to the farmer? (A) No, because the rupture was not due to any negligence on the factory owner's part (B) Yes, strict liability applies to the escape of the dangerous substance regardless of the absence of negligence, and none of the recognized exceptions apply here (C) No, because industrial chemicals are a normal part of factory operations (D) Yes, but only if the farmer can prove the factory owner personally caused the flaw ANSWER: B

EXPLANATION: Matches the principle: no-fault liability, and none of the three exceptions apply on these facts. (A) misapplies the very essence of strict liability. (C) is irrelevant. (D) contradicts "irrespective of negligence." Q64. Suppose instead the tank was ruptured because trespassing vandals broke in and deliberately punctured it. Would strict liability still apply? (A) Yes, the factory owner is always liable for any escape from his land (B) No, because the escape was caused by the deliberate act of a stranger over whom the factory owner had no control — an established exception (C) Yes, because trespassers do not affect liability analysis (D) No, because chemicals are inherently the farmer's responsibility to guard against ANSWER: B EXPLANATION: Direct application of exception (ii). (A), (C) contradict the stated exceptions. (D) is unsupported. Suppose instead an unprecedented earthquake — of a magnitude never before recorded in the region and not reasonably foreseeable — struck and cracked the tank. Would the factory owner be liable?

(A) Yes, because the tank still ruptured on his property

(B) No, this would likely fall under the "act of God" exception, given the unprecedented and unforeseeable nature of the event ☐

(C) Yes, because natural disasters never excuse strict liability

(D) No, because earthquakes are always foreseeable in any region

Correct Answer: (B)

Explanation:

Clean application of exception (i). (A) ignores it. (C) directly contradicts the principle. (D) contradicts the facts as given ("never before recorded... not reasonably foreseeable").

Q14.

Principle: Where a person brings onto their land, and keeps there, something inherently dangerous which is likely to cause harm if it escapes, they are strictly liable for damage caused by its escape, irrespective of negligence. This liability does not apply where the escape was caused by: (i) an act of God, (ii) the deliberate act of a stranger over whom the defendant had no control, or (iii) the claimant's own default. Facts: A factory owner stores industrial chemicals in a storage tank on his property. Due to a previously undetectable structural flaw (not attributable to any negligence in construction, inspection, or maintenance), the tank ruptures and chemicals leak onto the neighboring farmer's land, destroying his crop. Q63. Is the factory owner liable to the farmer? (A) No, because the rupture was not due to any negligence on the factory owner's part (B) Yes, strict liability applies to the escape of the dangerous substance regardless of the absence of negligence, and none of the recognized exceptions apply here (C) No, because industrial chemicals are a normal part of factory operations (D) Yes, but only if the farmer can prove the factory owner personally caused the flaw ANSWER: B EXPLANATION: Matches the principle: no-fault liability, and none of the three exceptions apply on these facts. (A) misapplies the very essence of strict liability. (C) is irrelevant. (D) contradicts "irrespective of negligence." Q64. Suppose instead the tank was ruptured because trespassing vandals broke in and deliberately punctured it. Would strict liability still apply? (A) Yes, the factory owner is always liable for any escape from his land (B) No, because the escape was caused by the deliberate act of a stranger over whom the factory owner had no control — an established exception (C) Yes, because trespassers do not affect liability analysis (D) No, because chemicals are inherently the farmer's responsibility to guard against ANSWER: B EXPLANATION: Direct application of exception (ii). (A), (C) contradict the stated exceptions. (D) is unsupported. Q65. Suppose instead an unprecedented earthquake — of a magnitude never before recorded in the region and not reasonably foreseeable — struck and cracked the tank. Would the factory owner be liable? (A) Yes, because the tank still ruptured on his property (B) No, this would likely fall under the "act of God" exception, given the unprecedented and unforeseeable nature of the event (C) Yes, because natural disasters never excuse strict liability (D) No, because earthquakes are always foreseeable in any region ANSWER: B EXPLANATION: Clean application of exception (i). (A) ignores it. (C) directly contradicts the principle. (D) contradicts the facts as given ("never before recorded... not reasonably foreseeable"). Suppose the farmer had, without informing the factory, been secretly digging a tunnel under the tank's foundation for an unrelated project, weakening its structural support and causing the rupture. Would the factory owner be liable?

(A) Yes, regardless of the farmer's own actions

(B) No, because the escape was caused by the claimant's own default — a recognized exception ☐

(C) Yes, because the tank contained dangerous chemicals

(D) No, because farmers cannot be defendants in strict liability cases

Correct Answer: (B)

Explanation:

Matches exception (iii). (A), (C) ignore it. (D) is nonsensical — the farmer is the claimant here, not a defendant, and no such rule exists in the principle.

Q15.

Principle: Where a person brings onto their land, and keeps there, something inherently dangerous which is likely to cause harm if it escapes, they are strictly liable for damage caused by its escape, irrespective of negligence. This liability does not apply where the escape was caused by: (i) an act of God, (ii) the deliberate act of a stranger over whom the defendant had no control, or (iii) the claimant's own default. Facts: A factory owner stores industrial chemicals in a storage tank on his property. Due

to a previously undetectable structural flaw (not attributable to any negligence in construction, inspection, or maintenance), the tank ruptures and chemicals leak onto the neighboring farmer's land, destroying his crop. Q63. Is the factory owner liable to the farmer? (A) No, because the rupture was not due to any negligence on the factory owner's part (B) Yes, strict liability applies to the escape of the dangerous substance regardless of the absence of negligence, and none of the recognized exceptions apply here (C) No, because industrial chemicals are a normal part of factory operations (D) Yes, but only if the farmer can prove the factory owner personally caused the flaw ANSWER: B

EXPLANATION: Matches the principle: no-fault liability, and none of the three exceptions apply on these facts. (A) misapplies the very essence of strict liability. (C) is irrelevant. (D) contradicts "irrespective of negligence." Q64. Suppose instead the tank was ruptured because trespassing vandals broke in and deliberately punctured it. Would strict liability still apply? (A) Yes, the factory owner is always liable for any escape from his land (B) No, because the escape was caused by the deliberate act of a stranger over whom the factory owner had no control — an established exception (C) Yes, because trespassers do not affect liability analysis (D) No, because chemicals are inherently the farmer's responsibility to guard against ANSWER: B EXPLANATION: Direct application of exception (ii). (A), (C) contradict the stated exceptions. (D) is unsupported. Q65. Suppose instead an unprecedented earthquake — of a magnitude never before recorded in the region and not reasonably foreseeable — struck and cracked the tank. Would the factory owner be liable? (A) Yes, because the tank still ruptured on his property (B) No, this would likely fall under the "act of God" exception, given the unprecedented and unforeseeable nature of the event (C) Yes, because natural disasters never excuse strict liability (D) No, because earthquakes are always foreseeable in any region ANSWER: B EXPLANATION: Clean application of exception (i). (A) ignores it. (C) directly contradicts the principle. (D) contradicts the facts as given ("never before recorded... not reasonably foreseeable"). Q66.

Suppose the farmer had, without informing the factory, been secretly digging a tunnel under the tank's foundation for an unrelated project, weakening its structural support and causing the rupture. Would the factory owner be liable? (A) Yes, regardless of the farmer's own actions (B) No, because the escape was caused by the claimant's own default — a recognized exception (C) Yes, because the tank contained dangerous chemicals (D) No, because farmers cannot be defendants in strict liability cases ANSWER: B EXPLANATION: Matches exception (iii). (A), (C) ignore it. (D) is nonsensical — the farmer is the claimant here, not a defendant, and no such rule exists in the principle. Which of the following best summarizes the standard of liability described in the principle?

(A) A fault-based standard requiring proof of negligence

(B) A no-fault standard subject to three specific, limited exceptions □

(C) An absolute standard with no exceptions whatsoever

(D) A standard applicable only to chemical industries

Correct Answer: (B)

Explanation:

Direct restatement. (A) contradicts "irrespective of negligence." (C) ignores the three exceptions. (D) is an unsupported narrowing.

Q16.

Principle: An employer is vicariously liable for a tort committed by an employee if it is committed in the course of employment, i.e., while doing the employer's business or something reasonably incidental to it. Minor deviations from assigned duties that do not amount to a substantial departure remain within the course of employment. An employer is not liable for acts that fall entirely outside the scope of employment, i.e., where the employee was on a "frolic of his own" — pursuing a purely personal matter unconnected with employment through a substantial departure from assigned duties, even if it occurs

during working hours. Facts: Suresh, a delivery driver, was driving the company van to deliver a package. En route, while still on the assigned delivery route, he negligently ran a red light and collided with another car, injuring its driver. Is the courier company vicariously liable?

(A) No, because Suresh personally committed the negligent act

(B) Yes, because Suresh was performing his employment duties (making a delivery) at the time of the negligent act ☐

(C) No, because employers are never liable for employees' driving

(D) Yes, but only if the company specifically instructed him to run red lights

Correct Answer: (B)

Explanation:

Directly matches "in the course of employment." (A) misapplies the doctrine, which exists precisely because an employee personally acts. (C) contradicts the principle. (D) adds an unsupported requirement.

Q17.

Principle: An employer is vicariously liable for a tort committed by an employee if it is committed in the course of employment, i.e., while doing the employer's business or something reasonably incidental to it. Minor deviations from assigned duties that do not amount to a substantial departure remain within the course of employment. An employer is not liable for acts that fall entirely outside the scope of employment, i.e., where the employee was on a "frolic of his own" — pursuing a purely personal matter unconnected with employment through a substantial departure from assigned duties, even if it occurs during working hours. Facts: Suresh, a delivery driver, was driving the company van to deliver a package. En route, while still on the assigned delivery route, he negligently ran a red light and collided with another car, injuring its driver. Q68. Is the courier company vicariously liable? (A) No, because Suresh personally committed the negligent act (B) Yes, because Suresh was performing his employment duties (making a delivery) at the time of the negligent act (C) No, because employers are never liable for employees' driving (D) Yes, but only if the company specifically instructed him to run red lights ANSWER: B EXPLANATION: Directly matches "in the course of employment." (A) misapplies the doctrine, which exists precisely because an employee personally acts. (C) contradicts the principle. (D) adds an unsupported requirement. Suppose instead, after completing all deliveries, Suresh took the company van forty kilometres out of his way, without permission, to visit a friend for purely personal reasons, and caused an accident during this detour. Is the company liable?

(A) Yes, because he was still driving the company van

(B) No, because this detour was a "frolic of his own," wholly disconnected from his employment duties ☐

(C) Yes, because employers are always liable for accidents involving company property

(D) No, because personal detours are always authorized implicitly

Correct Answer: (B)

Explanation:

Clean frolic-of-his-own application: completed deliveries, unauthorized substantial detour, purely personal purpose. (A) — use of company property alone is insufficient. (C) overstates the rule. (D) is unsupported.

Q18.

Principle: An employer is vicariously liable for a tort committed by an employee if it is committed in the course of employment, i.e., while doing the employer's business or something reasonably incidental to it. Minor deviations from assigned duties that do not amount to a substantial departure remain within

the course of employment. An employer is not liable for acts that fall entirely outside the scope of employment, i.e., where the employee was on a "frolic of his own" — pursuing a purely personal matter unconnected with employment through a substantial departure from assigned duties, even if it occurs during working hours. Facts: Suresh, a delivery driver, was driving the company van to deliver a package. En route, while still on the assigned delivery route, he negligently ran a red light and collided with another car, injuring its driver. Q68. Is the courier company vicariously liable? (A) No, because Suresh personally committed the negligent act (B) Yes, because Suresh was performing his employment duties (making a delivery) at the time of the negligent act (C) No, because employers are never liable for employees' driving (D) Yes, but only if the company specifically instructed him to run red lights ANSWER: B EXPLANATION: Directly matches "in the course of employment." (A) misapplies the doctrine, which exists precisely because an employee personally acts. (C) contradicts the principle. (D) adds an unsupported requirement. Q69. Suppose instead, after completing all deliveries, Suresh took the company van forty kilometres out of his way, without permission, to visit a friend for purely personal reasons, and caused an accident during this detour. Is the company liable? (A) Yes, because he was still driving the company van (B) No, because this detour was a "frolic of his own," wholly disconnected from his employment duties (C) Yes, because employers are always liable for accidents involving company property (D) No, because personal detours are always authorized implicitly ANSWER: B EXPLANATION: Clean frolic-of-his-own application: completed deliveries, unauthorized substantial detour, purely personal purpose. (A) — use of company property alone is insufficient. (C) overstates the rule. (D) is unsupported. Suppose Suresh, while still on his assigned route, made a slight, two-minute detour to grab a coffee for himself, and the accident happened during this minor detour. Would this likely still be within the "course of employment"?

(A) No, any detour whatsoever removes an act from the course of employment

(B) Yes, minor deviations that do not represent a substantial departure from employment duties are typically still considered incidental to employment ☐

(C) No, because coffee breaks are always personal, regardless of duration

(D) Yes, because he was still driving the company van regardless of the detour's nature

Correct Answer: (B)

Explanation:

Directly matches "minor deviations... that do not amount to a substantial departure remain within the course of employment." (A), (C) overstate a rigid rule contradicted by this language. (D) repeats the insufficient reasoning already rejected in Q69.

Q19.

Principle: An employer is vicariously liable for a tort committed by an employee if it is committed in the course of employment, i.e., while doing the employer's business or something reasonably incidental to it. Minor deviations from assigned duties that do not amount to a substantial departure remain within the course of employment. An employer is not liable for acts that fall entirely outside the scope of employment, i.e., where the employee was on a "frolic of his own" — pursuing a purely personal matter unconnected with employment through a substantial departure from assigned duties, even if it occurs during working hours. Facts: Suresh, a delivery driver, was driving the company van to deliver a package. En route, while still on the assigned delivery route, he negligently ran a red light and collided with another car, injuring its driver. Q68. Is the courier company vicariously liable? (A) No, because Suresh personally committed the negligent act (B) Yes, because Suresh was performing his employment duties (making a delivery) at the time of the negligent act (C) No, because employers are never liable for employees' driving (D) Yes, but only if the company specifically instructed him to run red lights ANSWER: B EXPLANATION: Directly matches "in the course of employment." (A)

misapplies the doctrine, which exists precisely because an employee personally acts. (C) contradicts the principle. (D) adds an unsupported requirement. Q69. Suppose instead, after completing all deliveries, Suresh took the company van forty kilometres out of his way, without permission, to visit a friend for purely personal reasons, and caused an accident during this detour. Is the company liable? (A) Yes, because he was still driving the company van (B) No, because this detour was a "frolic of his own," wholly disconnected from his employment duties (C) Yes, because employers are always liable for accidents involving company property (D) No, because personal detours are always authorized implicitly ANSWER: B EXPLANATION: Clean frolic-of-his-own application: completed deliveries, unauthorized substantial detour, purely personal purpose. (A) — use of company property alone is insufficient. (C) overstates the rule. (D) is unsupported. Q70. Suppose Suresh, while still on his assigned route, made a slight, two-minute detour to grab a coffee for himself, and the accident happened during this minor detour. Would this likely still be within the "course of employment"? (A) No, any detour whatsoever removes an act from the course of employment (B) Yes, minor deviations that do not represent a substantial departure from employment duties are typically still considered incidental to employment (C) No, because coffee breaks are always personal, regardless of duration (D) Yes, because he was still driving the company van regardless of the detour's nature ANSWER: B EXPLANATION: Directly matches "minor deviations... that do not amount to a substantial departure remain within the course of employment." (A), (C) overstate a rigid rule contradicted by this language. (D) repeats the insufficient reasoning already rejected in Q69. What is the key factual distinction between the original scenario (Q68) and the forty-kilometre detour scenario (Q69) that determines the different outcomes?

(A) The type of vehicle used

(B) The degree and purpose of departure from assigned employment duties ☒

(C) The time of day the accident occurred

(D) Whether the other driver was injured

Correct Answer: (B)

Explanation:

This is the doctrinal distinction the principle turns on. (A), (C), (D) are not the relevant factors under the principle.

Q20.

Principle: An employer is vicariously liable for a tort committed by an employee if it is committed in the course of employment, i.e., while doing the employer's business or something reasonably incidental to it. Minor deviations from assigned duties that do not amount to a substantial departure remain within the course of employment. An employer is not liable for acts that fall entirely outside the scope of employment, i.e., where the employee was on a "frolic of his own" — pursuing a purely personal matter unconnected with employment through a substantial departure from assigned duties, even if it occurs during working hours. Facts: Suresh, a delivery driver, was driving the company van to deliver a package. En route, while still on the assigned delivery route, he negligently ran a red light and collided with another car, injuring its driver. Q68. Is the courier company vicariously liable? (A) No, because Suresh personally committed the negligent act (B) Yes, because Suresh was performing his employment duties (making a delivery) at the time of the negligent act (C) No, because employers are never liable for employees' driving (D) Yes, but only if the company specifically instructed him to run red lights ANSWER: B EXPLANATION: Directly matches "in the course of employment." (A) misapplies the doctrine, which exists precisely because an employee personally acts. (C) contradicts the principle. (D) adds an unsupported requirement. Q69. Suppose instead, after completing all deliveries, Suresh took the company van forty kilometres out of his way, without permission, to visit a

friend for purely personal reasons, and caused an accident during this detour. Is the company liable? (A) Yes, because he was still driving the company van (B) No, because this detour was a "frolic of his own," wholly disconnected from his employment duties (C) Yes, because employers are always liable for accidents involving company property (D) No, because personal detours are always authorized implicitly ANSWER: B EXPLANATION: Clean frolic-of-his-own application: completed deliveries, unauthorized substantial detour, purely personal purpose. (A) — use of company property alone is insufficient. (C) overstates the rule. (D) is unsupported. Q70. Suppose Suresh, while still on his assigned route, made a slight, two-minute detour to grab a coffee for himself, and the accident happened during this minor detour. Would this likely still be within the "course of employment"? (A) No, any detour whatsoever removes an act from the course of employment (B) Yes, minor deviations that do not represent a substantial departure from employment duties are typically still considered incidental to employment (C) No, because coffee breaks are always personal, regardless of duration (D) Yes, because he was still driving the company van regardless of the detour's nature ANSWER: B EXPLANATION: Directly matches "minor deviations... that do not amount to a substantial departure remain within the course of employment." (A), (C) overstate a rigid rule contradicted by this language. (D) repeats the insufficient reasoning already rejected in Q69. Q71. What is the key factual distinction between the original scenario (Q68) and the forty-kilometre detour scenario (Q69) that determines the different outcomes? (A) The type of vehicle used (B) The degree and purpose of departure from assigned employment duties (C) The time of day the accident occurred (D) Whether the other driver was injured ANSWER: B EXPLANATION: This is the doctrinal distinction the principle turns on. (A), (C), (D) are not the relevant factors under the principle. Which of the following best reflects the underlying rationale for vicarious liability as described?

(A) Employers should bear responsibility for risks created by employees acting within the scope of work they assigned, but not for employees' wholly personal, unconnected conduct ☐

- (B) Employers are liable for any act by an employee at any time
- (C) Employees are never personally liable if vicarious liability applies
- (D) Vicarious liability applies only to driving-related torts

Correct Answer: (A)

Explanation:

Direct synthesis of the stated principle. (B) contradicts the frolic exception. (C) is an unsupported affirmative claim the passage never makes. (D) unsupportedly narrows the principle, which is stated generally as "a tort."

Q21.

Principle: A person may use reasonable force to protect himself or his property from an imminent unlawful attack. The right does not extend to force in excess of what is necessary to repel the attack, nor does it continue once the attacker has retreated or the threat has ceased. The right is not available where the person claiming it was the original aggressor, unless he has clearly withdrawn from the conflict and communicated that withdrawal, and is still pursued. Facts: During a heated argument, Arjun pushed Vikram first, without provocation. Vikram, in response, punched Arjun once, causing Arjun to fall back and stop advancing. Arjun then got up and struck Vikram twice more with a metal rod, causing serious injury. Can Arjun claim the right of private defence for his later actions with the metal rod?

- (A) Yes, because Vikram punched him first

(B) No, because Arjun was the original aggressor and had not withdrawn from the conflict or been the subject of a continuing/renewed unlawful threat justifying such force ☐

- (C) Yes, because he used a rod only after being punched

(D) No, because metal rods can never be used in self-defence

Correct Answer: (B)

Explanation:

Arjun was the initial aggressor and the facts show no withdrawal. (A), (C) ignore the "original aggressor" bar. (D) is an overbroad absolute rule not stated in the principle.

Q22.

Principle: A person may use reasonable force to protect himself or his property from an imminent unlawful attack. The right does not extend to force in excess of what is necessary to repel the attack, nor does it continue once the attacker has retreated or the threat has ceased. The right is not available where the person claiming it was the original aggressor, unless he has clearly withdrawn from the conflict and communicated that withdrawal, and is still pursued. Facts: During a heated argument, Arjun pushed Vikram first, without provocation. Vikram, in response, punched Arjun once, causing Arjun to fall back and stop advancing. Arjun then got up and struck Vikram twice more with a metal rod, causing serious injury. Q73. Can Arjun claim the right of private defence for his later actions with the metal rod? (A) Yes, because Vikram punched him first (B) No, because Arjun was the original aggressor and had not withdrawn from the conflict or been the subject of a continuing/renewed unlawful threat justifying such force (C) Yes, because he used a rod only after being punched (D) No, because metal rods can never be used in self-defence ANSWER: B EXPLANATION: Arjun was the initial aggressor and the facts show no withdrawal. (A), (C) ignore the "original aggressor" bar. (D) is an overbroad absolute rule not stated in the principle. Suppose instead Vikram, after being pushed, punched Arjun, and Arjun immediately raised both hands, said "I'm done, I don't want to fight," and began walking away — after which Vikram chased him down and punched him again. Could Arjun now claim private defence if he defends himself during this chase?

(A) No, because Arjun was still the original aggressor with no exception available

(B) Yes, because Arjun clearly withdrew and communicated that withdrawal, and Vikram's pursuit constitutes a new unlawful attack against which defence is available ☐

(C) No, because private defence never applies once a person has been struck once already

(D) Yes, but only if Arjun uses exactly the same level of force Vikram used

Correct Answer: (B)

Explanation:

Directly tracks the stated exception for clear, communicated withdrawal followed by continued pursuit. (A) ignores this exception. (C) invents an unsupported rule. (D) adds a force-mirroring requirement not stated — only reasonableness/necessity is required.

Q23.

Principle: A person may use reasonable force to protect himself or his property from an imminent unlawful attack. The right does not extend to force in excess of what is necessary to repel the attack, nor does it continue once the attacker has retreated or the threat has ceased. The right is not available where the person claiming it was the original aggressor, unless he has clearly withdrawn from the conflict and communicated that withdrawal, and is still pursued. Facts: During a heated argument, Arjun pushed Vikram first, without provocation. Vikram, in response, punched Arjun once, causing Arjun to fall back and stop advancing. Arjun then got up and struck Vikram twice more with a metal rod, causing serious injury. Q73. Can Arjun claim the right of private defence for his later actions with the metal rod? (A) Yes, because Vikram punched him first (B) No, because Arjun was the original aggressor and had not withdrawn from the conflict or been the subject of a continuing/renewed

unlawful threat justifying such force (C) Yes, because he used a rod only after being punched (D) No, because metal rods can never be used in self-defence ANSWER: B EXPLANATION: Arjun was the initial aggressor and the facts show no withdrawal. (A), (C) ignore the "original aggressor" bar. (D) is an overbroad absolute rule not stated in the principle. Q74. Suppose instead Vikram, after being pushed, punched Arjun, and Arjun immediately raised both hands, said "I'm done, I don't want to fight," and began walking away — after which Vikram chased him down and punched him again. Could Arjun now claim private defence if he defends himself during this chase? (A) No, because Arjun was still the original aggressor with no exception available (B) Yes, because Arjun clearly withdrew and communicated that withdrawal, and Vikram's pursuit constitutes a new unlawful attack against which defence is available (C) No, because private defence never applies once a person has been struck once already (D) Yes, but only if Arjun uses exactly the same level of force Vikram used ANSWER: B EXPLANATION: Directly tracks the stated exception for clear, communicated withdrawal followed by continued pursuit. (A) ignores this exception. (C) invents an unsupported rule. (D) adds a force-mirroring requirement not stated — only reasonableness/necessity is required. In the original facts, suppose Vikram — not Arjun — sought to claim private defence for his single punch, given that he faced Arjun's initial unprovoked push. Would this claim likely succeed?

(A) No, because Vikram cannot invoke private defence unless he was attacked with a weapon

(B) Yes, Vikram could potentially claim private defence, since he faced an imminent unlawful attack and was not the aggressor ☐

(C) No, private defence is only available to the original aggressor

(D) Yes, but only if Vikram used a weapon of the same type as Arjun

Correct Answer: (B)

Explanation:

Vikram, not being the aggressor and facing an imminent unlawful attack (the push), may claim private defence.

(A) wrongly requires a weaponed attack — the principle requires only an "imminent unlawful attack." (C) inverts the principle (aggressors are barred, not privileged). (D) invents an unsupported weapon-parity condition.

Q24.

Principle: A person may use reasonable force to protect himself or his property from an imminent unlawful attack. The right does not extend to force in excess of what is necessary to repel the attack, nor does it continue once the attacker has retreated or the threat has ceased. The right is not available where the person claiming it was the original aggressor, unless he has clearly withdrawn from the conflict and communicated that withdrawal, and is still pursued. Facts: During a heated argument, Arjun pushed Vikram first, without provocation. Vikram, in response, punched Arjun once, causing Arjun to fall back and stop advancing. Arjun then got up and struck Vikram twice more with a metal rod, causing serious injury. Q73. Can Arjun claim the right of private defence for his later actions with the metal rod? (A) Yes, because Vikram punched him first (B) No, because Arjun was the original aggressor and had not withdrawn from the conflict or been the subject of a continuing/renewed unlawful threat justifying such force (C) Yes, because he used a rod only after being punched (D) No, because metal rods can never be used in self-defence ANSWER: B EXPLANATION: Arjun was the initial aggressor and the facts show no withdrawal. (A), (C) ignore the "original aggressor" bar. (D) is an overbroad absolute rule not stated in the principle. Q74. Suppose instead Vikram, after being pushed, punched Arjun, and Arjun immediately raised both hands, said "I'm done, I don't want to fight," and began walking away — after which Vikram chased him down and punched him again. Could Arjun now claim private defence if he defends himself during this chase? (A) No, because Arjun was still the original aggressor with no exception available (B) Yes, because Arjun clearly withdrew and communicated that withdrawal, and Vikram's pursuit constitutes a new unlawful attack against which

defence is available (C) No, because private defence never applies once a person has been struck once already (D) Yes, but only if Arjun uses exactly the same level of force Vikram used ANSWER: B EXPLANATION: Directly tracks the stated exception for clear, communicated withdrawal followed by continued pursuit. (A) ignores this exception. (C) invents an unsupported rule. (D) adds a force-mirroring requirement not stated — only reasonableness/necessity is required. Q75. In the original facts, suppose Vikram — not Arjun — sought to claim private defence for his single punch, given that he faced Arjun's initial unprovoked push. Would this claim likely succeed? (A) No, because Vikram cannot invoke private defence unless he was attacked with a weapon (B) Yes, Vikram could potentially claim private defence, since he faced an imminent unlawful attack and was not the aggressor (C) No, private defence is only available to the original aggressor (D) Yes, but only if Vikram used a weapon of the same type as Arjun ANSWER: B EXPLANATION: Vikram, not being the aggressor and facing an imminent unlawful attack (the push), may claim private defence. (A) wrongly requires a weaponed attack — the principle requires only an "imminent unlawful attack." (C) inverts the principle (aggressors are barred, not privileged). (D) invents an unsupported weapon-parity condition. What is the primary limiting condition on the right of private defence described in the principle?

(A) It must be proportionate/necessary and must cease once the threat ends □

- (B) It can be used pre-emptively at any time a person feels uneasy
- (C) It applies only to defence of property, not person
- (D) It has no limits once a person has been struck once

Correct Answer: (A)

Explanation:

Direct restatement. (B) contradicts the "imminent" requirement. (C) contradicts the principle covering both person and property. (D) contradicts the explicit cessation language.

Q25.

Principle: A person may use reasonable force to protect himself or his property from an imminent unlawful attack. The right does not extend to force in excess of what is necessary to repel the attack, nor does it continue once the attacker has retreated or the threat has ceased. The right is not available where the person claiming it was the original aggressor, unless he has clearly withdrawn from the conflict and communicated that withdrawal, and is still pursued. Facts: During a heated argument, Arjun pushed Vikram first, without provocation. Vikram, in response, punched Arjun once, causing Arjun to fall back and stop advancing. Arjun then got up and struck Vikram twice more with a metal rod, causing serious injury. Q73. Can Arjun claim the right of private defence for his later actions with the metal rod? (A) Yes, because Vikram punched him first (B) No, because Arjun was the original aggressor and had not withdrawn from the conflict or been the subject of a continuing/renewed unlawful threat justifying such force (C) Yes, because he used a rod only after being punched (D) No, because metal rods can never be used in self-defence ANSWER: B EXPLANATION: Arjun was the initial aggressor and the facts show no withdrawal. (A), (C) ignore the "original aggressor" bar. (D) is an overbroad absolute rule not stated in the principle. Q74. Suppose instead Vikram, after being pushed, punched Arjun, and Arjun immediately raised both hands, said "I'm done, I don't want to fight," and began walking away — after which Vikram chased him down and punched him again. Could Arjun now claim private defence if he defends himself during this chase? (A) No, because Arjun was still the original aggressor with no exception available (B) Yes, because Arjun clearly withdrew and communicated that withdrawal, and Vikram's pursuit constitutes a new unlawful attack against which defence is available (C) No, because private defence never applies once a person has been struck once already (D) Yes, but only if Arjun uses exactly the same level of force Vikram used ANSWER: B EXPLANATION: Directly tracks the stated exception for clear, communicated withdrawal followed by

continued pursuit. (A) ignores this exception. (C) invents an unsupported rule. (D) adds a force-mirroring requirement not stated — only reasonableness/necessity is required. Q75. In the original facts, suppose Vikram — not Arjun — sought to claim private defence for his single punch, given that he faced Arjun's initial unprovoked push. Would this claim likely succeed? (A) No, because Vikram cannot invoke private defence unless he was attacked with a weapon (B) Yes, Vikram could potentially claim private defence, since he faced an imminent unlawful attack and was not the aggressor (C) No, private defence is only available to the original aggressor (D) Yes, but only if Vikram used a weapon of the same type as Arjun ANSWER: B EXPLANATION: Vikram, not being the aggressor and facing an imminent unlawful attack (the push), may claim private defence. (A) wrongly requires a weaponed attack — the principle requires only an "imminent unlawful attack." (C) inverts the principle (aggressors are barred, not privileged). (D) invents an unsupported weapon-parity condition. Q76. What is the primary limiting condition on the right of private defence described in the principle? (A) It must be proportionate/necessary and must cease once the threat ends (B) It can be used pre-emptively at any time a person feels uneasy (C) It applies only to defence of property, not person (D) It has no limits once a person has been struck once ANSWER: A EXPLANATION: Direct restatement. (B) contradicts the "imminent" requirement. (C) contradicts the principle covering both person and property. (D) contradicts the explicit cessation language. Based on the principle, which of the following would most clearly fall outside the scope of permissible private defence?

(A) Striking an attacker once, with reasonable force, while he is mid-swing toward you

(B) Continuing to strike a person who has already fallen unconscious and poses no further threat ☐

(C) Pushing away someone who has grabbed your arm and refuses to let go

(D) Using a nearby object to block a physical strike aimed at you

Correct Answer: (B)

Explanation:

Directly matches "does not continue once... the threat has ceased" — an unconscious person poses no threat.

(A), (C), (D) are all reasonable, necessary responses to an ongoing threat.

Q26.

Principle: A service provider is liable for "deficiency in service" if the service rendered falls short of the quality, nature, or manner promised, or of the standard required by law or contract, regardless of the provider's intent to deceive. Mere delay caused by circumstances entirely beyond the provider's control (and not otherwise warranted against) does not, by itself, amount to deficiency. Facts: A courier company promised "guaranteed next-day delivery" for a shipment, charging a premium for this guarantee. The package arrived four days late because the company's own sorting facility was mismanaged and understaffed that week, causing widespread delays across many shipments. Is the courier company liable for deficiency in service?

(A) No, because delays happen in every courier business

(B) Yes, because the failure to meet the explicitly promised standard resulted from the company's own operational shortcomings, not circumstances beyond its control ☐

(C) No, because the company did not intend to deceive the customer

(D) Yes, but only if the customer proves financial loss

Correct Answer: (B)

Explanation:

Matches the principle: falling short of a promised standard due to internal mismanagement, not a beyond-control circumstance. (A) is a generic excuse. (C) is explicitly contradicted ("regardless of the provider's

intent to deceive"). (D) adds an unsupported requirement.

Q27.

Principle: A service provider is liable for "deficiency in service" if the service rendered falls short of the quality, nature, or manner promised, or of the standard required by law or contract, regardless of the provider's intent to deceive. Mere delay caused by circumstances entirely beyond the provider's control (and not otherwise warranted against) does not, by itself, amount to deficiency. Facts: A courier company promised "guaranteed next-day delivery" for a shipment, charging a premium for this guarantee. The package arrived four days late because the company's own sorting facility was mismanaged and understaffed that week, causing widespread delays across many shipments. Q78. Is the courier company liable for deficiency in service? (A) No, because delays happen in every courier business (B) Yes, because the failure to meet the explicitly promised standard resulted from the company's own operational shortcomings, not circumstances beyond its control (C) No, because the company did not intend to deceive the customer (D) Yes, but only if the customer proves financial loss ANSWER: B EXPLANATION: Matches the principle: falling short of a promised standard due to internal mismanagement, not a beyond-control circumstance. (A) is a generic excuse. (C) is explicitly contradicted ("regardless of the provider's intent to deceive"). (D) adds an unsupported requirement. Suppose instead the four-day delay was caused entirely by an unprecedented, region-wide highway closure due to a natural disaster, with no fault from the courier company's own operations. Would the company be liable?

(A) Yes, because "guaranteed" delivery means no excuses are ever accepted

(B) No, this would likely fall under circumstances entirely beyond the provider's control, which the principle excludes from mere-delay liability ☐

(C) Yes, because premium charges always create absolute liability

(D) No, because natural disasters are never covered by consumer protection law generally

Correct Answer: (B)

Explanation:

Directly matches the stated carve-out. (A) contradicts it. (C) invents an unsupported rule. (D) is an overbroad claim beyond what the principle states.

Q28.

Principle: A service provider is liable for "deficiency in service" if the service rendered falls short of the quality, nature, or manner promised, or of the standard required by law or contract, regardless of the provider's intent to deceive. Mere delay caused by circumstances entirely beyond the provider's control (and not otherwise warranted against) does not, by itself, amount to deficiency. Facts: A courier company promised "guaranteed next-day delivery" for a shipment, charging a premium for this guarantee. The package arrived four days late because the company's own sorting facility was mismanaged and understaffed that week, causing widespread delays across many shipments. Q78. Is the courier company liable for deficiency in service? (A) No, because delays happen in every courier business (B) Yes, because the failure to meet the explicitly promised standard resulted from the company's own operational shortcomings, not circumstances beyond its control (C) No, because the company did not intend to deceive the customer (D) Yes, but only if the customer proves financial loss ANSWER: B EXPLANATION: Matches the principle: falling short of a promised standard due to internal mismanagement, not a beyond-control circumstance. (A) is a generic excuse. (C) is explicitly contradicted ("regardless of the provider's intent to deceive"). (D) adds an unsupported requirement. Q79. Suppose instead the four-day delay was caused entirely by an unprecedented, region-wide

highway closure due to a natural disaster, with no fault from the courier company's own operations. Would the company be liable? (A) Yes, because "guaranteed" delivery means no excuses are ever accepted (B) No, this would likely fall under circumstances entirely beyond the provider's control, which the principle excludes from mere-delay liability (C) Yes, because premium charges always create absolute liability (D) No, because natural disasters are never covered by consumer protection law generally ANSWER: B EXPLANATION: Directly matches the stated carve-out. (A) contradicts it. (C) invents an unsupported rule. (D) is an overbroad claim beyond what the principle states. What is the central distinction the principle draws in determining liability for delay-related deficiency?

(A) Whether the customer paid a premium price

(B) Whether the delay resulted from the provider's own shortcomings versus circumstances truly beyond its control ☒

(C) Whether the delay exceeded exactly three days

(D) Whether the provider apologized to the customer

Correct Answer: (B)

Explanation:

Direct restatement of the core distinction. (A), (C), (D) are not stated as relevant factors.

Logical Reasoning

Q1.

A city council argues: "Our downtown parking shortage should be solved by building a new multi-storey parking garage. Once commuters have guaranteed parking, they will stop double-parking on side streets, easing congestion throughout downtown." A transit advocacy group responds that building more parking will, in fact, increase the number of cars entering downtown, since easier parking makes driving more attractive relative to public transit — potentially worsening congestion despite eliminating double-parking specifically. Which of the following, if true, would most strengthen the city council's argument?

- (A) Studies show that new parking garages in comparable cities led to a net increase in downtown traffic
- (B) Most current double-parking incidents are caused by delivery trucks, not commuters seeking parking
- (C) A survey shows the majority of downtown commuters already avoid driving due to lack of parking, and would switch back to driving only marginally if parking were guaranteed** ☐
- (D) The proposed garage will take three years to construct

Correct Answer: (C)

Explanation:

If commuters would switch back "only marginally," this directly undercuts the transit group's rebuttal while supporting the council's specific claim about reduced double-parking. (A) strengthens the opposing view. (B) weakens the council's argument. (D) is irrelevant to either argument's strength.

Q2.

A city council argues: "Our downtown parking shortage should be solved by building a new multi-storey parking garage. Once commuters have guaranteed parking, they will stop double-parking on side streets, easing congestion throughout downtown." A transit advocacy group responds that building more parking will, in fact, increase the number of cars entering downtown, since easier parking makes driving more attractive relative to public transit — potentially worsening congestion despite eliminating double-parking specifically. Q81. Which of the following, if true, would most strengthen the city council's argument? (A) Studies show that new parking garages in comparable cities led to a net increase in downtown traffic (B) Most current double-parking incidents are caused by delivery trucks, not commuters seeking parking (C) A survey shows the majority of downtown commuters already avoid driving due to lack of parking, and would switch back to driving only marginally if parking were guaranteed (D) The proposed garage will take three years to construct ANSWER: C EXPLANATION: If commuters would switch back "only marginally," this directly undercuts the transit group's rebuttal while supporting the council's specific claim about reduced double-parking. (A) strengthens the opposing view. (B) weakens the council's argument. (D) is irrelevant to either argument's strength. Which of the following is an assumption underlying the transit advocacy group's response?

- (A) Public transit capacity is currently underused
- (B) Easier parking availability has a meaningful effect on individuals' choice to drive rather than use transit** ☐
- (C) The new garage will be more expensive than expected
- (D) Double-parking is not a real problem

Correct Answer: (B)

Explanation:

The rebuttal's logic only holds if parking ease actually influences the drive-vs-transit decision. (A) is not necessary for the argument. (C) is irrelevant. (D) contradicts the group's own response, which does not deny the double-parking problem.

Q3.

A city council argues: "Our downtown parking shortage should be solved by building a new multi-storey parking garage. Once commuters have guaranteed parking, they will stop double-parking on side streets, easing congestion throughout downtown." A transit advocacy group responds that building more parking will, in fact, increase the number of cars entering downtown, since easier parking makes driving more attractive relative to public transit — potentially worsening congestion despite eliminating double-parking specifically. Q81. Which of the following, if true, would most strengthen the city council's argument? (A) Studies show that new parking garages in comparable cities led to a net increase in downtown traffic (B) Most current double-parking incidents are caused by delivery trucks, not commuters seeking parking (C) A survey shows the majority of downtown commuters already avoid driving due to lack of parking, and would switch back to driving only marginally if parking were guaranteed (D) The proposed garage will take three years to construct ANSWER: C EXPLANATION: If commuters would switch back "only marginally," this directly undercuts the transit group's rebuttal while supporting the council's specific claim about reduced double-parking. (A) strengthens the opposing view. (B) weakens the council's argument. (D) is irrelevant to either argument's strength. Q82. Which of the following is an assumption underlying the transit advocacy group's response? (A) Public transit capacity is currently underused (B) Easier parking availability has a meaningful effect on individuals' choice to drive rather than use transit (C) The new garage will be more expensive than expected (D) Double-parking is not a real problem ANSWER: B EXPLANATION: The rebuttal's logic only holds if parking ease actually influences the drive-vs-transit decision. (A) is not necessary for the argument. (C) is irrelevant. (D) contradicts the group's own response, which does not deny the double-parking problem. Which of the following best identifies the central point of disagreement between the two parties?

- (A) Whether downtown congestion is a real problem
- (B) Whether the parking garage will be structurally safe

(C) Whether increased parking supply will reduce or increase overall downtown vehicle congestion □

- (D) Whether public transit should be free

Correct Answer: (C)

Explanation:

This net-effect question is the crux of the disagreement. (A), (B), (D) are not addressed by either party.

Q4.

A city council argues: "Our downtown parking shortage should be solved by building a new multi-storey parking garage. Once commuters have guaranteed parking, they will stop double-parking on side streets, easing congestion throughout downtown." A transit advocacy group responds that building more parking will, in fact, increase the number of cars entering downtown, since easier parking makes driving more attractive relative to public transit — potentially worsening congestion despite eliminating double-parking specifically. Q81. Which of the following, if true, would most strengthen the city council's argument? (A) Studies show that new parking garages in comparable cities led to a net increase in downtown traffic (B) Most current double-parking incidents are caused by delivery trucks, not commuters seeking parking (C) A survey shows the majority of downtown commuters already

avoid driving due to lack of parking, and would switch back to driving only marginally if parking were guaranteed (D) The proposed garage will take three years to construct ANSWER: C EXPLANATION: If commuters would switch back "only marginally," this directly undercuts the transit group's rebuttal while supporting the council's specific claim about reduced double-parking. (A) strengthens the opposing view. (B) weakens the council's argument. (D) is irrelevant to either argument's strength. Q82. Which of the following is an assumption underlying the transit advocacy group's response? (A) Public transit capacity is currently underused (B) Easier parking availability has a meaningful effect on individuals' choice to drive rather than use transit (C) The new garage will be more expensive than expected (D) Double-parking is not a real problem ANSWER: B EXPLANATION: The rebuttal's logic only holds if parking ease actually influences the drive-vs-transit decision. (A) is not necessary for the argument. (C) is irrelevant. (D) contradicts the group's own response, which does not deny the double-parking problem. Q83. Which of the following best identifies the central point of disagreement between the two parties? (A) Whether downtown congestion is a real problem (B) Whether the parking garage will be structurally safe (C) Whether increased parking supply will reduce or increase overall downtown vehicle congestion (D) Whether public transit should be free ANSWER: C EXPLANATION: This net-effect question is the crux of the disagreement. (A), (B), (D) are not addressed by either party. Suppose it is later found that 90% of current downtown commuters already own cars and drive when convenient, regardless of parking guarantees. How does this affect the transit group's argument?

(A) It strengthens the argument, since more drivers means more potential congestion

(B) It weakens the argument, since it suggests driving behavior is already largely fixed and not very sensitive to parking availability □

(C) It has no bearing on the argument either way

(D) It strengthens the council's original claim about safety

Correct Answer: (B)

Explanation:

The transit group's argument depends on parking availability meaningfully shifting behavior; if driving is already fixed, that causal mechanism weakens. (A) misreads the fact. (C) ignores its relevance. (D) references an issue (safety) never raised in the passage.

Q5.

A city council argues: "Our downtown parking shortage should be solved by building a new multi-storey parking garage. Once commuters have guaranteed parking, they will stop double-parking on side streets, easing congestion throughout downtown." A transit advocacy group responds that building more parking will, in fact, increase the number of cars entering downtown, since easier parking makes driving more attractive relative to public transit — potentially worsening congestion despite eliminating double-parking specifically. Q81. Which of the following, if true, would most strengthen the city council's argument? (A) Studies show that new parking garages in comparable cities led to a net increase in downtown traffic (B) Most current double-parking incidents are caused by delivery trucks, not commuters seeking parking (C) A survey shows the majority of downtown commuters already avoid driving due to lack of parking, and would switch back to driving only marginally if parking were guaranteed (D) The proposed garage will take three years to construct ANSWER: C EXPLANATION: If commuters would switch back "only marginally," this directly undercuts the transit group's rebuttal while supporting the council's specific claim about reduced double-parking. (A) strengthens the opposing view. (B) weakens the council's argument. (D) is irrelevant to either argument's strength. Q82. Which of the following is an assumption underlying the transit advocacy group's response? (A) Public transit capacity is currently underused (B) Easier parking availability has a meaningful effect on individuals' choice to drive rather than use transit (C) The new garage will be more expensive than

expected (D) Double-parking is not a real problem ANSWER: B EXPLANATION: The rebuttal's logic only holds if parking ease actually influences the drive-vs-transit decision. (A) is not necessary for the argument. (C) is irrelevant. (D) contradicts the group's own response, which does not deny the double-parking problem. Q83. Which of the following best identifies the central point of disagreement between the two parties? (A) Whether downtown congestion is a real problem (B) Whether the parking garage will be structurally safe (C) Whether increased parking supply will reduce or increase overall downtown vehicle congestion (D) Whether public transit should be free ANSWER: C EXPLANATION: This net-effect question is the crux of the disagreement. (A), (B), (D) are not addressed by either party. Q84. Suppose it is later found that 90% of current downtown commuters already own cars and drive when convenient, regardless of parking guarantees. How does this affect the transit group's argument? (A) It strengthens the argument, since more drivers means more potential congestion (B) It weakens the argument, since it suggests driving behavior is already largely fixed and not very sensitive to parking availability (C) It has no bearing on the argument either way (D) It strengthens the council's original claim about safety ANSWER: B EXPLANATION: The transit group's argument depends on parking availability meaningfully shifting behavior; if driving is already fixed, that causal mechanism weakens. (A) misreads the fact. (C) ignores its relevance. (D) references an issue (safety) never raised in the passage. Which of the following, if true, would most weaken the city council's argument specifically (not the general debate)?

(A) The garage will have adequate lighting and security

(B) A large proportion of double-parking incidents downtown are unrelated to a lack of parking spaces, but instead due to poor road signage □

(C) The garage will be built using sustainable materials

(D) Nearby cities have similar garages

Correct Answer: (B)

Explanation:

The council's argument depends on double-parking being caused by a parking shortage; if it is instead mostly caused by signage issues, the garage would not address the actual cause. (A), (C), (D) are irrelevant.

Q6.

An education researcher observes that students who receive private tutoring score, on average, 15% higher on standardized tests than students who do not. The researcher concludes that private tutoring causes higher test scores, and recommends that all schools subsidize tutoring for every student to raise overall performance. Which of the following, if true, would most weaken the researcher's causal conclusion?

(A) Students who receive tutoring tend to come from families with more resources and educational support at home, which independently correlates with higher test performance □

(B) The gap between tutored and untutored students has remained stable for the past five years

(C) Tutoring companies advertise heavily to high-income neighborhoods

(D) Some tutoring sessions are conducted online rather than in person

Correct Answer: (A)

Explanation:

Classic confounding variable, directly undermining the causal claim by proposing a third factor. (B) doesn't address the causal mechanism. (C), (D) are irrelevant to test outcomes.

Q7.

An education researcher observes that students who receive private tutoring score, on average, 15% higher on standardized tests than students who do not. The researcher concludes that private tutoring causes higher test scores, and recommends that all schools subsidize tutoring for every student to raise overall performance. Q86. Which of the following, if true, would most weaken the researcher's causal conclusion? (A) Students who receive tutoring tend to come from families with more resources and educational support at home, which independently correlates with higher test performance (B) The gap between tutored and untutored students has remained stable for the past five years (C) Tutoring companies advertise heavily to high-income neighborhoods (D) Some tutoring sessions are conducted online rather than in person ANSWER: A EXPLANATION: Classic confounding variable, directly undermining the causal claim by proposing a third factor. (B) doesn't address the causal mechanism. (C), (D) are irrelevant to test outcomes. Which of the following, if true, would most strengthen the researcher's causal conclusion?

(A) A randomized controlled trial found that students randomly assigned to receive tutoring scored significantly higher than a similar, randomly assigned control group that received no tutoring ☐

- (B) Wealthier school districts have higher average test scores overall
- (C) Tutoring is more popular in urban areas than rural areas
- (D) The tutoring industry has grown substantially over the past decade

Correct Answer: (A)

Explanation:

Random assignment eliminates the confounding-variable problem, directly supporting causation. (B), (C), (D) are correlational/contextual facts that don't isolate causation.

Q8.

An education researcher observes that students who receive private tutoring score, on average, 15% higher on standardized tests than students who do not. The researcher concludes that private tutoring causes higher test scores, and recommends that all schools subsidize tutoring for every student to raise overall performance. Q86. Which of the following, if true, would most weaken the researcher's causal conclusion? (A) Students who receive tutoring tend to come from families with more resources and educational support at home, which independently correlates with higher test performance (B) The gap between tutored and untutored students has remained stable for the past five years (C) Tutoring companies advertise heavily to high-income neighborhoods (D) Some tutoring sessions are conducted online rather than in person ANSWER: A EXPLANATION: Classic confounding variable, directly undermining the causal claim by proposing a third factor. (B) doesn't address the causal mechanism. (C), (D) are irrelevant to test outcomes. Q87. Which of the following, if true, would most strengthen the researcher's causal conclusion? (A) A randomized controlled trial found that students randomly assigned to receive tutoring scored significantly higher than a similar, randomly assigned control group that received no tutoring (B) Wealthier school districts have higher average test scores overall (C) Tutoring is more popular in urban areas than rural areas (D) The tutoring industry has grown substantially over the past decade ANSWER: A EXPLANATION: Random assignment eliminates the confounding-variable problem, directly supporting causation. (B), (C), (D) are correlational/contextual facts that don't isolate causation. What is the key flaw in the researcher's reasoning as originally presented?

- (A) The researcher used too small a sample size

(B) The researcher inferred causation from a mere correlation, without ruling out confounding factors ☐

- (C) The researcher's data was collected illegally
- (D) The researcher did not consider international test data

Correct Answer: (B)

Explanation:

Matches the fundamental correlation-causation gap. (A), (C), (D) are not indicated as issues anywhere in the passage.

Q9.

An education researcher observes that students who receive private tutoring score, on average, 15% higher on standardized tests than students who do not. The researcher concludes that private tutoring causes higher test scores, and recommends that all schools subsidize tutoring for every student to raise overall performance. Q86. Which of the following, if true, would most weaken the researcher's causal conclusion? (A) Students who receive tutoring tend to come from families with more resources and educational support at home, which independently correlates with higher test performance (B) The gap between tutored and untutored students has remained stable for the past five years (C) Tutoring companies advertise heavily to high-income neighborhoods (D) Some tutoring sessions are conducted online rather than in person ANSWER: A EXPLANATION: Classic confounding variable, directly undermining the causal claim by proposing a third factor. (B) doesn't address the causal mechanism. (C), (D) are irrelevant to test outcomes. Q87. Which of the following, if true, would most strengthen the researcher's causal conclusion? (A) A randomized controlled trial found that students randomly assigned to receive tutoring scored significantly higher than a similar, randomly assigned control group that received no tutoring (B) Wealthier school districts have higher average test scores overall (C) Tutoring is more popular in urban areas than rural areas (D) The tutoring industry has grown substantially over the past decade ANSWER: A EXPLANATION: Random assignment eliminates the confounding-variable problem, directly supporting causation. (B), (C), (D) are correlational/contextual facts that don't isolate causation. Q88. What is the key flaw in the researcher's reasoning as originally presented? (A) The researcher used too small a sample size (B) The researcher inferred causation from a mere correlation, without ruling out confounding factors (C) The researcher's data was collected illegally (D) The researcher did not consider international test data ANSWER: B EXPLANATION: Matches the fundamental correlation-causation gap. (A), (C), (D) are not indicated as issues anywhere in the passage. The researcher's recommendation to "subsidize tutoring for every student" would be best supported if which additional assumption were true?

(A) The observed score gap is primarily driven by tutoring itself, rather than by unmeasured factors correlated with who receives tutoring ☐

- (B) All schools have equal budgets
- (C) Every student wants to receive tutoring
- (D) Test scores are the only measure of student success

Correct Answer: (A)

Explanation:

This is precisely the assumption the recommendation depends on. (B), (C), (D) are not necessary for the causal logic specifically.

Q10.

An education researcher observes that students who receive private tutoring score, on average, 15% higher on standardized tests than students who do not. The researcher concludes that private tutoring causes higher test scores, and recommends that all schools subsidize tutoring for every student to

raise overall performance. Q86. Which of the following, if true, would most weaken the researcher's causal conclusion? (A) Students who receive tutoring tend to come from families with more resources and educational support at home, which independently correlates with higher test performance (B) The gap between tutored and untutored students has remained stable for the past five years (C) Tutoring companies advertise heavily to high-income neighborhoods (D) Some tutoring sessions are conducted online rather than in person ANSWER: A EXPLANATION: Classic confounding variable, directly undermining the causal claim by proposing a third factor. (B) doesn't address the causal mechanism. (C), (D) are irrelevant to test outcomes. Q87. Which of the following, if true, would most strengthen the researcher's causal conclusion? (A) A randomized controlled trial found that students randomly assigned to receive tutoring scored significantly higher than a similar, randomly assigned control group that received no tutoring (B) Wealthier school districts have higher average test scores overall (C) Tutoring is more popular in urban areas than rural areas (D) The tutoring industry has grown substantially over the past decade ANSWER: A EXPLANATION: Random assignment eliminates the confounding-variable problem, directly supporting causation. (B), (C), (D) are correlational/contextual facts that don't isolate causation. Q88. What is the key flaw in the researcher's reasoning as originally presented? (A) The researcher used too small a sample size (B) The researcher inferred causation from a mere correlation, without ruling out confounding factors (C) The researcher's data was collected illegally (D) The researcher did not consider international test data ANSWER: B EXPLANATION: Matches the fundamental correlation-causation gap. (A), (C), (D) are not indicated as issues anywhere in the passage. Q89. The researcher's recommendation to "subsidize tutoring for every student" would be best supported if which additional assumption were true? (A) The observed score gap is primarily driven by tutoring itself, rather than by unmeasured factors correlated with who receives tutoring (B) All schools have equal budgets (C) Every student wants to receive tutoring (D) Test scores are the only measure of student success ANSWER: A EXPLANATION: This is precisely the assumption the recommendation depends on. (B), (C), (D) are not necessary for the causal logic specifically. Suppose a follow-up study found that when families with similar income and parental education levels were compared, the tutored group still scored meaningfully higher than the untutored group. How does this affect the original weakening argument (Q86)?

(A) It fully confirms the weakening argument

(B) It weakens the weakening argument, since it controls for the very confounding factor (family resources/support) that was proposed ☐

(C) It has no relevance to either argument

(D) It proves tutoring is harmful

Correct Answer: (B)

Explanation:

Controlling for the confound and still finding an effect undercuts the specific weakening argument. (A) overstates finality. (C) ignores clear relevance. (D) is unsupported by the facts given.

Q11.

A city library reports that in-person visits have declined by 40% over the past five years, while its budget has remained flat. The library director proposes closing two of the library's five neighborhood branches to consolidate resources into the three busiest locations, arguing this will improve service quality at the remaining branches without requiring additional funding. Which of the following, if true, would most strongly support the director's proposal?

(A) The two branches proposed for closure have seen the sharpest declines in visits and are located within walking distance of one of the three remaining branches ☐

- (B) The library's total book collection has grown in the past five years
- (C) The city's population has grown by 10% over the past five years
- (D) Library staff have received positive performance reviews

Correct Answer: (A)

Explanation:

Directly supports the specific rationale — targeting low-use branches whose patrons have a viable nearby alternative. (B), (C), (D) do not address whether closing specifically those two branches serves patrons well.

Q12.

A city library reports that in-person visits have declined by 40% over the past five years, while its budget has remained flat. The library director proposes closing two of the library's five neighborhood branches to consolidate resources into the three busiest locations, arguing this will improve service quality at the remaining branches without requiring additional funding. Q91. Which of the following, if true, would most strongly support the director's proposal? (A) The two branches proposed for closure have seen the sharpest declines in visits and are located within walking distance of one of the three remaining branches (B) The library's total book collection has grown in the past five years (C) The city's population has grown by 10% over the past five years (D) Library staff have received positive performance reviews ANSWER: A EXPLANATION: Directly supports the specific rationale — targeting low-use branches whose patrons have a viable nearby alternative. (B), (C), (D) do not address whether closing specifically those two branches serves patrons well. Which of the following, if true, would most undermine the director's proposal?

(A) One of the two branches proposed for closure is the only library location accessible by public transit for a large, low-income neighborhood with no nearby alternative □

- (B) The remaining three branches have slightly larger parking lots
- (C) The library board has approved budget increases in the past
- (D) Total visits across the entire city have declined, not just at these two branches

Correct Answer: (A)

Explanation:

Identifies that closing this specific branch would eliminate access for an underserved population with no alternative, undermining the "without harming service" claim. (B), (C) are irrelevant. (D) somewhat supports the general consolidation logic rather than undermining it.

Q13.

A city library reports that in-person visits have declined by 40% over the past five years, while its budget has remained flat. The library director proposes closing two of the library's five neighborhood branches to consolidate resources into the three busiest locations, arguing this will improve service quality at the remaining branches without requiring additional funding. Q91. Which of the following, if true, would most strongly support the director's proposal? (A) The two branches proposed for closure have seen the sharpest declines in visits and are located within walking distance of one of the three remaining branches (B) The library's total book collection has grown in the past five years (C) The city's population has grown by 10% over the past five years (D) Library staff have received positive performance reviews ANSWER: A EXPLANATION: Directly supports the specific rationale — targeting low-use branches whose patrons have a viable nearby alternative. (B), (C), (D) do not address whether closing specifically those two branches serves patrons well. Q92. Which of the following, if true, would most undermine the director's proposal? (A) One of the two branches proposed for closure is the only library location accessible by public transit for a large, low-income neighborhood with no

nearby alternative (B) The remaining three branches have slightly larger parking lots (C) The library board has approved budget increases in the past (D) Total visits across the entire city have declined, not just at these two branches ANSWER: A EXPLANATION: Identifies that closing this specific branch would eliminate access for an underserved population with no alternative, undermining the "without harming service" claim. (B), (C) are irrelevant. (D) somewhat supports the general consolidation logic rather than undermining it. What assumption is the director making in proposing that consolidation will "improve service quality... without requiring additional funding"?

(A) That resources currently split across five branches can be effectively redirected to three without a proportional loss of overall access □

- (B) That all five branches currently have identical operating costs
- (C) That the city council will approve the plan without objection
- (D) That online library services can fully replace in-person visits

Correct Answer: (A)

Explanation:

This is the load-bearing assumption connecting consolidation to improved service without harming access. (B), (C), (D) are not necessary for this specific logical claim.

Q14.

A city library reports that in-person visits have declined by 40% over the past five years, while its budget has remained flat. The library director proposes closing two of the library's five neighborhood branches to consolidate resources into the three busiest locations, arguing this will improve service quality at the remaining branches without requiring additional funding. Q91. Which of the following, if true, would most strongly support the director's proposal? (A) The two branches proposed for closure have seen the sharpest declines in visits and are located within walking distance of one of the three remaining branches (B) The library's total book collection has grown in the past five years (C) The city's population has grown by 10% over the past five years (D) Library staff have received positive performance reviews ANSWER: A EXPLANATION: Directly supports the specific rationale — targeting low-use branches whose patrons have a viable nearby alternative. (B), (C), (D) do not address whether closing specifically those two branches serves patrons well. Q92. Which of the following, if true, would most undermine the director's proposal? (A) One of the two branches proposed for closure is the only library location accessible by public transit for a large, low-income neighborhood with no nearby alternative (B) The remaining three branches have slightly larger parking lots (C) The library board has approved budget increases in the past (D) Total visits across the entire city have declined, not just at these two branches ANSWER: A EXPLANATION: Identifies that closing this specific branch would eliminate access for an underserved population with no alternative, undermining the "without harming service" claim. (B), (C) are irrelevant. (D) somewhat supports the general consolidation logic rather than undermining it. Q93. What assumption is the director making in proposing that consolidation will "improve service quality... without requiring additional funding"? (A) That resources currently split across five branches can be effectively redirected to three without a proportional loss of overall access (B) That all five branches currently have identical operating costs (C) That the city council will approve the plan without objection (D) That online library services can fully replace in-person visits ANSWER: A EXPLANATION: This is the load-bearing assumption connecting consolidation to improved service without harming access. (B), (C), (D) are not necessary for this specific logical claim. Which of the following would be the most relevant piece of additional information needed to evaluate the proposal fairly?

- (A) The average temperature in the city during library hours

(B) Usage patterns and demographic reliance at each of the five branches individually □

(C) The color scheme of the proposed renovated branches

(D) The library director's personal reading preferences

Correct Answer: (B)

Explanation:

Directly relevant to assessing which branches can be closed with least harm. (A), (C), (D) are irrelevant.

Q15.

A city library reports that in-person visits have declined by 40% over the past five years, while its budget has remained flat. The library director proposes closing two of the library's five neighborhood branches to consolidate resources into the three busiest locations, arguing this will improve service quality at the remaining branches without requiring additional funding. Q91. Which of the following, if true, would most strongly support the director's proposal? (A) The two branches proposed for closure have seen the sharpest declines in visits and are located within walking distance of one of the three remaining branches (B) The library's total book collection has grown in the past five years (C) The city's population has grown by 10% over the past five years (D) Library staff have received positive performance reviews ANSWER: A EXPLANATION: Directly supports the specific rationale — targeting low-use branches whose patrons have a viable nearby alternative. (B), (C), (D) do not address whether closing specifically those two branches serves patrons well. Q92. Which of the following, if true, would most undermine the director's proposal? (A) One of the two branches proposed for closure is the only library location accessible by public transit for a large, low-income neighborhood with no nearby alternative (B) The remaining three branches have slightly larger parking lots (C) The library board has approved budget increases in the past (D) Total visits across the entire city have declined, not just at these two branches ANSWER: A EXPLANATION: Identifies that closing this specific branch would eliminate access for an underserved population with no alternative, undermining the "without harming service" claim. (B), (C) are irrelevant. (D) somewhat supports the general consolidation logic rather than undermining it. Q93. What assumption is the director making in proposing that consolidation will "improve service quality... without requiring additional funding"? (A) That resources currently split across five branches can be effectively redirected to three without a proportional loss of overall access (B) That all five branches currently have identical operating costs (C) That the city council will approve the plan without objection (D) That online library services can fully replace in-person visits ANSWER: A EXPLANATION: This is the load-bearing assumption connecting consolidation to improved service without harming access. (B), (C), (D) are not necessary for this specific logical claim. Q94. Which of the following would be the most relevant piece of additional information needed to evaluate the proposal fairly? (A) The average temperature in the city during library hours (B) Usage patterns and demographic reliance at each of the five branches individually (C) The color scheme of the proposed renovated branches (D) The library director's personal reading preferences ANSWER: B EXPLANATION: Directly relevant to assessing which branches can be closed with least harm. (A), (C), (D) are irrelevant. If the two branches proposed for closure together account for only 8% of total system-wide visits, while requiring 30% of the total budget to operate, how does this affect the strength of the director's proposal?

(A) It weakens the proposal, since low-usage branches are more important to keep

(B) It strengthens the proposal, since closing disproportionately costly, low-usage branches directly supports "consolidating resources... without additional funding" □

(C) It has no bearing on the proposal

(D) It proves the director acted in bad faith

Correct Answer: (B)

Explanation:

Directly supports the proposal's stated logic — freeing disproportionate cost from low-use branches for reallocation. (A) misreads the significance of low usage. (C) ignores clear relevance. (D) is an unsupported motive claim.

Q16.

A supplement manufacturer claims that its new multivitamin "boosts energy levels," citing a survey in which 70% of users reported "feeling more energetic" within two weeks of starting the supplement. Critics note the survey did not include a placebo control group and relied entirely on self-reported feelings rather than any objective measure of energy or fatigue. Which of the following, if true, would most weaken the manufacturer's claim?

(A) A separate, controlled study found that a placebo (identical in appearance, containing no active ingredients) produced a comparable 65% self-reported "feeling more energetic" rate over the same period ☐

- (B) The supplement contains twelve different vitamins and minerals
- (C) The supplement costs less than competing brands
- (D) The survey included 500 participants

Correct Answer: (A)

Explanation:

Demonstrates the placebo effect could account for nearly all of the reported improvement, undermining the causal claim. (B), (C), (D) are irrelevant to whether the supplement itself causes the effect.

Q17.

A supplement manufacturer claims that its new multivitamin "boosts energy levels," citing a survey in which 70% of users reported "feeling more energetic" within two weeks of starting the supplement. Critics note the survey did not include a placebo control group and relied entirely on self-reported feelings rather than any objective measure of energy or fatigue. Q96. Which of the following, if true, would most weaken the manufacturer's claim? (A) A separate, controlled study found that a placebo (identical in appearance, containing no active ingredients) produced a comparable 65% self-reported "feeling more energetic" rate over the same period (B) The supplement contains twelve different vitamins and minerals (C) The supplement costs less than competing brands (D) The survey included 500 participants ANSWER: A EXPLANATION: Demonstrates the placebo effect could account for nearly all of the reported improvement, undermining the causal claim. (B), (C), (D) are irrelevant to whether the supplement itself causes the effect. Which of the following, if true, would most strengthen the manufacturer's claim?

(A) A randomized, double-blind, placebo-controlled trial found significantly higher objectively-measured energy metrics in the supplement group compared to the placebo group ☐

- (B) The company has been in business for twenty years
- (C) 70% is a higher percentage than most supplements report
- (D) The supplement is approved for sale in multiple countries

Correct Answer: (A)

Explanation:

The gold-standard controlled comparison with objective measures directly addresses both flaws critics identified. (B), (C), (D) are irrelevant to causal validity.

Q18.

A supplement manufacturer claims that its new multivitamin "boosts energy levels," citing a survey in which 70% of users reported "feeling more energetic" within two weeks of starting the supplement. Critics note the survey did not include a placebo control group and relied entirely on self-reported feelings rather than any objective measure of energy or fatigue. Q96. Which of the following, if true, would most weaken the manufacturer's claim? (A) A separate, controlled study found that a placebo (identical in appearance, containing no active ingredients) produced a comparable 65% self-reported "feeling more energetic" rate over the same period (B) The supplement contains twelve different vitamins and minerals (C) The supplement costs less than competing brands (D) The survey included 500 participants ANSWER: A EXPLANATION: Demonstrates the placebo effect could account for nearly all of the reported improvement, undermining the causal claim. (B), (C), (D) are irrelevant to whether the supplement itself causes the effect. Q97. Which of the following, if true, would most strengthen the manufacturer's claim? (A) A randomized, double-blind, placebo-controlled trial found significantly higher objectively-measured energy metrics in the supplement group compared to the placebo group (B) The company has been in business for twenty years (C) 70% is a higher percentage than most supplements report (D) The supplement is approved for sale in multiple countries ANSWER: A EXPLANATION: The gold-standard controlled comparison with objective measures directly addresses both flaws critics identified. (B), (C), (D) are irrelevant to causal validity. What are the two specific methodological criticisms raised against the original survey?

(A) Small sample size and short duration

(B) Lack of a placebo control group and reliance on subjective self-report rather than objective measurement □

(C) Use of unqualified researchers and lack of government approval

(D) High cost of the study and lack of peer review

Correct Answer: (B)

Explanation:

Directly quotes the two named criticisms. (A), (C), (D) introduce criticisms never mentioned.

Q19.

A supplement manufacturer claims that its new multivitamin "boosts energy levels," citing a survey in which 70% of users reported "feeling more energetic" within two weeks of starting the supplement. Critics note the survey did not include a placebo control group and relied entirely on self-reported feelings rather than any objective measure of energy or fatigue. Q96. Which of the following, if true, would most weaken the manufacturer's claim? (A) A separate, controlled study found that a placebo (identical in appearance, containing no active ingredients) produced a comparable 65% self-reported "feeling more energetic" rate over the same period (B) The supplement contains twelve different vitamins and minerals (C) The supplement costs less than competing brands (D) The survey included 500 participants ANSWER: A EXPLANATION: Demonstrates the placebo effect could account for nearly all of the reported improvement, undermining the causal claim. (B), (C), (D) are irrelevant to whether the supplement itself causes the effect. Q97. Which of the following, if true, would most strengthen the manufacturer's claim? (A) A randomized, double-blind, placebo-controlled trial found significantly higher objectively-measured energy metrics in the supplement group compared to the placebo group (B) The company has been in business for twenty years (C) 70% is a higher percentage than most supplements report (D) The supplement is approved for sale in multiple countries ANSWER: A EXPLANATION: The gold-standard controlled comparison with objective measures directly addresses both flaws critics identified. (B), (C), (D) are irrelevant to causal validity. Q98. What are the

two specific methodological criticisms raised against the original survey? (A) Small sample size and short duration (B) Lack of a placebo control group and reliance on subjective self-report rather than objective measurement (C) Use of unqualified researchers and lack of government approval (D) High cost of the study and lack of peer review ANSWER: B EXPLANATION: Directly quotes the two named criticisms. (A), (C), (D) introduce criticisms never mentioned. The manufacturer's claim "boosts energy levels" would be most accurately restated, given the critics' points, as:

(A) "70% of users, in an uncontrolled survey, reported a subjective feeling of increased energy — a finding that could be explained by factors other than the supplement's active ingredients" □

(B) "The supplement is scientifically proven to increase energy in all users"

(C) "70% of users experienced no side effects"

(D) "The supplement is the most effective on the market"

Correct Answer: (A)

Explanation:

Accurately reflects the passage's information and stated limitations. (B), (C), (D) make unsupported or unrelated claims.

Q20.

A supplement manufacturer claims that its new multivitamin "boosts energy levels," citing a survey in which 70% of users reported "feeling more energetic" within two weeks of starting the supplement. Critics note the survey did not include a placebo control group and relied entirely on self-reported feelings rather than any objective measure of energy or fatigue. Q96. Which of the following, if true, would most weaken the manufacturer's claim? (A) A separate, controlled study found that a placebo (identical in appearance, containing no active ingredients) produced a comparable 65% self-reported "feeling more energetic" rate over the same period (B) The supplement contains twelve different vitamins and minerals (C) The supplement costs less than competing brands (D) The survey included 500 participants ANSWER: A EXPLANATION: Demonstrates the placebo effect could account for nearly all of the reported improvement, undermining the causal claim. (B), (C), (D) are irrelevant to whether the supplement itself causes the effect. Q97. Which of the following, if true, would most strengthen the manufacturer's claim? (A) A randomized, double-blind, placebo-controlled trial found significantly higher objectively-measured energy metrics in the supplement group compared to the placebo group (B) The company has been in business for twenty years (C) 70% is a higher percentage than most supplements report (D) The supplement is approved for sale in multiple countries ANSWER: A EXPLANATION: The gold-standard controlled comparison with objective measures directly addresses both flaws critics identified. (B), (C), (D) are irrelevant to causal validity. Q98. What are the two specific methodological criticisms raised against the original survey? (A) Small sample size and short duration (B) Lack of a placebo control group and reliance on subjective self-report rather than objective measurement (C) Use of unqualified researchers and lack of government approval (D) High cost of the study and lack of peer review ANSWER: B EXPLANATION: Directly quotes the two named criticisms. (A), (C), (D) introduce criticisms never mentioned. Q99. The manufacturer's claim "boosts energy levels" would be most accurately restated, given the critics' points, as: (A) "70% of users, in an uncontrolled survey, reported a subjective feeling of increased energy — a finding that could be explained by factors other than the supplement's active ingredients" (B) "The supplement is scientifically proven to increase energy in all users" (C) "70% of users experienced no side effects" (D) "The supplement is the most effective on the market" ANSWER: A EXPLANATION: Accurately reflects the passage's information and stated limitations. (B), (C), (D) make unsupported or unrelated claims. Which of the following most accurately distinguishes correlation from causation, as illustrated by the critics' concerns in the passage?

(A) Correlation requires a controlled experiment; causation does not

(B) Correlation shows two things occur together; causation requires ruling out alternative explanations (like the placebo effect) for why they occur together □

(C) Correlation is always weaker evidence than causation

(D) Causation can only be established through surveys

Correct Answer: (B)

Explanation:

Accurately reflects the passage's critique logic. (A) reverses the actual relationship. (C) is a vague, imprecise restatement. (D) contradicts the passage's clear preference for controlled studies over surveys.

Q21.

A city installed automated speed cameras at ten high-accident intersections. Over the following year, recorded accidents at those ten intersections fell by 30%. City officials cite this as proof that the cameras deterred speeding and thus prevented accidents. Which of the following, if true, would most weaken the officials' conclusion?

(A) During the same year, accidents fell by 28% citywide, including at intersections without any cameras, due to a broader road-safety education campaign launched that year □

(B) The cameras cost ₹2 crore to install

(C) Drivers dislike being fined by automated systems

(D) The ten intersections were chosen based on historical accident data

Correct Answer: (A)

Explanation:

A similar citywide decline independent of the cameras suggests another cause may explain most of the drop. (B), (C), (D) don't address the causal attribution question.

Q22.

A city installed automated speed cameras at ten high-accident intersections. Over the following year, recorded accidents at those ten intersections fell by 30%. City officials cite this as proof that the cameras deterred speeding and thus prevented accidents. Q101. Which of the following, if true, would most weaken the officials' conclusion? (A) During the same year, accidents fell by 28% citywide, including at intersections without any cameras, due to a broader road-safety education campaign launched that year (B) The cameras cost ₹2 crore to install (C) Drivers dislike being fined by automated systems (D) The ten intersections were chosen based on historical accident data
ANSWER: A EXPLANATION: A similar citywide decline independent of the cameras suggests another cause may explain most of the drop. (B), (C), (D) don't address the causal attribution question. Which of the following, if true, would most strengthen the officials' conclusion?

(A) Accidents at the ten camera intersections fell by 30%, while accidents at comparable, similarly-selected intersections without cameras (matched for prior accident rates) remained essentially unchanged over the same year □

(B) The cameras take a photo of every vehicle's license plate

(C) The city government is popular among voters

(D) The cameras were installed by a well-known contractor

Correct Answer: (A)

Explanation:

A proper matched-comparison showing no change at similar non-camera intersections isolates the camera's effect. (B), (C), (D) are irrelevant to causal attribution.

Q23.

A city installed automated speed cameras at ten high-accident intersections. Over the following year, recorded accidents at those ten intersections fell by 30%. City officials cite this as proof that the cameras deterred speeding and thus prevented accidents. Q101. Which of the following, if true, would most weaken the officials' conclusion? (A) During the same year, accidents fell by 28% citywide, including at intersections without any cameras, due to a broader road-safety education campaign launched that year (B) The cameras cost ₹2 crore to install (C) Drivers dislike being fined by automated systems (D) The ten intersections were chosen based on historical accident data

ANSWER: A EXPLANATION: A similar citywide decline independent of the cameras suggests another cause may explain most of the drop. (B), (C), (D) don't address the causal attribution question. Q102.

Which of the following, if true, would most strengthen the officials' conclusion? (A) Accidents at the ten camera intersections fell by 30%, while accidents at comparable, similarly-selected intersections without cameras (matched for prior accident rates) remained essentially unchanged over the same year (B) The cameras take a photo of every vehicle's license plate (C) The city government is popular among voters (D) The cameras were installed by a well-known contractor

ANSWER: A EXPLANATION: A proper matched-comparison showing no change at similar non-camera intersections isolates the camera's effect. (B), (C), (D) are irrelevant to causal attribution. What is the implicit assumption in the officials' original reasoning?

(A) That the recorded accident decline at these ten intersections was not primarily driven by factors unrelated to the cameras □

- (B) That all drivers are aware of the exact location of each camera
- (C) That accidents recorded at other intersections do not matter
- (D) That speed cameras are cheaper than hiring traffic police

Correct Answer: (A)

Explanation:

This is the necessary unstated assumption underlying the causal leap. (B), (C), (D) are not required assumptions.

Q24.

A city installed automated speed cameras at ten high-accident intersections. Over the following year, recorded accidents at those ten intersections fell by 30%. City officials cite this as proof that the cameras deterred speeding and thus prevented accidents. Q101. Which of the following, if true, would most weaken the officials' conclusion? (A) During the same year, accidents fell by 28% citywide, including at intersections without any cameras, due to a broader road-safety education campaign launched that year (B) The cameras cost ₹2 crore to install (C) Drivers dislike being fined by automated systems (D) The ten intersections were chosen based on historical accident data

ANSWER: A EXPLANATION: A similar citywide decline independent of the cameras suggests another cause may explain most of the drop. (B), (C), (D) don't address the causal attribution question. Q102.

Which of the following, if true, would most strengthen the officials' conclusion? (A) Accidents at the ten camera intersections fell by 30%, while accidents at comparable, similarly-selected intersections without cameras (matched for prior accident rates) remained essentially unchanged over the same year (B) The cameras take a photo of every vehicle's license plate (C) The city government is popular among voters (D) The cameras were installed by a well-known contractor

ANSWER: A

EXPLANATION: A proper matched-comparison showing no change at similar non-camera intersections isolates the camera's effect. (B), (C), (D) are irrelevant to causal attribution. Q103. What is the implicit assumption in the officials' original reasoning? (A) That the recorded accident decline at these ten intersections was not primarily driven by factors unrelated to the cameras (B) That all drivers are aware of the exact location of each camera (C) That accidents recorded at other intersections do not matter (D) That speed cameras are cheaper than hiring traffic police ANSWER: A EXPLANATION: This is the necessary unstated assumption underlying the causal leap. (B), (C), (D) are not required assumptions. The reasoning flaw in the officials' conclusion is most similar to which of the following?

(A) A city plants more trees in a park and, after birds are seen nesting there the same year, concludes the trees caused increased city-wide bird migration, without checking whether bird populations rose elsewhere too □

(B) A city bans a chemical known through repeated controlled trials to cause water contamination, and contamination levels subsequently fall

(C) A hospital introduces a new surgical protocol, tests it in a randomized trial against the old protocol, and finds significantly better outcomes

(D) A school raises math scores after, in a controlled study, comparing classes randomly assigned to a new teaching method versus classes using the old method

Correct Answer: (A)

Explanation:

Structurally identical flaw: observing a change coinciding with an intervention, without checking whether the same change occurred independently elsewhere. (B), (C), (D) all involve actual controlled/experimental verification — a structurally different situation.

Quantitative Techniques

Q1.

Data: A company's quarterly revenue (in ₹ lakh) for four quarters of a year was: Q1 = 120, Q2 = 150, Q3 = 135, Q4 = 195. Company expenses were a constant 60% of revenue in each quarter. What was the company's total profit (revenue – expenses) for the full year?

(A) ₹240 lakh ☒

(B) ₹200 lakh

(C) ₹216 lakh

(D) ₹180 lakh

Correct Answer: (A)

Explanation:

Total revenue = $120 + 150 + 135 + 195 = ₹600$ lakh. Total expenses = $60\% \times 600 = ₹360$ lakh. Profit = $600 - 360 = ₹240$ lakh. (B), (C), (D) result from arithmetic errors in summing revenue or applying the percentage.

Q2.

Data: A company's quarterly revenue (in ₹ lakh) for four quarters of a year was: Q1 = 120, Q2 = 150, Q3 = 135, Q4 = 195. Company expenses were a constant 60% of revenue in each quarter. Q105.

What was the company's total profit (revenue – expenses) for the full year? (A) ₹240 lakh (B) ₹200 lakh (C) ₹216 lakh (D) ₹180 lakh ANSWER: A EXPLANATION: Total revenue = $120 + 150 + 135 + 195 = ₹600$ lakh. Total expenses = $60\% \times 600 = ₹360$ lakh. Profit = $600 - 360 = ₹240$ lakh. (B), (C), (D) result from arithmetic errors in summing revenue or applying the percentage. By what percentage did revenue grow from Q1 to Q4?

(A) 50%

(B) 62.5% ☒

(C) 60%

(D) 75%

Correct Answer: (B)

Explanation:

Growth = $(195 - 120)/120 \times 100 = 75/120 \times 100 = 62.5\%$. (A), (C), (D) are miscalculations of the same formula.

Q3.

Data: A company's quarterly revenue (in ₹ lakh) for four quarters of a year was: Q1 = 120, Q2 = 150, Q3 = 135, Q4 = 195. Company expenses were a constant 60% of revenue in each quarter. Q105.

What was the company's total profit (revenue – expenses) for the full year? (A) ₹240 lakh (B) ₹200 lakh (C) ₹216 lakh (D) ₹180 lakh ANSWER: A EXPLANATION: Total revenue = $120 + 150 + 135 + 195 = ₹600$ lakh. Total expenses = $60\% \times 600 = ₹360$ lakh. Profit = $600 - 360 = ₹240$ lakh. (B), (C), (D) result from arithmetic errors in summing revenue or applying the percentage. Q106. By what percentage did revenue grow from Q1 to Q4? (A) 50% (B) 62.5% (C) 60% (D) 75% ANSWER: B EXPLANATION: Growth = $(195 - 120)/120 \times 100 = 75/120 \times 100 = 62.5\%$. (A), (C), (D) are miscalculations of the same formula. What was the average quarterly revenue for the year?

(A) ₹140 lakh

(B) ₹150 lakh ☒

(C) ₹135 lakh

(D) ₹160 lakh

Correct Answer: (B)

Explanation:

Average = $600 / 4 = ₹150$ lakh. Other options do not correctly divide the verified total by 4.

Q4.

Data: A company's quarterly revenue (in ₹ lakh) for four quarters of a year was: Q1 = 120, Q2 = 150, Q3 = 135, Q4 = 195. Company expenses were a constant 60% of revenue in each quarter. Q105.

What was the company's total profit (revenue – expenses) for the full year? (A) ₹240 lakh (B) ₹200 lakh (C) ₹216 lakh (D) ₹180 lakh ANSWER: A EXPLANATION: Total revenue = $120+150+135+195 = ₹600$ lakh. Total expenses = $60\% \times 600 = ₹360$ lakh. Profit = $600 - 360 = ₹240$ lakh. (B), (C), (D) result from arithmetic errors in summing revenue or applying the percentage. Q106. By what percentage did revenue grow from Q1 to Q4? (A) 50% (B) 62.5% (C) 60% (D) 75% ANSWER: B EXPLANATION: Growth = $(195 - 120)/120 \times 100 = 75/120 \times 100 = 62.5\%$. (A), (C), (D) are miscalculations of the same formula. Q107. What was the average quarterly revenue for the year? (A) ₹140 lakh (B) ₹150 lakh (C) ₹135 lakh (D) ₹160 lakh ANSWER: B EXPLANATION: Average = $600 / 4 = ₹150$ lakh. Other options do not correctly divide the verified total by 4. In which quarter was the profit (in absolute ₹) the highest?

(A) Q1

(B) Q2

(C) Q3

(D) Q4 ☐

Correct Answer: (D)

Explanation:

Since expenses are a constant 60% of revenue every quarter, profit (40% of revenue) is directly proportional to revenue. Q4 has the highest revenue (₹195 lakh) and therefore the highest profit ($40\% \times 195 = ₹78$ lakh).

Q5.

Data: A company's quarterly revenue (in ₹ lakh) for four quarters of a year was: Q1 = 120, Q2 = 150, Q3 = 135, Q4 = 195. Company expenses were a constant 60% of revenue in each quarter. Q105.

What was the company's total profit (revenue – expenses) for the full year? (A) ₹240 lakh (B) ₹200 lakh (C) ₹216 lakh (D) ₹180 lakh ANSWER: A EXPLANATION: Total revenue = $120+150+135+195 = ₹600$ lakh. Total expenses = $60\% \times 600 = ₹360$ lakh. Profit = $600 - 360 = ₹240$ lakh. (B), (C), (D) result from arithmetic errors in summing revenue or applying the percentage. Q106. By what percentage did revenue grow from Q1 to Q4? (A) 50% (B) 62.5% (C) 60% (D) 75% ANSWER: B EXPLANATION: Growth = $(195 - 120)/120 \times 100 = 75/120 \times 100 = 62.5\%$. (A), (C), (D) are miscalculations of the same formula. Q107. What was the average quarterly revenue for the year? (A) ₹140 lakh (B) ₹150 lakh (C) ₹135 lakh (D) ₹160 lakh ANSWER: B EXPLANATION: Average = $600 / 4 = ₹150$ lakh. Other options do not correctly divide the verified total by 4. Q108. In which quarter was the profit (in absolute ₹) the highest? (A) Q1 (B) Q2 (C) Q3 (D) Q4 ANSWER: D EXPLANATION: Since expenses are a constant 60% of revenue every quarter, profit (40% of revenue) is directly proportional to revenue. Q4 has the highest revenue (₹195 lakh) and therefore the highest profit ($40\% \times 195 = ₹78$ lakh). What was the ratio of Q2 revenue to Q3 revenue, in simplest form?

(A) 10:9 ☐

(B) 9:10

(C) 5:4

(D) 4:5

Correct Answer: (A)

Explanation:

$Q2:Q3 = 150:135$. Dividing both by their GCD (15) gives 10:9. (B) inverts the ratio. (C), (D) do not match the actual values.

Q6.

Data: A school has 800 students. 45% of the students are girls, and the remainder are boys. Among the girls, 60% are enrolled in the science stream. Among the boys, 50% are enrolled in the science stream. How many girls are enrolled in the science stream?

(A) 210

(B) 216 ☒

(C) 220

(D) 200

Correct Answer: (B)

Explanation:

Girls = $45\% \times 800 = 360$. Girls in science = $60\% \times 360 = 216$.

Q7.

Data: A school has 800 students. 45% of the students are girls, and the remainder are boys. Among the girls, 60% are enrolled in the science stream. Among the boys, 50% are enrolled in the science stream. Q110. How many girls are enrolled in the science stream? (A) 210 (B) 216 (C) 220 (D) 200
ANSWER: B EXPLANATION: Girls = $45\% \times 800 = 360$. Girls in science = $60\% \times 360 = 216$. What is the total number of students (boys + girls) enrolled in the science stream?

(A) 430

(B) 436 ☒

(C) 440

(D) 420

Correct Answer: (B)

Explanation:

Boys = $800 - 360 = 440$. Boys in science = $50\% \times 440 = 220$. Total in science = 216 (girls) + 220 (boys) = 436 .

Q8.

Data: A school has 800 students. 45% of the students are girls, and the remainder are boys. Among the girls, 60% are enrolled in the science stream. Among the boys, 50% are enrolled in the science stream. Q110. How many girls are enrolled in the science stream? (A) 210 (B) 216 (C) 220 (D) 200
ANSWER: B EXPLANATION: Girls = $45\% \times 800 = 360$. Girls in science = $60\% \times 360 = 216$. Q111. What is the total number of students (boys + girls) enrolled in the science stream? (A) 430 (B) 436 (C) 440 (D) 420
ANSWER: B EXPLANATION: Boys = $800 - 360 = 440$. Boys in science = $50\% \times 440 = 220$. Total in science = 216 (girls) + 220 (boys) = 436 . What percentage of the total student body (800) is enrolled in the science stream?

(A) 50%

(B) 54.5% ☐

(C) 55%

(D) 60%

Correct Answer: (B)

Explanation:

$$436 / 800 \times 100 = 54.5\%.$$

Q9.

Data: A school has 800 students. 45% of the students are girls, and the remainder are boys. Among the girls, 60% are enrolled in the science stream. Among the boys, 50% are enrolled in the science stream. Q110. How many girls are enrolled in the science stream? (A) 210 (B) 216 (C) 220 (D) 200 ANSWER: B EXPLANATION: Girls = $45\% \times 800 = 360$. Girls in science = $60\% \times 360 = 216$. Q111. What is the total number of students (boys + girls) enrolled in the science stream? (A) 430 (B) 436 (C) 440 (D) 420 ANSWER: B EXPLANATION: Boys = $800 - 360 = 440$. Boys in science = $50\% \times 440 = 220$. Total in science = 216 (girls) + 220 (boys) = 436 . Q112. What percentage of the total student body (800) is enrolled in the science stream? (A) 50% (B) 54.5% (C) 55% (D) 60% ANSWER: B EXPLANATION: $436 / 800 \times 100 = 54.5\%$. What is the ratio of boys to girls within the science stream, in simplest form?

(A) 55:54 ☐

(B) 54:55

(C) 5:4

(D) 10:9

Correct Answer: (A)

Explanation:

Boys in science : Girls in science = $220:216$. Dividing both by their GCD (4) gives $55:54$ ($55 = 5 \times 11$ and $54 = 2 \times 27$ share no further common factor, confirming this is fully simplified).

Q10.

Data: A school has 800 students. 45% of the students are girls, and the remainder are boys. Among the girls, 60% are enrolled in the science stream. Among the boys, 50% are enrolled in the science stream. Q110. How many girls are enrolled in the science stream? (A) 210 (B) 216 (C) 220 (D) 200 ANSWER: B EXPLANATION: Girls = $45\% \times 800 = 360$. Girls in science = $60\% \times 360 = 216$. Q111. What is the total number of students (boys + girls) enrolled in the science stream? (A) 430 (B) 436 (C) 440 (D) 420 ANSWER: B EXPLANATION: Boys = $800 - 360 = 440$. Boys in science = $50\% \times 440 = 220$. Total in science = 216 (girls) + 220 (boys) = 436 . Q112. What percentage of the total student body (800) is enrolled in the science stream? (A) 50% (B) 54.5% (C) 55% (D) 60% ANSWER: B EXPLANATION: $436 / 800 \times 100 = 54.5\%$. Q113. What is the ratio of boys to girls within the science stream, in simplest form? (A) 55:54 (B) 54:55 (C) 5:4 (D) 10:9 ANSWER: A EXPLANATION: Boys in science : Girls in science = $220:216$. Dividing both by their GCD (4) gives $55:54$ ($55 = 5 \times 11$ and $54 = 2 \times 27$ share no further common factor, confirming this is fully simplified). If 10% of the boys currently in the science stream drop out, how many boys would remain in the science stream?

(A) 198 ☐

(B) 200

(C) 220

(D) 210

Correct Answer: (A)

Explanation:

$$220 \times (1 - 0.10) = 220 \times 0.9 = 198.$$

Q11.

Data: A school has 800 students. 45% of the students are girls, and the remainder are boys. Among the girls, 60% are enrolled in the science stream. Among the boys, 50% are enrolled in the science stream. Q110. How many girls are enrolled in the science stream? (A) 210 (B) 216 (C) 220 (D) 200

ANSWER: B EXPLANATION: Girls = $45\% \times 800 = 360$. Girls in science = $60\% \times 360 = 216$. Q111.

What is the total number of students (boys + girls) enrolled in the science stream? (A) 430 (B) 436 (C) 440 (D) 420 ANSWER: B EXPLANATION: Boys = $800 - 360 = 440$. Boys in science = $50\% \times 440 = 220$. Total in science = 216 (girls) + 220 (boys) = 436 . Q112. What percentage of the total student body (800) is enrolled in the science stream? (A) 50% (B) 54.5% (C) 55% (D) 60% ANSWER: B

EXPLANATION: $436 / 800 \times 100 = 54.5\%$. Q113. What is the ratio of boys to girls within the science stream, in simplest form? (A) 55:54 (B) 54:55 (C) 5:4 (D) 10:9 ANSWER: A EXPLANATION: Boys in science : Girls in science = $220:216$. Dividing both by their GCD (4) gives 55:54 ($55 = 5 \times 11$ and $54 = 2 \times 27$ share no further common factor, confirming this is fully simplified). Q114. If 10% of the boys currently in the science stream drop out, how many boys would remain in the science stream? (A) 198 (B) 200 (C) 220 (D) 210 ANSWER: A EXPLANATION: $220 \times (1 - 0.10) = 220 \times 0.9 = 198$. How many boys are NOT enrolled in the science stream?

(A) 220 ☒

(B) 230

(C) 210

(D) 200

Correct Answer: (A)

Explanation:

$$\text{Total boys} - \text{boys in science} = 440 - 220 = 220.$$

Q12.

A shopkeeper buys an item for ₹800 and sells it for ₹960. Find the profit percentage.

(A) 20% ☒

(B) 15%

(C) 25%

(D) 18%

Correct Answer: (A)

Explanation:

$$\text{Profit} = 960 - 800 = ₹160. \text{ Profit \%} = 160/800 \times 100 = 20\%.$$

Q13.

Q116. A shopkeeper buys an item for ₹800 and sells it for ₹960. Find the profit percentage. (A) 20% (B) 15% (C) 25% (D) 18% ANSWER: A EXPLANATION: Profit = $960 - 800 = ₹160$. Profit % = $160/800 \times 100 = 20\%$. A sum of ₹5,000 is invested at simple interest at a rate of 8% per annum for 3 years. Find the interest earned.

(A) ₹1,200 ☒

- (B) ₹1,000
- (C) ₹1,500
- (D) ₹1,350

Correct Answer: (A)

Explanation:

$$SI = P \times R \times T / 100 = 5000 \times 8 \times 3 / 100 = ₹1,200.$$

Q14.

Q116. A shopkeeper buys an item for ₹800 and sells it for ₹960. Find the profit percentage. (A) 20% (B) 15% (C) 25% (D) 18% ANSWER: A EXPLANATION: Profit = 960 – 800 = ₹160. Profit % = $160/800 \times 100 = 20\%$. Q117. A sum of ₹5,000 is invested at simple interest at a rate of 8% per annum for 3 years. Find the interest earned. (A) ₹1,200 (B) ₹1,000 (C) ₹1,500 (D) ₹1,350 ANSWER: A EXPLANATION: $SI = P \times R \times T / 100 = 5000 \times 8 \times 3 / 100 = ₹1,200$. What will be the total amount (principal + interest) after those 3 years (continuing from Q117)?

(A) ₹6,200 ☒

- (B) ₹6,000
- (C) ₹6,500
- (D) ₹6,100

Correct Answer: (A)

Explanation:

$$\text{Amount} = \text{Principal} + \text{Interest} = 5,000 + 1,200 = ₹6,200.$$

Q15.

Q116. A shopkeeper buys an item for ₹800 and sells it for ₹960. Find the profit percentage. (A) 20% (B) 15% (C) 25% (D) 18% ANSWER: A EXPLANATION: Profit = 960 – 800 = ₹160. Profit % = $160/800 \times 100 = 20\%$. Q117. A sum of ₹5,000 is invested at simple interest at a rate of 8% per annum for 3 years. Find the interest earned. (A) ₹1,200 (B) ₹1,000 (C) ₹1,500 (D) ₹1,350 ANSWER: A EXPLANATION: $SI = P \times R \times T / 100 = 5000 \times 8 \times 3 / 100 = ₹1,200$. Q118. What will be the total amount (principal + interest) after those 3 years (continuing from Q117)? (A) ₹6,200 (B) ₹6,000 (C) ₹6,500 (D) ₹6,100 ANSWER: A EXPLANATION: Amount = Principal + Interest = 5,000 + 1,200 = ₹6,200. A trader marks up goods by 25% above cost price, then gives a discount of 10% on the marked price. Find the overall profit percentage.

(A) 12.5% ☒

- (B) 15%
- (C) 10%
- (D) 20%

Correct Answer: (A)

Explanation:

$$\begin{aligned} \text{Assume cost price} &= ₹100. \text{ Marked price} = 100 \times 1.25 = ₹125. \text{ Discount} = 10\% \times 125 = ₹12.5. \text{ Selling price} = \\ &125 - 12.5 = ₹112.5. \text{ Profit} = ₹12.5 \text{ on a cost of ₹100} = 12.5\% \text{ profit.} \end{aligned}$$

Q16.

Q116. A shopkeeper buys an item for ₹800 and sells it for ₹960. Find the profit percentage. (A) 20% (B) 15% (C) 25% (D) 18% ANSWER: A EXPLANATION: Profit = 960 – 800 = ₹160. Profit % = $160/800$

$\times 100 = 20\%$. Q117. A sum of ₹5,000 is invested at simple interest at a rate of 8% per annum for 3 years. Find the interest earned. (A) ₹1,200 (B) ₹1,000 (C) ₹1,500 (D) ₹1,350 ANSWER: A EXPLANATION: $SI = P \times R \times T / 100 = 5000 \times 8 \times 3 / 100 = ₹1,200$. Q118. What will be the total amount (principal + interest) after those 3 years (continuing from Q117)? (A) ₹6,200 (B) ₹6,000 (C) ₹6,500 (D) ₹6,100 ANSWER: A EXPLANATION: Amount = Principal + Interest = 5,000 + 1,200 = ₹6,200. Q119. A trader marks up goods by 25% above cost price, then gives a discount of 10% on the marked price. Find the overall profit percentage. (A) 12.5% (B) 15% (C) 10% (D) 20% ANSWER: A EXPLANATION: Assume cost price = ₹100. Marked price = $100 \times 1.25 = ₹125$. Discount = $10\% \times 125 = ₹12.5$. Selling price = $125 - 12.5 = ₹112.5$. Profit = ₹12.5 on a cost of ₹100 = 12.5% profit. If the simple interest on a sum for 2 years at 10% per annum is ₹400, find the sum.

(A) ₹2,000 ☒

(B) ₹1,800

(C) ₹2,200

(D) ₹2,500

Correct Answer: (A)

Explanation:

$$SI = P \times R \times T / 100 \rightarrow 400 = P \times 10 \times 2 / 100 = P \times 0.2 \rightarrow P = 400 / 0.2 = ₹2,000.$$
